It's a free online image filter that allows you to add custom resizable text to your pictures. It works in HTML5 canvas, so images are created instantly on your own device. Most commonly, people use the generator to add text captions to established memes, so technically it's more of a captioner meme than a meme filter. However, you can also upload your own images as templates. can I customize my meme? You can move and resize text boxes by dragging them. If you're sitting on a mobile device, you might need to check drag/drop enable first in the More Options section. You can customize the font color and the outline color next to where you type the text. You can further customize the font in the More Options section and also add additional text boxes. Imgflip supports all web and windows/mac fonts, including bold and italics, if installed on your device. You can also use any other font on your device. Note that Android and other mobile operating systems can support fewer fonts, unless you install them yourself. You can insert popular or custom stickers and other images, including trash hats, make-with-it sunglasses, speech bubbles, and more. Opacity and resizing are supported. You can rotate, flip, and crop all the templates you load. You can draw, outline, or scribble on memes by using the pane above the meme preview image. You can create meme chains of multiple vertically stacked images by adding new images with the setting below the current image. Can I use the generator for more than just memes? Yes! The Meme Generator is a flexible tool for many purposes. By uploading custom images and using all customizations, you can design many creative works, including posters, banners, advertisements, and other custom graphics. Why is there a watermark imgflip.com on my memes? The Imgflip watermark helps other people find out where the meme was created so they can make memes too! However, if you really want, you can remove our watermark from all the images you create, as well as remove ads and overload your image creation skills using Imgflip Pro or Imgflip Pro Basic. Can I make animated memes or video? Yes! The animated meme templates will appear when you search the Meme Generator above (try the party parrot). If you can't find the meme you want, browse all The GIF templates or upload and save your own animated template using GIF Do you have a crazy AI who can write memes for me? Funny you're asking. Why yes, we do.
