When it comes to cooking, we always want to have more time, more ingredients, better technology and more control over what we do. In case you have a restaurant or any type of eatery where you serve high quality food, you should follow the highest standards in order to keep your customers happy. Salton Induction Cooker ID1401 is a single cooktop burner and an effective addition in any commercial kitchen. It is easy to use and clean and does not require gas. What's more, it is safe and portable. Like all kitchen appliances, this product has its pros and cons, so we decided to highlight the most important factors that contribute to the decision of any buyer. Here are the main features of Salton Induction Cooker:1. Controls the experience of touch controls, indicators and display windows, this product is easy to use. Check out its most important controls:1. Power - Click on/off to start and turn off the device. The great thing about this product is that users can set the desire power, so that the cooking speed will be as low or high as they need it. If you set up to 300 W, the item will stay warm. As power increases, the element heats up faster. It can be set from 300W to 1800W.2. Temperature selector and - this control allows the user to increase and reduce the temperature from 140 to 465 degrees Fahrenheit. There are 8 settings, which means that the buttons must be pressed lightly 8 times to reach the highest temperature and another 8 times to reach the lowest temperature.3. Temperature indicator - there are two indicators that light up when the temperature has reached the desired level. The first is next to the display, and the second is located right in front of the control. While the first will remain lit until the device is running, the second will shut down when the item loses temperature.4. Set and the lock indicator - this touch control allows the user to lock the device after setting the temperature to avoid children accessing or changing the temperature by mistake. After pressing, the light light will work until you click on it again. If you use this feature, the device will only respond to commands to turn on and off.5. Timer - Users can set a timer from 1 minute to 3 hours (180 minutes). If not installed, the display will show the default time, which is 30 minutes. In order to increase or reduce cooking time, users must click Adjustment. Once set up, the display will blink 5 times. An acoustic signal will be heard over time.2 SurfaceThis induction plate is made of black ceramic glass, which is highly sensitive and immediately detects detects Dishes. Users should only use pots and pans that are made of magnetic materials or aluminum. Non-stick bottom utensils are also recommended, but not mandatory. The surface can be easily cleaned with fabric and water, as well as special solutions or sprays, if any.3 Heating ElementsThis single burner induction cooktop is easy to use thanks to its simple controls. Its unique element can be used at both high and low power and temperature. The best thing about this cooktop is that only the item is heated during use. The surrounding surface remains cool, which means that it is possible to leave kitchen utensils.4. Power/WattsUsers can set the device up to different power levels: 300W - element retains heat 500W - element boils - low 700W - heat element mid-low 1000W - element temperature average 1200W - temperature element medium-high 1400W - temperature element high 1600W - the temperature of the element is at a maximum of 1800W - the temperature of the element sear.5. It sensors sensors play a role to protect the device from overheating and causing damage due to incompatible utensils. The utensil sensor alerts the device when the materials are incompatible and switched off automatically. In addition, it has incorrect voltage sensors and activityless sensors that disable the item if no activity is detected within 30 seconds.6. The ventilation is provided by a cooler, which is located at the bottom of the device. In order to work properly, the stove must be placed on a dry, roving surface. Small humming sounds can sometimes be heard from the device, especially when it is installed at high temperatures.7. The ID1401 Induction Induction Induction Plate features safety features that protect the surface of the countertop from damage as well as its components. Several bugs are displayed on the screen when the utensils are not ready for induction, the fork has a different voltage than 110/120V or no activity detected within 30 seconds. The device automatically shuts down to prevent overheating. AccessoriesThe product box contains an induction cooktop itself and a short cord that is designed to supply the device with power. The manufacturer specifically recommends avoiding all attachments or accessories to prevent hazards. Size This device weighs about 4 kg, is very portable and can be stored in any type of kitchen. Its size 33 x 41.4 x 19.8 cm is suitable for all commercial environments, as it takes up a small amount of space. 10. ProsSafety, temperature control and ease of use are what everyone is looking for in the cooktop induction. With the exception of these advantages, this slab is elegant, stylish and fits in all its controls are easy to use and memorable, have no complex features and heats up immediately. The fact that has so many power levels and 8 temperature parameters offers the user high temperature control, for all kinds of food. It is easy to clean and respond very much to all situations, immediately turning off yourself if the conditions are found to be inappropriate.11 ConsThere has very few downsides that could determine buyers not to choose this product. First of all, there are a few things that can't be done with induction cooktops that apply to all models: not all induction utensils are ready and the size of the pot or pan should match the diameter of the countertop. In this case, the smallest diameter should be 12cm (4.75 inches), and the largest should be 20cm (8in). In the event that a maximum power of 1800 watt is to be used, the device will use the entire 15A electrical circuit, which means that no other electric unit or device can be used.12 Consumer ratings buyers enjoy using this product, although they seem to complain about the timer function and the strength of the device. Overall, it is a product that offers good value for money and gets a final score of 3.5 out of 5 points based on customer feedback.13. Where you can buy the Salton Induction Cooker ID1401On less than check the price on Amazon, shoppers get a modern, safe and easy-to-use induction stove that is effective, takes up almost no space and has sensory controls that make cooking more enjoyable.14 Can you use the Salton induction slab from the outside? Yes, you can use this countertop outside if possible and if there is a power source. In addition, this stove can be used outside with a generator capable of 2000 w output. Please note that this unit is not designed for a humid environment and so, keep it dry!15. ManualLet will let us know in the comments and will send it via email. Salton Induction Cooker ID1401 is a great alternative for gas stoves and is suitable for buyers who are on a tight budget or would like to invest less in such a device. This is a useful addition to any commercial kitchen that can be used in any circumstances to cook and heat food or boil water. Enjoy it!
