The program is endowed with a huge number of useful features, easy to use and will help to provide you with a comfortable gameplay. Just download the app and enjoy voice communication. About the app Among fans of games, in which the multiplayer mode is available, this application would be a frenzied success, how it allows users to voice communication right during the game. The program has already managed to prove itself on the good side during the PC version, now it's the turn of the Android version to make the life of gamers much more convenient. What is the principle of the program? If you haven't used these apps before, you'll explain that these apps work on Skype, you play games, and you can hear the voices of users who are connected to the same channel as you. Such programs help players coordinate their actions during the game or simply gameplay by communication. Manage with TeamSpeak 3 you can connect to multiple servers. You can also exchange text messages during the gameplay. You can control the microphone in one click, just click on the button or use voice inclusion. You can also browse other users' channels and easily manage your contact details. If desired, each app user can receive notifications about the change in the status of other teammates. Graphics and sound One of the main drawbacks of the application is that it is not currently translated into Russian. Therefore, most users may have trouble translating some of the main items. Let's hope that in the near future developers will solve this problem and eliminate other errors that occur while using the application. Well, in general, as for android application, TeamSpeak 3 is a very decent program, which in the future will be able to take a leading position among the programs of its genre.
