RAR RELEASE VIDEO NARR CLOUD. MAIL.RU TELLER VIDEO DOWNLOAD FILE We bring to your attention the new version of Minecraft Bedrock 1.14.0.50 on Android (with xbox live running). The developers of mojang studio do not stop surprising us with their speed since minecraft version 1.14.0.50 for Android was released immediately after version 1.13.1.5. Overall, 17 new bugs were found fixed in this update. Many players already understand that the developers of mojang studio are preparing us for the release of the new version of Minecraft 1.14.0, and therefore are now working harder to release new updates with bug fixes that are more relevant to the new version of the minecraft 1.14.0.50 technical section. Let's see below what was fixed in the new update. Character Editor With the release of the new global update, which brought many innovations to the game, there was a new opportunity for players to edit their characters using the character editor. On many servers, players have started playing with unique and cool new looks. To increase productivity, the developers of the Mojang studio optimized the load during the creation of coatings. When the skin is used from the trading platform, the player model in Minecraft 1.14.0.50 is displayed correctly without having to restart the game. The same goes for the use of the function of wearing the coat. Fixed an issue where the player was unable to wear the cloak after entering the Character Editor. For example, as before, a player entering the game could the cloak only for the entire game session. After a while, players will re-play the game Must. As mentioned above, developers have optimized skin sizes in the font editor to avoid server delays. Character Editor Fixes: - Fix errors and crashes; – Equipment stationary on the market; - corrected mantle errors; – The mantle can be used when entering the character editor again; – Optimization of the coating. Bees, as everyone knows, die after a bee sting. But in version 1.14.0.3 of Minecraft, many players began to notice a problem, namely an error, that they could sting twice, when a bee was on a tasma. Developers considered this bug and it was fixed in the Minecraft BE 1.14.0.50 update. Buckets corrected bucket errors during the game. Fixed an error while animating drinking, buckets no longer produced drinking animations all the time. As you can imagine, the buckets were not empty. In the new Minecraft 1.14.0.50 update, the player can use the cow for milk again. In addition, players can use buckets of milk again to make a cake. Sugar cane Previously, when the water supply disappeared, the sugar cane broke. List of minor but important errors: - Fixed an error while switching from hub to Xbox game; - Fixed an error when entering the player's account on Xbox consoles; : Fixed an error that occurred earlier when opening the character editor; - When you download music from the market, no more errors are displayed. is not displayed.
