Microscope labeling worksheet

Go to the Mac App Store to buy and download apps. Plan your visits to New York, Los Angeles, Berlin, London and Paris with a custom map. Find the best shows, map your route and go! FEATURES• Finding artists and galleries or browsing the neighborhood. • View exhibition pictures. • You always have the latest information about the exhibition and press releases available. • Follow the openings and exhibitions that are closing soon so you will never miss an important exhibition. In addition: watches, website and contact information for each gallery. • Share exhibitions with friends via email, text and social media. • See the editor's choice for popular exhibitions, recommendations under the radar, and critically acclaimed shows. • Book your visits to participating galleries with see See Saw Seaments. I love See Saw. This is a great way to keep track of exhibitions and navigate efficiently with the map feature. Most artists use it. Otherwise, with so many galleries, it's easy to miss things. The breakdown of shows by neighborhood and editors' choices is also very useful. Much-needed application! It makes it easy to decide where to visit. I'd like to see another view besides the list view where you can scroll only/mostly through pictures (as section shown) for all other galleries. Always easy to use and updated. It brings pleasure, is simple and clever, and increases the amount of art that I see. What could have been better? See Saw -• Book your visits to participating galleries with See Saw Meeting. ;See Saw - Gallery Guide(-0)ŽŽa – Gallery Guide(1)je Saw - Gallery Today in Gagosian. The show starts tomorrow without a go. It's a great app. I recently visited NYC to explore contemporary art. You came on my trip. It's a wonderful resource, even if you're not in town. Happy birthday. It makes it easy to decide where to visit. I'd like to see another view besides the list view where you can scroll only/mostly through pictures (as section shown) for all other galleries. So much for this is great – so far it seems to be the best resource for finding artists on display and gallery shows in the city. I want to see this app improve a little and eventually expand and succeed. Some improvements would make it indispensable: 1) Allowing a swipe through gallery art/artist shows. Now you need to go back to the gallery and continue with the next one, which can be a daunting time. You'd better pull until you see the artist of the work you're interested in instead of the name of the gallery. (as available). If it's monetization, there are creative [and probably more lucrative] ways to do it without interfering with the experience at all. 2) Zoom in on the images and see it in more detail. A tiny square in a huge gallery doesn't really help to show the work of many artists – just gallery space. 3) You might want to drag recent tagged location images from shows via Instagram. Some future options may be somewhat algorithmically designed perhaps you like related artists based on certain criteria, such as medium, technique, movement, etc. (although they could become ailing or esoteric quickly, if not simple parameters). Some future options could be on the list of art schools + university shows, stretch a little into performance art, dance, or create suggested shows based on similar criteria etc. Thumb up! When I visit NYC, I can get a pulse on what's going on in town! Much needed and helpful here in Venice for the Biennale! I like this application, very clean, thorough and excellent layout with simple instructions via the map. I recommend it to anyone interested in seeing good exhibitions of contemporary art. Absolutely necessary application for each gallery crawls. Simple, easy to use and complete with all the galleries presented. Thank you so much for doing what no one else seemed to do. That's a great design. That's a great idea. He's a great person to lead. So easy to use, and make your own list and map. They have used it on several NYC gallery visits, and it is accurate and works well on cell service. One fine addition would be to sort exotova according to the completion date. Just perfect! Here's my update: See Saw got back to me right right they are going to add my suggestions, some of the galleries I was mistaken and listed where. It seems like they are working on improving this app, so I'll give them a rating of 4 stars because this is a work in progress. ☺ I want to love her. However, it depends on whether the app designer visited the gallery. There are so many missing galleries. Simple. It's the only gallery app you need. I've been waiting so long for this app. Serious. Clear. Effective. Well-cured and still covers a lot of ground. The presence of a press release for broadcasts makes all the difference. Don't wait. Just take it and go see the shows in person! It's kind of 📍📍📍📍📍S the best app I've found in the App Store to navigate through galleries in the city. Good work I use a lot ☺ This app is a quick way to plan a busy gallery days. This is a life-saving life, and I recommended it to many colleagues. The only thing that's wrong isn't enough galleries in their lists. Otherwise wonderful. And the map is amazing! All appreciate the app, the best out there. This is the best app to determine which shows to see in NYC. Highly recommended! Much needed, almost flawless, and increasingly improving! O wonderful and much needed use to improve culture and knowledge in the art world. Must have a device for you! A fantastic app for NYC Art Lovers! Tho is a view of the map app makes planning gallery visits so easy. Thanks! I just want thumbnail views to be available in other categories outside of Discover. Finally, an app that got it right! So pure and to the point. Thanks. The app is great, but I want to save what shows I saw! A necessary tool for navigating the art world in NYC. This app would be exceptional if you simply provided an interactive map, but see Saw take it a step further, including press releases and images of each exhibition that are displayed. A great way to preview what you want to see and discover new shows, spaces and artists. It not only provides you with a press release and installation of exhibition clips, it also allows you to add shows that you want to see on the map, so when you're navigating the zone you know which streets you need to go to et al. I like this app. Recommend it to all art lovers and people in this area! For me this is the best app to know what NYC's art world is up to. Thumb for NYC map that accompanies all your saved exhibitions. What can I say: I like it. Thanks. It's a great application. Improvements can include sharing a list with friends so they can see on your device, as well as a way to save or send lists in email to track what you've seen over a long period of gallery visits. Incredibly useful in tracking openings and exhibitions, both around the city and in certain neighborhoods in particular. I wish there was an easier way to store things on an iCal phone, and besides, it's an incredibly useful app. I'm an artist and this app makes me see more art and that should make me a better artist. interface. I would like to see it perhaps include more spaces and museums and allow the user to provide certain premises were not interested in. She just dried me. If you're in gallery openings, this is an app to get! Also, author Patrick responds very much to all your concerns. App materials to rebli app responsibilities and some comments from apple app store website, ownership of Apple and original author; Update Update
