These are my personal notes from Magnetic Sponsorship by author Mike Dillard. Before I dive in, I would like to point out that Mike Dillard has already decided to leave the network marketing /MLM industry, then moved and became very successful in completely different industries and ventures. While the information in this book is still and remains very valid today, many people became successful and entire companies were built on the information described in this book, please understand that Mike Dillard is no longer part of the Network Marketing/MLM industry. I would also like to mention that although the Kindle/hardcover edition of this book was first published in 2014 on Amazon, Mike used and sold magnetic sponsorship already as a brochure and in a manual-version of the study nearly a decade earlier. Then he was a pioneer who brought and applied these ideas and concepts to the mlem industry long before anyone else. The bigger and stronger the world and the internet become, the more effective magnetic sponsorship strategies are. Find the methods that are misguided in accordance with you and your personality. Only then will you get the results you want. After six years of failure, I came across the marketing wisdom I'm going to teach you today in this book. Within 18 months, I went from broken tables and waited to make my first million dollars. My work has been taken away, snatched and emulated for ten years. He created dozens of other guru networks that you've heard of, essentially rewriting and reordering what they've learned here. How to become a hunt, instead of the Hunter, how do you get people to connect and hunt you down? Essentially, we find it difficult to find other people attractive or unattractive based on the level of value they offer because we gain some of their strength/value through association. People don't join a business; they join the SS. Challenging your current views about yourself and acting like another person is scary but wonderfully rewarding activity. Increasing your value to others and taking the initiative to move from one group to another is what it is about personal development. If you can't fight first, how can you expect others to follow you? When you are an Alpha Networker, you offer value and perspectives automatically pursue a relationship with you so that they can share a little bit of that power and value. This business is 90 per cent mental and 10 per cent performance because when you're alpha (state of mind), everything else naturally and automatically flows towards you, and all past struggles and road blocks disappear. You need to truly increase your sense of self-esteem, and the best way to do this is to increase your value to the world by learning new skills. Through our free-market system, the world dictates how much money you make according to three factors: The number of people who are also able to perform certain work (competition) The number of skills or education needed to carry out the work (education) The number of people The world that your work benefits (leverage) My Magnetic Sponsorship courses teach people and small business owners how to sell and sell their products more efficiently online. People had no reason to join my team because I didn't have the unique value or skills to offer them. My big breakthrough finally came when I discovered that acquiring new skills is the only way to increase your value for others and for the world. After all this is said and done, Magnetic sponsorship and attraction generation is about one thing: Increasing your value to others and to the world. Alpha are valuable people. If you become more valuable to others, the more they will look for you. That's the secret to becoming magnetic. How do you personally bring them value? Can you teach them how to advertise and generate leads? Are you on the phone during three-way calls? Can you handle the killer encounters? Without exception, those with the largest bank accounts also have the largest personal libraries and do not stop studying when they reach their goal. Ultimately, success in this industry comes down to two things: becoming a leader of others by increasing your value. Acquire the ability to express its value to the world through marketing. You Inc. - How to create a real business with Zero Competition You turn yourself into a business. You built T Inc. The skills you have acquired to serve the needs of others or solve their problems and the relationships you build by providing your value to the world become a real commodity that can be traded for money. My knowledge, leadership and marketing experience have become my product. The network marketing company I chose to promote among the people on my distribution channel has become an offer in Mike Dillard Inc.'s overall business model. As someone who gives value and leadership in the first place, you stand out as an island of common sense. You become a voice of reason and a trusted jungle adviser full of pitfalls and false promises. The business model I used to make over \$50 million Now that you understand why attraction marketing works and the advantages of building a Business You Inc. let's start discussing the basic skill you'll need to make money in this business or any other business: marketing. I think everything outside of you will determine the end result in your business and your life is ignorant If they will realize that this is the skill and knowledge of the person waving the forging, not the company or the compensation plan. The money's not in the product. It's in your ability to move (market) this product. Understand that this business is all about marketing! When you do this business right, you don't have to sell. When you do this business correctly, you do not have to ask people to join your They're asking you! When doing this business correctly, you do not need to post work at home leaflets on car windows. When you do this right, people pay you to prescribe them. When you do this business correctly, you and your team members quickly make cash, even from people who don't join your organization. I became an insatiable marketing student because I prefer to have my system selling my product, filling out my list and bringing me people 24/7, everything on my prospectus. Network Marketing is a marketing and advertising industry pursued by people who have no idea how to advertise or advertise. The money's not in the product. It's about knowing how to sell the product. Boiled to its most basic element, the system is nothing more than a standardized set of tools and instructions. No one who didn't buy a probe actually wanted to get into it. They wanted a hole. Therefore, if you want to sell workouts, you need to advertise information about making holes - NO TRAINING INFORMATION! Perry Marshall This look changed the way I watched sales and marketing forever because this is the moment I realized that people don't buy our products because they wanted our products. They bought our products because they wanted the final results they would provide. True, effective, long-term marketing practices are based on one thing... Creating trust. Specifically, marketing is the process of turning strangers into friends, friends into customers for the first time and for the first time customers into lifelong customers. Think of marketing as dating. The professional has a marketing pipeline that will continuously build trust and understanding with Suzy for weeks and months automatically until she is ready to say yes. The amateur has long forgotten about Susie and is still raising for dollars. The miracle of building a business in the age of the Internet is that it allows one person from the home computer to build a massive, global, virtual distribution channel. My goal as a business owner is to build an ever-expanding distribution channel. At the end of the day, your business is your LIST. There's only one way to build a real list: Earn your reader's attention the old-fashioned way by providing value. My focus has changed from selling my mlm opportunity, to building a distribution channel (or as we call it from that point forward, list). In its simplest form, my business model can be summarized this way: Build a list. To build a relationship with the people on this list. The market is on the list. My personal notes cover only the beginning and a very small part of Mike Dillard's book Magnetic Sponsorship. I barely scratched myself on the surface of this book... So if you like what you read, please consider buying amazon magnetic sponsorship. Thank you for reading and stay great! Your Online Business Dude Tim Tim
