All requests for permission to earn donation points should be asked kristakahashi. The uploader is just providing it as a Special Edition port, with a variety of community bugfixes as permitted by the original permissions. Nothing more. Please always credit all relevant assets you use. Thank you! Most credit goes to kristakahashi and his amazing team. You can find a list of all the NPC (and their voices) over on the official 3DNPC wiki. You can find the original mod for more on Kris's original Skyrim LE Nexus page in THEPC. Original mod credits can be found under the spoiler below. Spoiler: ShowV O I C E A C T O R SSD voice actors list is amazing. There's too much to highlight, but without them this mod would be like one of the quiet movies that everyone thinks is so awesome now because they can be used as a functioning sleep aid. It's inexact science, but I have no problem taking credit for all that. After all, who is the one who cares and nourishes them, all but exhausting the occasional Fecal War? --->This Guy.<!-- Of course, there is also a great investment from higher primates as well, which I have credited below. Christian Gaughf - Griffith, MorriganJay33721 - Averna, IorelProgressive_Stupidity - OletteRoarian - Reliks (Dialogue and Quest) Ronja Monto - Alassea Idle Comment and Scenes with RosalindAdditional credit to Jay33721 for the inspiration behind Relic, Dagri'Lon, and Familiar, Progressive stupidity to promote some random NPC comments, and DOPR5 for writing tes variation on the old Knock Timbers pirate shanty. M D D D E R SRoarian scripted the first 3 quests and did all the programming voodoo while I twiddled my thumbs and played with dolls. Somehow, I managed to learn a bit of script on my own, so we'll see how it develops in the coming months. BarbasTheDog has also promoted script versions after 2.43.3, which effectively remove the follower comment when engaged in a conversation with another NPC. In this video, you can see the follower's quest unlocked when Avulstein is babbling, and come back as soon as he's done. Q U S T SInteresting NPCs started as a project to paint and live Skyrim. However, the early characters had quite modest creations – a direct result of their limitations with CK. Over time, as my modding skills have improved, these NPC have evolved into companions, spouses, and quest givers. However, as a product of this unusual development cycle, any search involving older NPC may require having met them in advance. Since I am still unable to create new lands, this may require clearing vanilla barriers to prevent conflicts. To help correct this, many of the innkeepers will provide notes directing you to Quest NPCs, which is harder to find. It will be called, you will be able to fulfill the prerequisites organically. This will create a lot of small quests whose sole purpose is to reach the NPC. Since the number of receipts has exceeded 50, the full list can be found here. The extra credit goes to Nicole Burns (blauwvis) to check the main questline and help me build a wiki. NoNoodles provided some invaluable assistance in conflicts and textures. Sifka, who handles the Japanese translation mod, has also signed up as an editor to help. Maligree has tirelessly made a search for the page wiki, something that has conquered many wiki editor before her. Inara has also now joined the wiki creation team and now with 2 wiki editors I truly feel like the luckiest man alive. This mod is not opted-in to receive Donation Points Page 2 Now every city, city and village of Skyrim is new respawnable, with its AI package and daily activities of NPC. They walk, sit, enter shops, temples/ hall of the dead, study, interact, work and so on. For lunch, but more often at night many of them fill pubs and taverns (all this without using scripts). More life for Skyrim! Long service life
