Switching to the main contentSepiece 13, 2011A women's thinking, but eating can affect her metabolism, surprising studies have shown. People who drank a 380-calorie milkshake experienced a greater decline in the level of the appetite-stimulating hormone ghrelin when they said it was a 620-calorie indulgent shake than when they said it was a 140- calorie sensible one. Lower ghrelin levels contribute to weight loss by reducing hunger and increasing the rate at which calories are burned, says the study's lead author, Alia J. Crum, a researcher in psychology at Yale University. She recommends dieting to penetrate into an indulgent mindset. For example, there is no need to focus on the healthy use of lettuce; instead, focus on its decadent aspects, such as sauce or cheese. People have settled outside the theater, cramming the last chapter on the subway, and wearing their hair in intricate braids (guilty). One of my friends, who will remain nameless, even took a day out of work to prepare. I have to get a blowout and me, she told me. If you're one of millions of people going to the movie tonight, why not make it extra special and dress up as your favorite character? We talked to Katnisa's prep team, we thought her makeup artist Ve Neill—about the breakdown for each of her appearances. Whether you choose to wear fake blood or fake eyelashes is up to you. Chariot RideWhen Katniss is first introduced to Panem, she turns heads with an incredible flame cloak. But if you look closely, her eyes are a real stage stealer. Neal is on the look . Keep up with the latest daily buzz with the BuzzFeed Daily newsletter! Source: Lionsgate Popular young adult book series Soulkeepers has been picked up by film producer Aaron Magnani in the latest set of teen-centered fantasy novels that focus on the big screen. The six-volume series was written by G.P. Ching, with its first book debuting in 2011; the final installment was released in March. The series centers on 15-year-old Jacob, who has remained in the care of his uncle after a mysterious car accident in which his mother disappeared. One of his uncle's neighbors, the mysterious Dr. Abigail Silva, tells Jacob that if he helps her protect the souls of the peoples from Fallen Angels, she can help him find out what happened to his mother. In the supernatural world of these novels, angels and Demons are fighting for human souls on earth, and Jacob has a unique ability to help protect souls from evil. According to an article from The Hollywood Reporter, Aaron Magnani Productions has optioned right and is currently looking for a writer to customize novels as well as perfect male lead in the central role of conflicted teen Jacob. The series taps into two popular and profitable phenomenon in both novels and movies: young adult fantasy and Christian themes. Faith-based movies have performed surprisingly, y well at the box office last year, with films such as Mom's Night Out, Heaven Is For Real, God's Not Dead all making more than expected ticket sales of movies with overt Christian themes. Heaven Is For Real made \$22.5 million when it came out over Easter weekend, the Son of God made \$25.6 million on its opening weekend in February, and God's Not Dead surprised in March when it took \$9.2 million at a small number of theaters where it opened. Cing has said that she think the Soulkeepers series is self-religious, although the Christian undertones are pretty clear given that there are angels and demons and the struggle for souls. Jacob also spends much of the series undergoing spiritual self discovery as he moves from atheist to Christian. I never intended Soulkeepers to be a prescriptively Christian book. I wrote it because I read tons of YA books, but in almost all of them, the main character has never thought much about religion. But statistically in America, about 90 percent of children are raised in households that practice religion. I wanted my character to reflect that young adults were thinking about god and the life of their offspring. However, I also wanted to reflect that this thinking is individual, unique, and not necessarily the same as their family unit beliefs. Ching said in a blog post in response to whether the series is religious. Whatever Ching's feelings about the subject, Magnani could leverage Christian themes in his favor in the film. Perhaps more obvious is the fact that the films adapted from young adult science fiction to a new series have been very successful at the box office in recent years. Harry Potter, Twilight, and Hunger Games movies have amassed huge amounts of ticket sales and there are celebrities from young stars attracted to play heroes. The latest of these films was the March divergent, which starred newcomer Shailene Woodley. Formulaic's approach to making teen-friendly movie franchises from a teen-friendly science fiction/fantasy new series results in critic-proof movies that provide homemade bacon, even if they are not very good or especially original. Divergent is a great example of this: the film has only a 41 percent Fresh rating on rotten tomatoes and was criticized for being too similar to the Hunger Games, but still has \$148 million domestically during its run in theaters. Turning Soulkeepers into a movie a good bet on Magnani as a movie probably won't even be great for a lot of money and has huge franchise potential.
