When you need to add olive oil to dinner, you prepare or melt butter to the dessert in progress, using one of the best cups of liquid measuring will make the process more efficient. This cup allows you to quickly measure the exact amount of wet ingredients you need for your recipe. Although liquid measuring cups are a relatively low-tech kitchen gadget, especially compared to tools such as air fry and pressure cooks, there are some design features that both novice and specialist cooks can equally appreciate. For example, some cups of liquid measuring have an adjustable base which means you can only adjust the cups with the sizes you need and fill the necessary content. Others have an angle design that allows you to read measurements from the top of the cup - not bending and throwing on the sides! However, if you prefer a simple low-cost measuring cup or classic set of glass measuring cups like your grandparents might have, a good artificial version of them is still worth buying. You can also find a small version whose size is perfect for cocktails, medications or saks. Scroll for more information about the best cups of liquid measuring on the market. 1. Paula Deen made some appearances and even launched a Deen-themed store, but now Deen's return to the spotlight is more going thanks to a huge old check for \$75 million. According to the Wall Street Journal, Paula Deen rolls in the dough, y'all. And with the dough we mean money, not the type of butter. He's also in discussions with tv networks about the show's potential, though Food Network says they're not the ones on the other side of that conversation. Deen's confidence in his comeback attempt stemmed from, hundreds of thousands of people who signed up on the 'We Support Paula Deen!' Facebook page. Hundreds of thousands of my fans sent me a message of love and support, he explained. What do you think of Paula Deen's plans for a comeback? Do you think the queen of butter will succeed?
