## Singer model 99 instruction manual

A few months ago, I found this lovely 99k singer. k just suggests that it was made in Scotland, and otherwise it's the same as the other 99s singer, who made it from 1911 to the 1960s. the guy i got was from 1958 . The 99-ersion singer was supposed to be smaller and more portable than the classical singer 66. It's made of cast iron, though, so it's still fairly heavy compared to most modern machines. The good thing about vintage reader sewing machines is that they almost always use bobbins and needles that are still in production today. This one uses a class of 66 bobbin and a normal needle 15x1. You can also still find parts for these machines fairly easily. It was my first vintage sewing machine so I will walk you through the process of cleaning, restoring, and troubleshooting. As a beginner, I knew nothing was going into this, and I made a lot of mistakes, so I should be able to explain this to someone else who is at a novice level, too. I try to explain all the terms and processes thoroughly, and I have used such links to all my resources along the way. See also my hands on turning 99k into a limp and I'm restoring in the second 99k.
