Integers Parallelogram area - Type 1 Base and height measurement is expressed as integers  $\leq 20$  in level 1 and  $\geq 10$  in level 2; Connect these values to a formula that is the base height to decide for the parallelogram area in this set of printed sheets for children of 5th and 6th grades. Two levels of difficulty with 3 sheets each Download set (6 sheets) Area Parallelograms Integers - Type 2 Repeat skills in finding the parallelogram area with these double-level area sheets involving prices. Multiply the baseline and high altitudes to calculate the parallelogram area. Each pdf sheet contains 9 problems presented in three different formats. Two levels of difficulty with 3 sheets each Download set (6 sheets) Area Parallelograms Decimal base indicators and height are expressed as decimal, find their product to calculate the area of parallelograms. Answer keys are also included. Two different types with 3 sheets each Download set (6 sheets) Area Parallelograms Fraction This set area of parallelogram sheets for high school specifically touches the base and height of the measures given as fractions. Replace the sizes in the formula and clean the area. Two different types with 3 sheets each Download set (6 sheets) Area Parallelograms Conversion Block Parallelogram dimensions are provided in different units. Convert the base and height units into the unit specified in the area, and then apply the formula to calculate the parallelogram area. Two different types with 3 sheets each Download set (6 sheets) Find the base or height of Parallelograms Integers These print area parallelogram sheets for Class 6 and Class 7 provide an area and either base or height as integers. Connect values in the parallelogram area solve for the missing dimension. Two levels of difficulty with 3 sheets each Download set (6 sheets) Sheets
