5.5.4 Beta May 12 Fix empty box app on Android P DP2 Preview Minor Fixes and Optimization Full-set, performance-driven, home screen. Don't take any substitutes! Nova Launcher is the top launcher for modern Android, covering full material design throughout. Nova Launcher replaces your home screen with one you control and can customize. Change icons, layouts, animations, and more. Nova Launcher Prime Features :Gestures - Swipe, pinch, double tap and more on your home screen to open your favorite apps Read Graphs - Never miss a message. Unread counting icons for Hangouts, SMS, Gmail and more with TeslaUnread pluginCustom Drawer Groups - Create new tabs or folders in the app boxhide Apps - Keep a clean app drawer, hiding never used appsicon Swipes - Install custom actions to swipe at app labels or foldersMore scrolling effects - such as Wipe, Accordion, and ThrowMod Lite Info/Languages: English, Russian, Ukrainian.Optimized Graphics/ CipalInRUction: 1. Remove the previous version of Nova Launcher and Tesla Unread plug2 Install Nova Launcher and Tesla Unread plugin from my package (not from Google Play). 3. Enjoy! This is a corrected version, fully unlocked basic features. A prime key is required. If your ROM came with Nova Launcher you will have to remove it before installing this Nova Launcher beta build to include new features and settings before they are released to all users. They are not tested so thoroughly and cannot be so reliable. Beta builds are best suited for users who don't mind making the situation a little unstable. You can get started with Nova Beta builds either by opting as a tester on Google Play or downloading APK from the link below. Here's how to sign up for the beta channel on Google Play: Beta is building work as a direct update to the existing Nova Launcher installation and doesn't require you to remove Nova's stable build in the first place. All betas are compatible with Nova Prime and its features. For betas installed outside the Play Store, you can upgrade from Nova Settings to the Nova Launcher Version beta. You can also include an automatic update check in this menu.
