This app is only available in the App Store for iPhone and iPad. This is a program for converting image file formats to JPEG or PNG.!!! JPEG, JPG, PNG, GIF, BMP, TIFF, TGA, HEIF (.heic)- Images will be stored in the preinstalled Photos app. The albums named JPEG or PNG are created automatically.- Some printers do not support PNG image files. These images will be able to be printed by converting to JPEG files with this app.- Transparent color will be converted to White Color, when images saved as JPEG files because JPEG files do not support transparent color.- Supported source image formats :] JPEG, JPG] PNG] GIF BMP] TIFF] TGA HEIF (.heic) Sep 16, 2020 Version 14.0.0 I have been looking for an easy way o hidden these files for a long time. I'm glad I gave this app a shot, after trying a few that didn't work, I was ready to give up. It was so easy and fast. I didn't even have to log in or make an account. Just download, upload the pic and resell. It saves to your regular pic gallery. Super easy!!! I love it This app was really good. It helped me with a great situation I had a while ago. Definitely download this app if you need to convert an image. It's free and it actually works and so easy to use. There were almost no adds too. One is two can show up, but it never gets annoying or that repetitive. Omits the fact that once you have downloaded the program, give access to images, etc., select a picture Lo and see you are swept away to the website, asked to set up account and charged \$39 per month. This fact should be stated at the outset. Received a message asking me if I wanted to review the review I left. The noted pointed app is free. Sure, the app is free, but if you want to use the app then you have to pony up \$39-so no the app essentially isn't free, while it also requires a lot of personal information from you. Exploitative. This app is a free app. This app does not have a subscription. There are no in-app purchases for this app. You don't need to sign in to use this app. You can check by reinstalling this app. Also check out other apps. Developer Website App Support Privacy Policy Open the Mac App Store to buy and download apps. This is a very easy to use application to convert image file formats to JPEG/JPG or PNG. This simple app can save your hours of work with just a few taps. HEIF (.heic) also can be converted to JPEG / PNG. You can load/convert image formats below. JPEG, JPG, PNG, GIF, BMP, TIFF, TGA, HEIF (.heic)- Photos/Photos will be stored in the iOS Photos app. The album with the name PNG is created automatically.- Some printers do not support PNG image files. These images will be able to be printed by converting to JPEG files with this app.- Transparent Transparent converts to White Color when images saved as JPEG files because JPEG files do not support transparent color. We often update the app to improve performance. The design & user experience is just top notch. Stay in touch to receive all updates directly on your device. Feel free to ask any query about contact.apslab@gmail.com ! We would love to hear from you & appreciate your suggestions. So let's make your days a little brighter & great with Mirror App. Download & have fun. JPG PNG Converter Premium Subscription----- a-subscription plans- Weekly subscription-monthly subscription- annual subscription• Subscriptions can be managed by the user and automatic renewal may be turned off by going to the user's account settings after purchase• Any unused portion of a free trial, if offered, will be forfeited when the user purchases a subscription to that publication, where applicable• Subscriptions are automatically renewed unless they are turned off at least 24 hours before the end of the current period in account settings. Terms of Use: - Tons of photo editing tools- Awesome filters for photos- New subscriptions added- Bug fixes- Performance improvementsP.S. If you like this App, we would be so very grateful if you rated us. Ratings get reset with updates so every bit helps! This app works quite well to convert photos to other formats. I used to only convert to jpg's and I would say that the final product is about 90%-95% of the original quality. I paid \$5 so I could choose more photos, but the app crashes often, so if you choose no more than 26 photos in a relatively quick time, you should be good. Simply restart the app before doing it again. A little annoying, but no matter what. Hi Dear, Thank you for your valuable review. We will consider the problem you have mentioned and try to give you the best performance in the nearest feature and hope you will satisfy. ApsLab Team Very user-friendly app. Conversion is pretty easy. This app is absolutely disgusting. I needed to convert an image to JPG format and it didn't work no matter how many times I uploaded the image and I had to see all these ads to get through it all. And on top of that out, you guys decided to sell for 4.99 no ads. Seriously? This app deserves to be deleted from the database. Finally, the obvious reviews and people who placed this at 5 stars are not people who really changed their image file. No. It's people from your so-called company who wrote good reviews and rated this trash app 5 5 It has never earned over 4 stars. Absolutely disgusting how you guys cheated your way of pretending your app is good. Hi, Thanks for your request. It certainly converts images/photos to JPG/PNG. Simply select your photos from the library & tap Save. Your photos will be stored in your photo library in a new album called JPG PNG. You'll find the album from the Albums tab in your default photo app in iOS. Let us know if your problem is resolved. If it works, please give us a better review. If you are still not able to save the photo then you can mail us some screenshot of you problems to contact.apslab@gmail.com. Thanks. Stay in touch.- Team APSLAB App Support Privacy Policy Aug 31, 2020• Proven Solutions We often take photos of train tickets, restaurant bills and all other kinds of documents during the busy working day, but iPhones and iPads store them as JPEG files instead of PDF. There is no need to worry because both iPhones an iPads provide a lot of different tools that will allow you to convert JPEG or PNG files into PDF files. In this tutorial we will show you how to effortlessly turn your images into PDF files in just a few simple steps that do not require you to be a skilled photo editor. How to convert JPG/PNG image to PDF on an iPhone iPhones, iPads or iPods all offer a feature many people don't know that lets you convert image files to PDF format. Method 1: Convert photos to PDF with Apple's Photos app Before moving forward, it's important to note that you need an iOS 9.0 or later version of the iOS system installed on your device to convert images to PDF with the Photos app. Start the Photos app and tap the Select button to choose which images you want to include in your PDF. In the next step, click the Share icon, and then choose the Print option from the menu. You can use 3D Touch to tap a page thumbnail or zoom in on the thumbnail if your device doesn't have a 3D touch to create a PDF. Swipe the thumbnail to make sure the PDF you're creating looks the same as you want, and tap Share to complete the PDF creation process. You can also select the location where you want to save the newly created PDF. However, this method of creating PDFs will not allow you to select the page format, set a password to protect the document, or fine-tune the image compression. Method 2: Using Photo for PDF Converter Apps for iPhone iPhone owners in need of a more powerful tool to create PDFs should consider using some of the apps that are available on the App Store. Here are my three favorite PDF converters for iOS devices that allow you to create seamless PDFs from your iPhone photos. Converting images to PDFs or PDFs to PowerPoint, Microsoft Excel, or Microsoft Word files are made simple by Able2 Extract Extract You can import files into the app from your mobile device, Dropbox, email, or other storage space on the Web. PDFs that you convert to other file formats can be fully edited, and you can continue to work on them after the conversion is complete. However, if you would like to utilize the services of this app you must first buy it for \$9.99. Despite the fact that this app can be downloaded for free, unlocking all its features costs \$7.99. For pdf app lets its users turn web pages, emails and attachments, all types of photos and images into sharp, readable PDF documents that are ready to be printed or used as a digital file. The app also has an integrated scanner that can be used to create digital PDF copies of important documents. This PDF conversion allows users to produce PDFs from photos, HTML pages, or Word documents. The app supports a large number of file formats, making it a convenient choice for all iPhone owners who often have to convert different types of documents to PDF files. Although the File Conversion App can be downloaded for free, some in-app purchases may be needed to tap into the app's full potential. Potential.
