Shre from San Francisco, CA Verified Reviewer Verified Buyer Original review: Dec. 26, 2019Great product and recommended to my colleagues! Delighted to see more features come out in the new year. The best VPN I've used - in terms of speed and reliability. Particularly impressed when watching videos and streaming. Use it on Android and my Mac laptop. Trevor of Toronto, ON Verified Reviewer Verified Buyer Original review: Dec. 18, 2019I'm usually stopped by products that claim to be the fastest there, especially at price points that are comparable to alternatives. That's why I was amazed by The Hotspot Shield. The setup was easy and was lightning fast, almost don't feel like I was using a VPN at all. I tend to flow a fair bit, and don't have any lags experience yet. I'm currently on month-to-month, but will likely change to annually soon. David from Toronto, ON Verified Reviewer Verified Buyer Original review: Dec. 17, 2019I use Hotspot Shield almost every day for streaming tv and I've also heard that it's great for torrenting movies (I totally don't do that though). It is faster and more reliable than other VPNs I have tried (nordVPN, expressVPN, etc.) - 4 months and have not had problems with it so far. Eli from Cupertino, CA Verified Reviewer Verified Buyer Original review: Oct. 10, 2019I travel several times a year and has always used the Hotspot Shield product to catch up with your favorite news and TV shows. Also, sometimes it takes the hassle of checking my bank details because some of the tools are blocked for overseas users. And it's great to shop around for the best price (airplane tickets or car rentals - saved as much as \$200/week per rental). Hotspot Shield received the world's Fastest VPN award from Ookla in 2019. It allows users to hide their IP address and encrypt their internet browsing to protect themselves from hackers and keep their internet habits private. Multi-device support: Hotspot Shield offers products for MacOS, Windows, Chrome, iOS, and Android. Users can connect up to five devices under one account. 256-bit military-level AES, designed to protect users from hackers and identity theft. Encryption protects users if they navigate from home or from unsecured public Wi-Fi. Privacy: Hotspot Shield offers secure private browsing from over 3,000 global servers in over 70 countries. No third-party involvement: Hotspot Hotspot publish an annual transparency report and promise zero share of information to users of government or other third parties. Payment options: Monthly subscriptions start at \$12.99, and the company offers a consistent discount (38%) if you opt for annual billing. It also offers a 45-day money back guarantee. Designed by Hermann Zapf in 1978, the well-known symbol fontset Zapf Dingbats has given us a lot of fun over the years. The most memorable is David Carson's story about, when he designed for Ray Gun in 1994, set up an entire interview with Bryan Ferry in Zapf Dingbats because Carson found the interview boring. But no matter how much love Zapf Dingbats, as designers we are always looking for alternatives to add versatility to our typography. So if you're looking to use a free set of symbol fonts in a conventional way, or to push design boundaries like Carson, here is a selection of alternatives that might come in handy... 01. Stroke 7 font symbol font was inspired by iOS 7 A custom symbol font with scalable vector icons, Stroke 7's thin contour design was inspired by iOS 7. The icon font includes 202 characters, all sports a very modern style that will beautifully complement a variety of projects.02. Symbols1Upgrade fonts with this inspired technology set created by Rebecca Fonts, the Symbols1 font set definitely has a technological twist to it. Made up of 25 characters that translate from a basic Latin alphabet, Symbols1 focuses mainly on computer icons, such as loading sandtimes and cursors. But with the symbols of the sun and the clouds, there is a touch of nature to uniforme things. The Glyphix One contains nearly 100 symbols Designed by veteran font design Nick Curtis, the symbols of the Glyphix One set are all based around transportation. From cars to bicycles, taxis to helicopters, this symbol font would be ideal for information graphics.04. Dingbat CobogóThe cobogós presents from the simplest shapes to more complex geometry pieces Cobogó is the inspiration for the digital font Dingbat Cobogó designed by Brazilian graphic designer Guilherme Luigi. The symbols were created from the synthesis of pierced elements found in photographs by Josivan Rodrigues for his book Cobogó in Pernambuco.05. CittadinoDmitry Golub wanted to improve the symbols on the Milan metro map This free symbol font is a brilliant collection of icons, apparently improving the charts already presented on the Milan metro map. Designed by Moscow designer Dmitry Golub, there is a collection in uppercase and lowercase, as well as a number series.06. RosetteO Gorgeous inspired font symbol Designer Aga Silva is a converted font designer & calligrapher. Starting as an architect and working full time in Business Architecture, she discovered the joys of using the dip pen and some of that creativity led to a number of symbol fonts - - it.07. Web Hosting Hub giphsHelp yourself to over 155 high quality icons with this free download from The Web Hosting Hub Created by Web Hosting Hub, this set of over 1500 high quality icons are easy to use with Bootstrap, other CSS frames and in any web projects. They also work in desktop software, such as Adobe Photoshop or Microsoft Word.08. Symbol SignsCreative designer Sander Baumann offers this set of 49 symbols as a free download In this free collection, Dutch creative designer Sander Baumann has included symbol signs commonly used for public service, such as toilets, phone, first aid, elevator, information, restaurant, café, smoking, child, icon recycle, shower, reception, collection arrows and much, much more.09. Rhomus OmniliotsChoose from a variety of snowflakes patterns and cool arrows and geometric shapes This set of symbols comes from the team at Typotheticals. With over 120 glyphs to choose from, the set is predominantly snowflake and arrow patterns, as well as a few discarded geometric shapes for good measure.10. PizzaDude BulletsPizzaDude is a Danish designer living in Copenhagen whose name is taken from The Tom Hanks Burbs. Since 1998 he has been tirelessly producing characters, which now number more than 400. At the end of 2002 PizzaDude decided to make commercial fonts, but still creates freeware fonts every now and then. He considers his style to be free, relaxed and stupid. PizzaDude Bullets includes smiley faces, arrows, eyes, stars and it doesn't cost you anything.11. Kalocsai FlowersIn the same vein as the Ephone set, this scented collection of 63 free symbol fonts was designed by Levi Halmos. It is incredible that he made such a nice collection of free font products to download.12. Heydings Common IconsHeydon Pickering is a web designer from Norwich, England, who specializes in CSS, typography, semantic HTML and responsive design. He was one of the first early innovators to release a completely free, embeddable font icon for web UI designers. It's still available to download for free, and it's still well worth doing it.13. Heydings ControlsIn a blog post on the Pickering website he addresses many advantages of using a web font (instead of images) to make icons in UI design. And to help you further, he created this fantastic collection of 60 glyphs specifically designed for accessorizing and classifying textual cues, such as hyperlinks, navigation elements, and buttons.14. Web symbolsCurrency from Moscow-based design agency Just Be Nice Studio there are some awesome renderings of oft-required symbols, including mail, Wi-Fi and location icons in this set of 90 fonts Free.15. Modern Icons Modern icons is a font designed in early 2011 for interface designers and programmers. Icons are web-ready so you can install the OpenType file for Photoshop forms and @font-do code in CSS to embed them right in the web page. Modern icons are designed to work on websites at sizes up to 18 pixels, but are best at more than 24 pixels. This is a must-have for all designers, especially as it is currently free.16. Adhesive No. SevenAdhesive No. Seven is a set of banners textured as a free download. It has been designed to support blackletter font, which has a fixed stroke thickness representing adhesive paper tape; offering similar features to a wide pen. Personally I think the banners are more adaptable than blackletter cast iron and can be used on different design styles. The font characteristics themselves replace alternate glyphs with repeating characters. If you are interested in adhesive No. Seven Blackletter, you can also purchase separately on MyFonts.com.And here are a couple that might be worth paying for... Vintage WeddingVintage Wedding has a versatile selection of shapes. Despite the name, this font is suitable for baby shower invitations, Valentines and many other custom applications. The large collection of 432 icons is divided into four categories to purchase. The symbols can be used in an elegant vintage manner, while retaining a modern vibe. You can find here such rare and beautiful objects, such as phonograph or cult glasses. The font includes many various elements that will help you create compositions from flowers, choose commemorative vases, and even dress the bride and groom. Acta SymbolsOriginal designed for a Chilean newspaper in 2010, the Acta family is a clean and fresh system available in three styles, with lots of ligatures and alternates. Even if the foundry suggests the font is best suited for newspapers and magazines, I suggest you test the new web-friendly feature drive. The complete Acta system contains Acta and Acta Display, both in six weights, in italics. This font is an amazing collection of stylish features appealing. You will notice that Acta is not the cheapest alternative to Dingbat, but having the choice and flexibility is worth investing. This post has been expanded and updated by Creative Bloq staff. The staff.
