Hurley's A CONCISE INTRODUCTION to LOGIC is the #1 logic textbook on the market and is unrivalled for its clarity and comprehensive clarity. In this twelfth edition, Hurley continues to build on the tradition of a clear, focused and accessible presentation of the basic subject of logic, both formal and informal. The edition's new previews link the content of the section to real-world scenarios relevant to students' lives, using everyday examples to translate new notions and concepts into concepts that readers unreleating the subject can relate to. Hurley's extensive, carefully sequenced exercises guide students toward greater skills with the skills they learn. Important Note: Media content referenced in the product description or product text may not be available in the eBook version. Readmit Credit students who have been away for more than a year must reapply. Students who have completed Online Orientation and New Student Counseling are not required to complete these steps again New non-legal students must apply to CCSF, take a placement test and meet with an advisor. Search CCSF After completing these steps, come back and review the registration information below. Due to the recent COVID-19 health pandemic and the shift to distance learning and services, CCSF wants to support students as much as possible to cross the finish line and complete their academic goals. To further promote flexibility and support, CCSF will allow students to request a Pass/No Pass by selecting this option within myRAM by November 20, 2020 for the full semester course. For not full term course P / NP will be extended to 90% of the course length. Because changing to P/NP grade may have implications for transfer and/or license requirements, students will be able to withdraw from classes without getting a W on their transcripts. Students see an EW rating on printouts. An EW grade will have no impact on GPA, academic standing or repeated consequences. Students see an EW rating on printouts.
