Friday October 16, 2020 Distance learning/internet learning and server update Fun Hey is all, so it's been a fun couple of weeks. :P for those who missed the latest steam update, the site has been completely recoded (not only for distance learning, but for some other updates soon). Which always represents minor errors and glitches. Which, I mean, it's never fun... but they are made much worse when the server continues to fail. So in the last 2 weeks to solve the problem I went through three servers, servers, hours of technical support and a couple of thousand. But I think now it's ... Can... I hope so... Ok. I'm still in the process of doing a bunch of updates and feature changes, but I think for the most part everything seems to be fine now. If you notice anything strange though, please let me know. Or, if you're thinking about something that needs to be added/changed/clarified, feel free to reach out. I plan to do a video tutorial for the distance learning section, I just have to find free time to do it. Hopefully shorter rather than later though. :) Robert Smith (Admin)CCSadmin@commoncoresheets.com - Great for online learning and distance learning!6th grade Maths COMMON CORE scores, warm-ups, problem maps, error analysis, homework practice sheets, problem solving graphic organizers, mazes, riddles, coloring activities, and guided NotesThis is a GROWING BUNDLE of all 6th class MATPage 2 No!
