Translation of a document submitted in the colloquium in honor of Reinhard Selten in Bonn, 27 January 1995. I hope that Reinhard Selten and I will be able to continue and complete the level of aspiration and limited ratification that began 30 years ago. Kreman , H. The theory of adapting to aspirations, which is not available in English before is a common model of non-optimization of infinitely rational behavior. The theory is presented in a more formal form than in the original work. In addition, the presentation is complemented by observations on decision-making resources as variable goals and how adapting to aspirations copes with uncertainty through variable risk-related goals. Finally, possible changes in the light of experimental evidence are being discussed. Copyright 1998 Academic Press. Volume 42, Issues 2-3, June 1998, Pages 191-214Watch the full text bounded rationality aspiration adaptation theory
