## Physioex 9.1 exercise 12 activity 3

No Frames Version 12: Serological Test Website Navigation 12: Serological Test 7 years ago which patient (s) tested positive for HIV?contains an ambiguous test \_\_\_\_\_ which causes the patient CPossible. If you had forgotten to add an emerging buffer, would you expect results(s) up to all of the above? Why would a patient infected with HIV initially indirectly test negative with ELISA if they would read a false negative for positive control and negative in all patient samples? The patient hasn't had a seroconversion yet. 7 years ago - Master of Biology- Bachelor of Science (Biology)- Undergraduate Education 7 years ago sorry, thank you very much, 7 years ago - Master of Biology- Undergraduate Science (Biology)- Undergraduate Education 6 months ago Search Q&A Board Gallery Resource Library Blog DictionaryChat Social Facebook Twitter YouTubeCommunityCo StatsWho's Online Staff Biology Forums - Force Study © 2010-2020 | Powered by SMF | SMF © 2015, Simple Machines | The sitemap Biology-Forums.com not affiliated with any publisher.
