Tired of spam calls to your phone? You might want to install an app like Nomorobo, which says it can stop unwanted calls. But how does it work? I honestly don't understand how many options there were there a couple of TV shows on my phone. I came across a lot more than the five listed here, and it was overwhelming to whittle the list down to just these few options. As someone who doesn't have cable, I already use a lot of alternative sources to catch up with the shows I'm looking at, but there are so many more options than I've even come across before. If you want to watch the French news program, you can. Sports from other countries? No problem. There are literally a few apps for almost any imaginable television program. (July 12, 2012) the way we watch TV is evolving. Subscription to TV is no longer fully necessary. There are now different ways to watch TV directly on mobile devices. This includes a new wave of live services. They are worth a fraction of what most TV subscriptions cost these days. Those cutting cables should definitely feel at home here. Here are the best TV apps for Android. PlayStation Vue, a former member of this list, was closed on January 30, 2020.ATTT LiveHuluNetflixPluto TVSling TVSony CrackleVRVYouTube TVSports streaming appsTV station appsATTT TV (Live TV)Price: \$40 -65 per monthAT-TV is one of the TV apps that makes actual TV. The lowest level boasts 60 channels live. Highest level to more than 120 channels. Unfortunately, the app itself still needs a lot of work. Developers are definitely developing some bugs. So this is not the first choice we recommend to everyone live television service. It was the previous DirecTV Now and just underwent a rebranding here recently. The user interface is still quite clunky and it has problems that need to be fixed. However, it is a live TV service. Hulu (Live TV)Price: Free trial /\$7.99-\$39.99 per month Hulu is one of the largest television apps out there. It has a whole bunch of old shows, old seasons of current shows, movies and more. In 2017, they also started to do live. This essentially makes Hulu a cross between something like Netflix and something like Sling TV. The basic service costs \$7.99 per month (limited ads) or \$11.99 per month (without advertising). The LIVE TV package will run you \$40 a month and includes 50 channels. You can also purchase add-ons for Showtime, HBO and others. It's a great one-stop shop. Prices can stack up quickly though, especially if you want extras like HBO. NetflixPrice: Free/\$8.99-\$15.99Everybody knows about Netflix. This is the place to go when you just want to turn on something and binge for hours. It doesn't do live. However, it has an absolute stock of TV shows. This includes current shows, old shows, and even anime. In many cases, Netflix will have most seasons. This is a great way to catch up on some classics. However, Netflix takes a long time to get the new seasons of the current shows they carry. Their Netflix original series shows such as House of Cards, Orange is the New Black, and all of these Marvel shows are pretty good. \$7.99 gets you a subscription, not HD. \$11.99 supports up to four screens and UHD resolution where possible. It is easily the most popular of all tv apps. Pluto TV (live TV)Price: Free (with ads) Pluto TV is a rare free live TV service. It boasts more than 100 live television channels and thousands of movies. The app also includes chromecast support as well as Android TV apps. You get a functional user interface, although it's nothing special. He manages to stay free by dropping many channels that require huge fees. So you don't get things like food network or AMC. You still have to pay for these channels. Otherwise, it's an affordable free live TV app and there's a ton of content from all kinds of channels. Sling TVPrice: Free trial/\$20-\$25 per month - add-onsSling TV is probably the best of live TV apps right now. It's also the most customizable. There are two basic packages that go from \$20 to \$25 a month. Then you can add on a bunch of packages depending on your They have things for comedy, sports, kids, and even HBO. The app is just ok. It has the support of Chromecast. It also has some errors that need to be worked out. It's not as stable as something like YouTube TV, but YouTube TV is also not everywhere yet. It is also available on tons of devices other than mobile devices. This makes it one of the best live TV apps. Sony CracklePrice: FreeSony Crackle is one of the best free options streaming video. It has a plethora of movies, TV shows and other content. The app supports itself with advertising and there are quite a few advertisements. The user interface is manageable and the choice is not bad for its price. The Android TV version of this app is awful though, and there are some bugs here and there that Sony should probably iron out. Otherwise, it's good enough for free service. VRVPrice: Free/\$9.99 per monthVRV is probably the best streaming service for indie content, anime and other unusual types of TV. The service is a conglomerate of other services. These include Crunchyroll (anime), HiDive (anime), Rooster Teeth (indie), Geek and Sundry (indie), Nicksplat (old cartoons), Nerdlist (indie), Cartoon Hangover, and many others. You get all of them for one monthly price. With Crunchyroll simultaneous anime from Japan, it's as close as it gets live for this genre. Otherwise it is an outstanding source of old and indie television. We sincerely recommend it to all fans of the anime. We also recommend Fumination for anime lovers. It often has simulcasts in English dubs new and popular shows. YouTube TVPrice: The free trial / \$49.99 per monthYouTube TV started small but grew into a pretty good live TV app about 70 channels. These channels include local sports channels, popular TV channels and more. You can also get Showtime and Fox Sports Soccer as extra add-ons for an extra fee. The service also includes an unlimited DVR cloud, six subscription accounts, and some additional YouTube features. There are also additions to additional channels such as HBO. It expands rapidly, but not without flaws. This one is very good if you need something simple. Sports streaming appsPrice: Free /VariesMany major sports organizations have their own TV apps. THEY are the NHL, NFL, MLB and NBA. There are others. Experience varies from app to app. However, they all follow the basics. You can stream an unlimited amount of off-market games (meaning rather than games that air on local television where you live) for a nominal fee each year. They don't usually include playoff games. They are usually subject to nationwide blackout. Prices are usually manageable. Apps have also been slowly improving over the years. Big sports fans might want to check these out, rather than going on a huge subscription full of channels that they don't watch anywhere else. Individual TV Channel AppsPrice: Free/Varies there are many TV stations with individual apps now. Some examples include ABC, NBC, CW, CBS, Hallmark Channel, EPIX NOW (linked), FOX Now, and many others. They all work roughly the same way. You can watch a bunch of shows from the network, live stream some TV shows and events, and watch the news whenever possible. Generally, we recommend generic TV apps such as Sling TV, Hulu, YouTube TV, etc. however who really likes just one channel can usually just get this channel without all the extra fluff. Prices vary, as do functions. They all have free tests, however. If we missed any big TV apps, tell us about them in the comments! You can also click here to check out our latest Android app and game lists! Ir blaster is one of the most underrated features on mobile phones. It's also getting rarer and rarer as a feature as phones try to remove as many ports as possible these days. However, those with IR blasters are useful for all kinds of trivia. One such instance as the remote control is basically nothing with an infrared receiver. This can include TVs, air conditioners, some thermostats, cameras and other similar things. Today let's talk about TV remotes. Here are the best TV remote apps for Android! Single RemoteXboxYatseTV manufacturer appsPhone maker appsPrice: Free/\$6.99AnyMote is one of the best TV remote apps. It boasts support for more than 900,000 devices with more added on a regular basis. It's also not just for TVs. It includes support for DSLR cameras, air conditioners, and virtually any technology that has an IR blaster. The remote control itself is simple and easy to use. There are also buttons for things like Netflix, Hulu, and even Cody if your TV supports these things. It's a bit expensive at \$6.99 and it hasn't seen an update since early 2018 at the time of writing. However, it still works with phones with IR blaster. Google HomePrice: Free/Equipment Costs Money Google Home is definitely one of the best remote apps. Its main function is to manage Google Home and Google Chromecast devices. This means that you will need one of those to do the job. Otherwise, it's pretty simple. All you have to do is choose a show, movie, song, image, or whatever. Then you throw it on the screen. It can't do things like change the channel. It also can't change the volume. However, you can change the volume on your phone and it has the same effect. It will only get better as time goes on. The app is free. However, Google Home and Chromecast devices cost money. RokuPrice: FreeThe official Roku app is great for Roku owners. The app allows you to control almost everything on Roku. All you need your actual TV remote control for its volume. The Roku remote comes with fast forward buttons, rewinds, play/pauses and navigation. Also comes with voice search. It's not what you think about when it comes to TV remote apps. However, those with Roku don't really need a full-fledged remote app anyway. The app is also free. SURE Universal Smart TV RemotePrice: FreeSure Universal Smart TV Remote is a competent application for remote TV with an absurdly long name. It's also one of the great TV remote apps. He's working on a whole bunch of TVs. Like Anymote, it also supports other devices with IR blaster. It has the added bonus of supporting DLNA and WiFi for casting photos and videos. There is even support for Amazon Alexa. We thought it was more of a forward thinking. This also means that Google Home isn't the only app here with the support of a personal assistant app. It's a little rough around the edges. However, you can try it out before you buy it. Twinone Universal TV RemotePrice: FreeTwinone Universal Remote is one of the best free TV remote apps. It has a simple design. You should have no problem using it once you install it. It should also work for most TVs and set-top boxes. There is even support for some devices that don't fit into these categories. Right now, the only bad part is the hype. Twinone doesn't provide a way to get rid of them. We would probably see a paid version in the future to accommodate this. Also, it only seems to be available on some devices. Otherwise, it's a good option. Unified RemotePrice: Free / \$3.99Unified Remote is one of the most unique remote applications. This is useful for computer management. This is beneficial for those who have HTPC (home cinema PC) setting. There is support for PC, Mac and Linux. It also comes with a keyboard and mouse for better input management. It's also great for Raspberry Pi devices, Arduino Yun devices and more. The free version has just over a dozen remotes along with most features. The paid version comes with everything including 90 remotes, NFC support, Android Wear support and more. XboxPrice: Free/Requires Xbox OneThe Xbox app is a perfectly good remote app. This allows you to access many parts of Xbox Live. This includes messages, achievements, news feed and more. There is also a remote built-in. You can use it to navigate the interface, open applications, and more. This will give you quick access to play/pause, rewind, fast forward, backward, and other buttons that you usually need a controller to access. Many people use xbox as an all-in-one entertainment package. These people can use this app to make it a little easier. Yatse: Cody Remote ControlPrice: Free/up to \$6.49Yatse is one of the go-to remote apps for Cody. It has boat load features. If necessary, you can drop media on streaming devices. It also has native support for Plex and Emby servers. You can access the standalone library, manage Cody in full, and it even has the support of Muzei and DashClock. We're only at the top of the iceberg when it comes to things, it's can do. However, it's best used on something like a home theater PC connected to the TV. You can try it for free. You will get all the features if you go pro. TV maker appsPrice: Free (usually) most TV manufacturers have remote apps for their smart TVs. These apps usually have all kinds of functionality. They connect to your smart TV via Wi-Fi. This means that you don't IR blaster to do these apps. You can change the channel or the volume. This will even allow you to choose apps on your TV. Some of the manufacturer's applications are pretty good. Samsung and LG tend to do a good job with their apps especially. Some of them are not so great. We couldn't check every manufacturer. Fortunately, almost all of their remote apps can be downloaded for free. So you can try them without financial risk. We have a Sizio connection. Just look for your manufacturer in the Google Play Store to find others. Phone OEM Remote AppsPrice: FreeMost phones with IR blaster come with a remote app. They can usually be found in the Google Play Store. For example, some Mi devices use the built-in TV-remote Xiaomi app (linked). These are apps that manufacturers have tested with their devices. So it is likely that they will work at least well. Normally you don't get a lot of features. However, OEM manufacturers include these apps on their devices for a reason. At least they usually do. Sometimes they even pre-install the pro version, so you don't have to buy it. You might as well give these a shot first to see if they work since you already have. If we missed any of the best TV remote apps for Android, tell us about them in the comments! This is an update to an earlier article, so check out the comments for some suggestions from our readers!
