The urbz sims in the city ps4

ssss The Sims is one of the largest franchises in PC games today and in recent years has gained popularity on consoles and PDAs. Basically, the goal of The Sims game has been to live the life of a virtual character, taking care of all their needs and desires. The Urbz: Sims of the city are basically more of the same concept except that the setting is in the big city. Not only does the franchise move into the city, but Maxis has tailored the game to suit Nintendo DS features. Facts and features: 26 places to visit, including an island exclusive to DS version 8 mini-games and creatable pets that fully benefit from the touch screen PDA-like interface for menus Get reputation with different clicks Build skill points and improve your Urb skill set Presentation The Urbz: Sims of the city presented in a fairly straight forward way. The action of the game takes place on the top screen and the menus are managed on the touch screen in a PDA-esque way. Learning to navigate the HANDHELD takes a few moments to master, but once you figure out the screens, this version of The Sims makes it the easiest navigable ever made. Not having to stop playing to go through menus is a nice feature, and calling up a map to map your location is as simple as two or three simple touches on the touchscreen. The setting of the game is the city of Miniopolis, a large city with a small community feel. While many will see the new setting as a welcome change for the series, others may find the setting unsuitable for the franchise. Personally, I really like the scenery chosen by Maxis. Gameplay The Urbz: Sims of the City plays much like The Sims: Bustin' Out which was released last year with an urban twist. After customizing your Sim you are thrust into the game pretty quickly. You find yourself as a janitor who loses his job and has to find a way to fend for himself. You'll make friends along the way and choose which clicks you identify with based on your actions and interactions with the people you encounter. If you favor the hip hop lifestyle, you most likely won't be well received by lawyers or office types found in Miniopolis (and show versa). You will attend to your Urbs needs such as hunger, hygiene, energy, social, comfort, blowing, fun, and space (cleanliness) as you complete the various missions given to you by the people you encounter. Some of these needs can become tedious and disrupt your current goals at seemingly the worst of times. For example, you often can't perform an important conversation with someone because your Urb is bored and wants to watch TV. This may require you to start a backtrack to your pad to watch TV only to return and discover that the person you were looking for has left. There is a way to make your needs happen at longer intervals, but early in game it can be somewhat frustrating. There are mini-games available all over Miniopolis that make good use of the DS touchscreen. Many of these mini-games will be your source of money (simoleons) that can be used to upgrade your lifestyle. Other mini-games involve creating a virtual pet that you can include pet shows if you want. Some of the mini-games are really fun while others just simply feel rushed. Because there is so much to do and so much to interact with in the game, you will find yourself playing for hours in addition to the missions that are given you to complete. Fans of the series will find plenty to enjoy with Urbz, but newcomers can be overcome by the boredom of trying to keep their Urb happy for the first few hours of play. Graphics and sound The visuals of Urbz really are nothing special, in fact they look mostly like a pretty Game Boy Advance game. Apparently making the launch schedule, Maxis reused the graphical engine created for the GBA version and just cleaned up a bit. The nice thing is that nothing looks ugly or sub-par. On its own it looks ok, but when put together with Super Mario 64 DS or Spider-Man 2, The Urbz didn't really stack up. The music in the game is pretty well done. The songs are mostly of an urban variety to fit the theme and they are effective most of the time. The sound effects are similar in quality to those found on the GBA version, which is somewhat discouraging considering the extra power available with the Nintendo DS. Some of the conversation sound effects can be annoying, but there is no denying a certain charm associated with the language spoken by Urbs. There are options to remove some sound effects though, so if you are particularly annoying to you, it can be turned off. Closing Comments Review a game like Urbz is tricky. There is so much to do and so much to experience that you may find yourself distracted from the details that support gameplay. When you take a good look at Urbz, there are many details that are well done, and there are some that just seem too basic for a system of DS's capabilities. If you've never had the Sims series before, The Urbz is definitely not going to be your thing. Mostly, this is just The Sims in an urban environment with a few extra elements. If you are one of the franchises, then you are likely to find plenty to enjoy with Maxi's latest effort. The Sims have moved to The City where there is always action and where reputation means everything. In Urbz: Sims in the city, you can go to work in places like Sushi Bar, Chop Shop or Bootleg Fireworks, Inc. Success at work provides promotions, access to new power socials and tools to influence your new lifestyle. Flaunt your attitude by styling your Urbz, and then cross the velvet ropes at an uptown nightclub, or explore the subway to earn new och föremål.
