Guide) to the IIBA ebook Kindle's to be real: 2020 is a nightmare. Between the political turmoil and the new coronavirus (COVID-19) pandemic, it is difficult to look back on the year and find something that had the potential to be a bright spot in an otherwise stormy journey through the sun. Fortunately, there were some bright spots: namely, some of the great works of military history and analysis, fiction and non-fiction, novels and graphic novels that we've absorbed over the past year. Here is a short list of some of the best books we read here at Task & Purpose in the last year. Do you have your recommendation? Send an e-mail message to jared@taskandpurpose.com. Com and we'll include their future story. Phil Klay's missionaries loved Phil Klay's first book Relocation (which won the National Book Award), so missionaries were very important in my list of must-reads when it came out in October. It took Klay six years to research and write a book that follows four characters in Colombia who come together in the shadow of our post-9/11 wars. As Klay's prophetic novel shows, machine technology, drones, and targeted killings that were built on the Middle East battlefield will continue to grow in far-flung lands that rarely garner headlines. [Buy]- Paul Szoldra, editor-in-chiefbattle Born: Lapis Lazuli with Max UriarteWritten by Terminal Lance author Maximilian Uriarte, this full-length graphic novel follows the Marine Infantry Squad on a bloody odyssey through a mountain reaching northern Afghanistan. The full color comic is essentially a Conan barbarian in MARPAT. [Buy] – James Clark, senior reporterAliators with Alex KershawNow in a gritty and gloomy animated World War II miniseries from Netflix, Liberators followed by 157. Infantry Battalion 45th Division from the beaches of Sicily to the Italian mountains and the Battle of Anzio, then to France and later to Bavaria for some of the bloodiest urban battles in the conflict before ending with the release of dachau concentration camp. It's a harrowing story, but one worth reading before enjoying the acclaimed Netflix series. [Buy] – Jared Keller, Deputy EditorThe Only Plane in the Sky: Oral History 9/11 with Garrett Graffif you haven't gotten this must-read into the September 11 attacks, you need to just plane the sky at the top of your Christmas list. Graff skillfully explains the time that day through repeated narratives of those who lived in it, including loved ones of those who had been lost, the constantly brave first responders who were on the ground in New York, and service members working for the Pentagon. My only suggestion is not to read it in public – if you do something like me, you will be consistently left in tears. [Buy]- Haley Britzky, Army reporterSharing body: Making and unmaking of the world with Elaine ScarryAlways do we even fight wars? Wouldn't a massive tennis tournament be a nicer way for countries to settle their differences? This is one of the many questions Harvard Professor Elaine Scarry attempts answer, as well as why nuclear war is akin to torture, why the language around the war is being sterilised into public discourse, and why both war and torture do not carry out human worlds, destroying access to language. It's a great elevator to read, but even if you just read the second chapter (like I did), you'll come away thinking about the war in new and refreshing ways. [Buy] - David Roza, Air Force reporterStalingrad: The Fateful Siege: 1942-1943 by Antony BeevorStalingrad takes readers all the way from the Nazi invasion of the Soviet Union to the collapse of the 6th Army in Stalingrad in February 1943. This gives you perspective of German and Soviet soldiers during the most apocalyptic battle of the 20th century. [Buy] – Jeff Schogol, Pentagon correspondent for America's War in the Greater Middle East, andrew J. BacevichI took America's war to the Greater Middle East earlier this year and couldn't put it down. Published in 2016 by Andrew Bacevich, a historian and retired army officer who served in Vietnam, the book unravels the long and winding history of how America got so entangled in the Middle East and shows that we've been fighting one long war since the 1980s – with errors of judgment from political leaders on both sides of the aisle guilty. From the end of World War II to the end of the 1980s, virtually no American soldiers were killed in action while serving in the Greater Middle East. Since the 1990s, virtually no American soldiers have been killed in action anywhere else. What caused this shift? book jacket asks. As Bacevich details in this final history, the mission creep of our Vietnam experience has played out time and time again over the last 30 years, with disastrous results. [Buy]- Paul Szoldra, editor-in-chiefburn In: Novel of the Real Robotic Revolution by ARP Singer and August ColeIn Burn In, Singer and Cole take readers on a journey into an unknown date in the future, in which an FBI agent is looking for a high-tech terrorist in Washington, D.C. Set after the authors called the real robot revolution, Agent Lara Keegan has teamed up with a robot that is less terminator and a more useful and highly intelligent law enforcement tool. Perhaps the most interesting part: Just about everything that happens in the story can be traced back to the technologies that are being explored today. You can read the Task & Purpose interview with the authors here. [Buy] - James Clark, Senior ReporterSAS: Rogue Heroes by Ben MacIntyreLike WWII? Like a group of eccentric daredevils wreaking havoc on fascists? Then you'll love SAS: Rogue Heroes, which repeatedly tells some truly insane heists out in one of the first modern special forces units. Best of all, Ben MacIntyre due to his history of compassion, a balanced tone that shows both the best and worst of the SAS men who are, like anyone else, just human after all. [Buy]- David Air Force reporterThe Alice Network's Kate QuinnThe Alice Network is a gripping novel that follows two brave women in different periods of time – one living after World War II, determined to find out what happened to someone she loves, and others working in a secret network of spies behind enemy lines during World War I. This gripping historical fiction is based on the true story of a network that infiltrated the German line in France during the Great War and weaves a story so packed full of drama, ignorance, and tragedy that you won't be able to put it down. [Buy] Katherine Rondina, Anchor BooksS as I published a new book this year, I've answered questions about my inspirations. That said, I've been thinking about and so grateful for the girl in a flammable skirt with Aimee Bender. I can't credit it with making me want to be a writer – that desire was already there – but it inspired me to write stories where fantastic complicates the conventional, and impossible becomes possible. Girl nice dress without anyone to appreciate it. An unremarkable boy with a considerable knack for finding things. The stories in this book taught me that the everyday ness of my world could become magical and strange, and in this strangeness I could find a new kind of truth. Diane Cook is the author of the novel The New Wilderness, which was long listed for the 2020 Booker Prize, and a story collection for Man V. Nature, who was a finalist for the Guardian First Book Award, The Faithful Book Award, the PEN/Hemingway Award, and the Los Angeles Times Award for First Fiction. Read the excerpt from The New Wilderness.Bill Johnston, University of California Press I've revisited many old favorites in this dismal year of fear and isolation, and is most grateful for the collected poems by Frank O'Hara. Witty, reflexive, intimate, queer, disarmingly casual and monumentally serious all at once, they've been a constant balm and inspiration. The only thing to do is simply continue, he wrote, Adieu to Norman, Bon Jour to Joan and Jean-Paul; is that simple/yes, it's simple because it's the only thing you can do/yes you can because it's the only thing to do. Helen Macdonald is a natural essayist in a semiregular column in the New York Times Magazine. Her latest novel, Vesper Flights, is a collection of her best-loved essays, and her debut book, H Is a Hawk, won the Samuel Johnson Award for nonfiction and the Costa Book Award, and was a finalist for the National Book Critics Circle Award and kirkus award for Nonfiction.Andrea Scher, Scholastic Press This year, I'm so grateful for you should see me crown with Leah Johnson. Reading – like everything else – is a struggle for me in 2020. It's tough to let go of all my concerns about the state of the world and our country and get swept away by the story. But you should see me the Crown pulled me in right away; for the blissful time that I was reading, it made me think about the world outside of 2020 and it made me smile from ear to ear. Joy is hard to come by this year and I am so grateful for this book for the joy it brought to me. Jasmine Guillory is the New York Times bestselling author of five romance novels, including this year's batch two. Her work has appeared in O, Oprah Magazine, Cosmopolitan, Real Simple, and Time.Nelson Fitch, Random House Last year, stuck in a lengthy reading rut that left me wondering if I even liked the books anymore, I stumbled across the tenth december george saunders, a collection of stories Saunders wrote between 1995 and 2012 that have turns funny, moving, startling, weird, profound, and often all these things at the same time. As a writer, what I crave the most from books is finding one so magnificent it makes me feel like I'd be better off quitting – and so wonderful that it reminds me of what it's just for the reader again, encountering new worlds and discoveries every time I turn the page. The tenth of December is that, and I'm so grateful that it fell high on the shelf and in my life. Veronica Roth is the #1 New York Times bestselling author of the Divergent series and carve Mark Duology. Her latest novel, Chosen, is her first novel for Adults. Read the excerpt from the chosen Ones.Ian Byers-Gamber, Blazevox Books Waking today, the prospect of a few hours spent reading away part of another day of this disastrous, nightmare pandemic year, I am very grateful for the book in my hands, alone full of gratitude for the life spent reading: Gloria Frym's How Proust Ruined My Life. Frym's essays – the prompts of Marcel Proust, yes, and Walt Whitman, and Lucia Berlin, but also mint stick candies and Allen Ginsburg, among other proustian memories – restore me to my sense of my fearsome luck at the life spent rushing to the next book, the next page, the next word. Jonathan Lethem is the author of several critically acclaimed novels, including Fortress Loneliness and National Book Critics Circle Award winner Motherless Brooklyn. His latest novel, Arrest, is a postapocalyptic story about two brothers and sisters, a man who came between them, and a nuclear powered super car. David Heska Wanbli Weiden, Riverhead I am incredibly grateful for the great heartbeat of the injured knee by David Treuer. This book – a memanga of history, memoir, and reportage – is the reconceptualization of Native life that has been urgently needed since the last great indigenous history, Dee Brown's Bury My Heart at the Wounded Road. It is instantly counternarrative and a substitute for Brown's book, and it rejects the standard story of native victimization, and defeat. Even though I teach Native American studies to college students, I found new insights and discoveries in almost every chapter. Not only is the great read, the book is a huge contribution to Native American - and American - intellectual and cultural history. David Heska Wanbli Weiden, a admitted member of the Sicangu Lakota Nation, is the author of the new Winter Counts, which is buzzfeed book club's November pick. He is also the author of the children's book Spotted Tail, which won the 2020 Spur Award from Western Writers of America. Read an excerpt from Winter Counts.Valerie Mosley, TordotcomIn 2020, I'm lucky to finish one book in 30 days, but I burned down with this 507-page brick span weekend. Harrow's ninth reminded me that even when absolutely everything is terrible, it is still possible to feel deep, gratifying, brain-buzzing admiration for brilliant art. Thank you, Harrow, because it is one of the brightest places in a dark year and for keeping the house fires burning. Casey McQuiston is the New York Times bestselling author of Red, White & Royal Blue, and her next book, One Last Stop, comes out in 2021. I'm grateful for VS Naipaul's troubling masterpiece, Bend the River – which not only made me see the world again, but made me see what literature could do. It is a book that is lucid enough to reveal the brutality of the power-building of our world and its politics; however emotional enough to penetrate the most recondite secrets of the human interior. A book with great beauty without mercy. Opposites that continue to build their deeper sense of how much a writer can actually accomplish marriage. Ayad Akhtar is a writer and playwright, and his latest novel, Homeland Elegies, is about an American son and his immigrant father looking to belong to the post-9/11 country. He is the winner of the Pulitzer Prize for Drama and The Prize in Literature from the American Academy of Arts and Letters. Vanessa German, Feminist Press I'm most grateful for daddy Was Number Runner by Louise Meriwether. This is a YA book in Harlem in the 1930s, and it was the first Black-girl-coming-of-age book I ever read, the first time I ever saw myself in a book. I appreciate how it expanded my world and my understanding that books can talk to you exactly where you are and take you on a journey at the same time. Deesha Philyaw's debut short story collection, Secret Lives in Church Ladies, was a finalist for the 2020 National Book Award for Fiction. She is also co-author of Co-Parenting 101: Helping Your Kids Thrive in Two Households After Divorce, written in collaboration with her ex-husband. Philyaw's writing about race, parenting, gender and culture has appeared in the New York Times, The Washington Post, McSweeney's, Rumpus, and elsewhere. Read the story from Secret Lives Church ladies.Philippa Gedge, Ww Norton & Company As both a writer and reader I am very grateful for Patricia Highsmith's plotting and writing temporary fiction. As a writer I am grateful for Highsmith's generosity with her wisdom and experience: She speaks to us through how to tease out narrative strands and develop character, how to know when things are going wrong, even how to decide to give things up as a bad job. She is unabashed about sharing her failures, and in my experience, there's nothing more exhilarating about the writer than learning that our literary gods are mortal! As a reader, it provides a fascinating insight into the genesis of one of my favorite novels of all time – The Talented Mr. Ripley, as well as the rest of her brilliant oeuvre. And because it's Highsmith, it's so much more than just a how-to guide: It's very engaging and, while available, also provides insight into the mind of genius. I've read it twice – working on each of my thrillers, Hunting Party and Guest List – and I know I'll be returning a well thumbed copy to my shelf again soon soon! Lucy Foley is the New York Times bestselling author of thriller Guest List and Hunting Party. She has also written two historical fiction novels and previously worked in the publishing industry as a fiction editor. The book I'm most grateful for this year is a three-book series titled Tales from the Gas Station by Jack Townsend. Walking a fine line between comedy and horror (which is much harder than people think), books follow Jack, an employee at a gas station, who doesn't name a city where all sorts of horrifyingly fantastic things happen. And while the monsters are scary and more than a bit funny, it's Jack's bone-dry narrative, along with his best friend/emotional support of people, Jerry, who elevates books into something that's as nice as they are absurd. T.J. Klune is lambda Literary Award-winning author and ex-claims examiner for the insurance company. His novels include House with Cerulean Sea and Extraordinaries.Sylvernus Darku (Team Black Image Studio), Ayebia Clarke Publishing Nervous Conditions is a book that I have read several times over the years, including this year. The novel covers gender and racial themes, and at its heart is Tambu, a young girl in 1960s Rhodesia committed to getting an education and creating a better life for herself. Dangarembga's prose is evocative and witty, and the story is thoughtfully provoking. I've been inspired to reinvent Tambu every time I've read this book. Peace Adzo Medie is a senior lecturer in women's and international politics at the University of Bristol. She is the author of Global Norms and Local Action: Campaigning to End Violence Against Women in Africa (Oxford University Press, 2020). Ihs Wife is her debut novel. Jenna Maurice, HarperCollins Book Am I Most Grateful for? Where the sidewalk ends with Shel Silverstein. My mother and father would read me poems from it before going to bed – I'm sure that infused me not only with a sense of poetic rhythm, but also a vry sense of humor. Victoria V.E. Schwab is the bestselling author of more than a dozen books, including the Vicious, Shades of Magic series, and does savage song. Her latest novel, The Invisible Life of Addie LaRue, is the BuzzFeed Book Club's December pick. Read an excerpt from Addie LaRue's Invisible Life. Meg Vázquez, Square FishMans childhood best friend gave me a troubling Star with Madeleine L'Engle on Hanukkah when I was 11 years old and it's still my favorite book of all time. I love how it ignores the genre (it's a political thriller/YA romance that involves a lot of scientific research as well as poetry?), and how it values smartness, gutsiness, vulnerability, kindness, and a sense of adventure. The book follows 16-year-old Vicky Austin's life-altering trip to Antarctica; her journey changed my life, too. In a year when safe travel is almost impossible, I am so grateful to be able to return to my story over and over again. Kate Stayman-London's debut novel, One to Watch, is about a plus-size blogger who has been asked to star in a bachelorette-like reality show. Stayman-London served as the lead digital writer for Hillary Rodham Clinton's 2016 presidential campaign and has written about notable figures from former President Obama and Malala Yousafzai to Anna Wintour and Cher.Katharine McGee is grateful for the Redwall series brian Jacques. Chris Bailey Photography, Firebird I'm grateful for Redwall's book by Brian Jacques. I found a series in elementary school, and it sparked a love of great, epic stories that never left me. (If you read my books, you know I can't resist a wide cast of characters!) I used to read books aloud to my younger sister using funny voices for all narrators. Now that I have a little boy of my own, I can't wait to one day share Redwall with him. Katharine McGee is the New York Times bestselling author of the American Royals and its sequel, Majesty. She is also the author of the Thousandth Floor trilogy. Beth Gwinn, Time-Life Books I'm grateful most for the books that take me out of the world and back again, and while I have a painful choice between them, here's one early and one late: Zen Cho's Black Water Sister, coming out in 2021, but I devoured just two days ago, and the long out-of-print Wizards and Witches volume time-life enchanted World series, which is where I first read about the legend scholomance. Naomi Novik is the New York Times bestselling author of The Nebula Award winning novel Get Away, Spinning Silver, and the nine-volume Temeraire series. Her the novel, Deadly Education, is the first Scholomance trilogy. Christina Lauren is grateful for the Twilight series by Stephenie Meyer. Christina Lauren, Little, Brown and CompanyWe are grateful for the Twilight series for about a million reasons, not least of which it brought the two of us together. Writing fanfic is a place where we could be silly and dirty together taught us that we don't have to be perfect, but there's no harm in trying to get better with every attempt. It also cemented us that the best relationships are the ones in which you can be your real, authentic self, even if you're struggling to do things you never thought you'd be brave enough to try. Twilight brought millions of readers back to the fold and inspired hundreds of romance authors. We really thank Stephenie Meyer every day for the gift twilight and fandom it created.
