## Scheduling assistant outlook android

Email is one of the clients The problem appeared after the recent Windows/Office update, given, Will not be able to see the information. In case only one one can cause failure. In that case, repairing the account profile may resolve the problem. Launch Outlook, then click on the File menu. Now click on the account's drop-down button Then click on account settings again. In the Open Account SettingsNow email tab, select User Profile and then click Repair.Repair Account Profile after the repair process is complete, relaunch Outlook and check if free/busy information can be viewed. 11 | Create a new user profile failure to retrieve free/busy information due to corrupted/incorrect configuration of user profiles. In that case, deleting the current profile and creating a new one may resolve the problem. Note that by doing this, you will delete your Outlook profile completely, and you need to create a new one and reconfigure your connection. Exit Outlook. Click on the Windows key and in the search box, type the control panel. Then in the results displayed, click Control Panel. Open control panelchange category for large icons. Change category for large icons Again in the mail setup click mail.Open Mail in Control PanelNow, click show profile. Show profile in mail setup then select Outlook profile and click the Remove button to remove the current profile. Remove Outlook profile from mailthane add a new profile. Now open mail in the control panel (repeat 1-5 steps). Now in Mail, choose the newly created Outlook profile and always select the radio button to use this profile. Enable Always use this ProfileNow click on Apply and then on OK. Outlook.Hopefully you can now use the scheduling assistant without any problems. If not, use outlook web app (OWA). (OWA).
