Works with cars that have the OBD2 system, including CAN system 2. Reads and clears generic and manufacturer-specific Diagnostic Trouble Codes (DTCs) and turns off control engine light 3. Supports multiple requests for problems code: generic codes, pending codes and manufacturer's specific codes 4. Retrieves Vehicle Identification No.) (VIN) on 2002 and newer vehicles that support Mode 9 5. Very reliable and accurate 6. Easy-to-read, backlit 2-line LCD display 7. Easy to use with a plug-in 8. Standalone device without the need for an additional laptop to operate 9. Small in size and comfortably fit in your palm 10. Performs continuous DTC scanning 11. Communicates securely with the evil computer 12. There is no need for batteries via removable OBD II cable 13. One year warranty Benefits 1. Saves time and money on repairs- find out what is wrong before repair and check a repair after service 2. Wider vehicle coverage with CAN Protocol 3 support. Turns on engine light (MIL). Deletes Diagnostic Trouble Codes (DTCs) and resets OBD2 display status 4. More features for smaller reviews of the emission readiness status of OBD displays, downloading VIN on OBD2 vehicles and more 5. Determines the mil lamp status (the miscue lamp) 6. Keeps engine performance in good shape with regular inspections and prevents future costly repairs 7. Helps identify problems with a used vehicle before you buy or sell This code reader will work with my car-U480 OBD2 Code Reader is specifically designed to work with most OBD II compatible vehicles. It is necessary in the United States that all 1996 and newer vehicles must be OBD2 compatible, and this includes all domestic, Asian and European vehicles. OBD was adopted in Europe in petrol cars from 2001 and in diesel cars from 2004. A small number of petrol models in the United States in 1994 and 1995 are obd2 compliant. To check whether a vehicle from 1994 or 1995 is OBD2 compatible, check the Vehicle Emissions Control Information (VECI) label, which is located under the bonnet or of the radiator on most vehicles. the vehicle is OBD2-compatible, the label will denote - OBD II Certified- . Government rules require all OBD2-compatible vehicles to have a common 16-pin Data Link Connector (DLC). For your vehicle to be OBD II compatible, it must have a 16-pin Data Link Connector (DLC) under the dashboard, and the vehicle's emission control label must indicate that the vehicle is OBD II compatible. This label is placed on the inside of the bonnet (hood) of most vehicles. VEHICLE COVERAGE All OBD2 vehicles How to use 1. When your Check Engine light or Service Engine Soon or - Check-lights are on, stop the car and apply the parking brake, turn on the ignition and then put the code reader to 16-pin diagnostics (universal connector) usually placed under the dashboard of the car. 2. Press the Read button and it automatically gets the diagnostic error codes (DTCs) if there are any in less than 10 seconds. 3. Identify the error codes and download their detailed descriptions by looking up the list of Diagnostic Trouble Codes (DTCs) in the attached User's Guide.
