My suggestion on how to approach this game first is to just try out some text commands. Enter what you think would be a normal answer to the questions and comments you have asked and presented within the game. Type a command, and then press Enter on your keyboard to type it. You'll get an answer that makes sense to the story, something humorous, or an answer with a message like That I don't understand. Here are some commands that I find quite useful: INVENTORY - gives you a list of items you haveLOOK - describes your surroundings N - Moving you north (use S, E, etc. for other lawyers)DIAGNOSING - it tells you about your injuriesGET or TAKE - remove the item and add it to u inventoryREAD - Reads what is written on an item words with In next section below is this link of other Zork commands. You should be aware that there are many versions of this game online, so while some commands will work for one game, they may not work for another. One example can be seen with this game on iFiction in that you can not save and restore progress, although other versions of Zork on other sites can very well support these commands. If you get stuck a little bit while playing (which is perfectly acceptable given how different it is from other online games), I suggest you take a look at this Zork command list. I hope this will get you into the game. There are many commands to move in the game, as well as item commands such as drop, open, throw, get, etc., to interact with the things you encounter. If you really get stuck, look into the dawn walk. Don't ruin the party until you're stuck. I like it. I remember when the only type of computer games I had access was text adventures, so Zork brings back a lot of good memories. It's a fantastic story, too. There was some real thought and love in this game that manifested itself. But Zork is certainly not suitable for everyone, especially for anyone who is used to playing Games. With just text and therefore zero graphics, and the fact that you must then read through the game as always changing the book, it takes some extra effort to play as a visual game that requires only a few controls. However, by being said, maybe you can take a reas help from your regular style of games and see how much fun Zork can be. DOOM DOOM must be on the list. He's on every list. If Wolfenstein 3D opened the FPS port, DOOM marched through it and unloaded the BFG 9000 on everything. Since its release in 1993 as a nine-level, free shareware, it has reached about 20 million players in two years. Additional levels were sold on a postal order.
