## Philosophy of public health nursing

Public health nurses serve the community through programmes to improve health, educate the public, develop policies and advocate society. Nurses can be certified in the public health of nurses through the American Nursing Assessment Center. The authority awarded to qualified nurses is certified by Advanced Public Health Nurses. Nurses can qualify for certification in three ways. All three options require a current registered nurse license. The first way to qualify is to complete postgraduate studies in public or public health nurses from an accredited program. The second option is to obtain a bachelor's degree in nursing and a master's degree in public health. Finally, nurses may be eligible for a master's degree in nursing or related fields and 2,000 hours of practice in public or community health facilities. All hours must be completed within the last three years. If a master's degree is not a nursing diploma, a bachelor's degree must be in care to qualify. Submit your application online or by mail to an ANCC. Applications for APHN-BC are accepted all year round. The app asks for contact information and checks backgrounds and education. You must also submit a certification fee with the app. In 2013, the certification fee is \$395. Discounts are available to members of the American Nurses Association, the Public Health Section of the American Public Health Association, and the National Association of Clinical Nurses. The certification exam must be accepted within 90 days of application. The exam is based on a computer and includes 175 questions, 150 of which are counted in your final score. The test includes questions about advanced public health facilities, public health assessments and strategies to improve health and disease prevention. Nurses should also know theories of human development, epidemiology and biostatistics. Leadership and professionalism issues are also included. You must renew your certification every five years online or by mail. The current renewal fee since 2013 is \$350 with discounts available. To renew your certification, you must have a current RN license and complete two of the six categories of professional development: continuing education, academic credits, presentations, publications or research, prescription hours and professional service. Starting in 2014, all nurses must complete 75 hours of continuous education plus another category. Some states may have a mandatory or certification for public health nurses. For example, the state of California requires public health nurses to receive state certification by applying and a \$75 fee. California license requirements include a current California RN license, transcripts proving nursing education and at least seven hours of training in child abuse and neglect. Other Others have additional certification. For example, in Minnesota, any licensed nurse may work in public health, but must be certified to call herself a public health nurse. Nurses. Save. Lives.Even though our focus in hospitals is usually on doctors in white coats, it is nurses who actually spend most of their time with patients and who ensure that they get the care they need. Nurses do everything from changing IV lines and bedtime, to administering medications and monitoring patients' allergies. And often the attentive nurse can not only comfort the patient with pain a little extra, but also saves lives from their close attention to detail. The importance of this life-changing profession has prompted college Choice to rank Best Internet BSN Degrees! The advertising CollegeChoice.net is an advertising site. Recommended or reliable partner programs and all school searches, searches or match results are for schools that compensate us. This compensation does not affect our school rankings, directories or other editorial and independent information published on this site. Care frequently asked questions: What do nurses do? Care is an essential component of health care. Nurses examine patients, record vital signs, and take health histories. Nurses administer treatment and medication as prescribed by a doctor, as well as follow medications organized by hospital pharmacists. They help in childbirth and childbirth, surgery and breastfeeding. In an emergency, the nurse performs CPR to resuscitate her patient. These are just some of the tasks that a nurse performs, but for many nurses, the work is much more than that. It is a calling and a way of life. Life does not save itself, and when a patient is flat or a child writhes in pain someone needs to be there to help. These are the roles that nurses fill, and from which they get most of the motivation to work. How much money can you earn if you study nurses? The care sector is constantly expanding with high-demand patient care. The BLS forecasts rapid growth of 19% by 2020. America desperately needs caregivers. However, this does not necessarily mean there are many care opportunities where you live now. Demand is spread irregularly across the country. The plan is now for possible resettlement after graduation because shortages in some states will be acute by 2025.Becker's Hospital Review states that Arizona will need more than 28,000 more nurses, and North Carolina and Colorado each will short 13,000 nurses. Meanwhile, Ohio will have 75,000 more nurses than jobs. In terms of wages, California, Hawaii and Oregon have the most good registered nurses, with an average wage above \$90,000. And in terms of cost-wage balance, Nevada, Texas and Arizona offer the best ratios of average wages and cost of living. What nurses are available? Because the need for the demand for better quality of care is also growing. The Institute of Medicine's Future Nursing Reports Initiative for 80% of BSN-educated nursing staff in hospitals by 2020.Hospitals currently prefer or require the hiring of new nurses who already have this degree, according to AACN. RN-to-BSN is a profitable option to prepare you for more comprehensive patient care and career advancement. LPN completes the annual program with subsequent licensing. Community colleges and technical schools teach and train nursing students through hands-on training. Students must pass the NCLEX-PN Licensure exam to LPNs.To be a registered nurse, some students first get an associate degree in care. The associated program lasts two to three years. They can then take the NCLEX-RN test to become a registered Nurse.Some RNs who have already gone to community college later enroll in the RN's BSN (BS in Care) program so they can get a degree, improve their skills, and increase their pay prospects. Another popular way to get BSN out of a four year old school is then take NCLEX-RN. While RN is a license, BSN is a degree. In addition to knowing that you are saving lives, BSN also provides ample opportunities for promotion and high-paying positions. Compared to a nursing diploma or a law degree in nursing, people with a bachelor's degree in nursing have a salary of up to \$30,000 more, payscale reports. The third option to consider is RN to BSN for MSN track or dual BSN/MSN. MSN is a Master of Science in Nursing.With MSN Degrees, nurses can also obtain certificates to specialize in pediatrics, gerontology or other units. According to Nurse.org, there are several ways you can take on a satisfying career in care. Note: The American Association of Nursing Colleges wants all future APRNs to receive Doctor Nursing Practices (DNP), but there are no requirements. APRN, short for Advanced Practice Registered Nurse, needs a current nursing, postgraduate or postgraduate license, as well as a passing score for a certification exam. Certification must take place before the APRN designation is used. APRN is re-certified every two years, taking courses costing 40 CEUs (Continuing Education Groups). The Nursing Doctor's Degree (DNP) shows experience in the most complex aspects of care. DNPs have the opportunity to apply their research to improve health facilities and patient care. DNPs have an average annual salary of \$101,260.Nurse anesthesiologists complete one year of work experience prior admission to the anesthesiologist program. The American Council of Midwives Certification Licenses Certified (CNMs), Midwife nurses re-certify in 5-year step. CNM programs prefer to accept nurses for labor and delivery. Practitioner nurses have MSN or DNP, state license and certification. Certification, of many specialized organizations, such as the Pediatric Nursing Certification Board. APRNs with a doctor in the practice of care often perform research. Nurses can also become nursing instructors, another career with shortages like aging instructors to retire. They also go into pharmaceutical sales, medical writing, government policy consulting, and medical supply sales. Other under-the-field care include correctional (prisoner) care, telephone sorting, forensic care, surgical care, and dialysis. What are the specialties of care available? Level one of the nurses belongs to licensed practical nurses (LPNs). In some states they use the name Licensed Professional Nurse (or LVN). LPNs and LVNs operate under the guidance of a nurse or an oversight doctor. These nurses insert catheters, give patients medication and map out the patient's vital signs. LPNs/LVNs tend to wounds and feeding tubes, run intravenous lines, and perform CPR in emergency situations. The average salary for LPNs and LVNs is \$44,090. The Bureau of Labor Statistics (BLS) sees 117,300 new jobs for these nurses by 2024. This is 16 per cent higher than the current number of staff. The second level includes registered nurses (RNs). RK organizes patient care plans, operates medical equipment and records patients' medical histories. They monitor their patient and analyze diagnostic tests. RNs provide home care instructions after discharge. They perform in a team with the attending physician and other medical staff. Sixty-one percent of RS works in hospitals. The BLS expects 439,300 new RN positions to open by 2024. That's a 16 percent increase. Their average salary is \$68,450.Nurse anesthesiologists, nurse midwives and nurse practitioners fall under the umbrella term Advanced Practice of Registered Nurses or APRNs. Certified midwifery nurses (CNMs) carry out physical examinations, distribute birth control and treat expectant mothers. They advise women on health, childcare and pregnancy. Practitioners (NPs) act as primary care providers where doctors are scarce. NPs authorize tests and therapeutic treatment. Anesthesiologists administer anesthesia for surgery, childbirth and other procedures. The average salary of APRNs is \$107,460. By 2024, 53,400 new jobs will be created, a 31 percent increase. The care sector is constantly expanding with high-demand patient care. The BLS forecasts rapid growth of 19% by 2020. As the need for nurses increases, so does the demand for better quality care. Institute of Medicine of the Future Case reports initiative for 80% of BSN educated nursing staff in hospitals by 2020. Hospitals are now opting for or requiring the hiring of new nurses who already have this degree, according to AACN. RN-to-BSN is a profitable option to prepare you for more comprehensive patient care and career advancement. While RN is a license, BSN is a degree. In addition to that you save lives, BSN also provides ample opportunities for promotion and high-paying positions. Compared to a nursing diploma or a law degree in nursing, people with a bachelor's degree in nursing have a salary of up to \$30,000 more, payscale reports. The average salary of registered nurses with BSN is \$76,705. Many RN-to-BSN programs are now available for nurses to register while working full-time. With a wide range of RN-to-BSN programs out there, College Choice has compiled a ranking of the best online RN-K-BSN programs for added flexibility for those of you who can't commute to a physical college campus. Many colleges allow you to transfer ADN credits to count to your BSN. This way you can finish faster, especially when taking accelerated courses. We have also compiled a ranking of the most affordable online RN-to-BSN degree programs for the added benefit of cost reduction. When people think about hospital and health care, the first image that comes to mind is often a doctor in a white coat, making decisions and saving lives. But people often forget that these are actually nurses who provide the most direct care for patients, to the emergency room or just get your annual check-up. They help to provide patient care, educate patients and their families about their health status, and provide counselling and emotional support. The demanding and important nature of the work is one of the reasons for caring for such a promising area of work. Hospitals are constantly expanding and looking for new, well-trained nurses, so local jobs are projected to grow by 16% over the next decade (much faster than average). The BLS estimates that the average registered nurse earns nearly \$70,000 a year. College Choice has put together a diverse list of rankings that help students look at different aspects of nursing education. Students looking for a more traditional experience should look at the best school nurse students, while those looking for online programs should check out the Best Online BSN Degrees for 2017. And finally, students focusing more on affordability can look at the most affordable online BSN degrees. Care is a large and complex area, which means that it requires both general specialists and more highly qualified professionals. Nurses who pursue a master's degree are eligible to become Advanced Practice Registered Nurses who provide more specialized care than regular nurses. These specialized specialists perform a number of tasks and fill many rolls, with examples including anesthesiologists, midwives and nurse practitioners. These Advanced Practices nurses have one of the most interesting job market prospects of any profession. Employment prospects for the next decade promise a frantic increase in demand for workers by 31%. This area also offers highly competitive salaries, as Labor statistics estimate the average salary to be more than \$100,000/year for those in the field. College Choice has published a list of the best masters in nursing, which compiles our choices for the best nursing graduate programs in the country. College Choice has also compiled a list of the best online MSN programs, for students seeking less traditional alumni experiences. And finally, for students weighing affordability as one of their most important factors there is the most affordable online master's degree in nursing. As health care costs increase and health needs increase, nurse practitioners will continue to grow in importance. The shortage of doctors is an opportunity for advanced practice of registered nurses (APRNs), a class of nurses who have advanced training, and can prescribe medications and do other procedures traditionally reserved for doctors. These nurses must MSN or even occasional DNP (Doctor in Practice Care). Practising nurses, along with nurse anesthesiologists and nurse midwives (other APRNs), are very well paid. According to the BLS, these nurses make an average salary of \$107,460 a year. Over the next year, positions in this area are expected to grow by an astounding 31%, which the BLS considers much faster than average. Of the three APRNs mentioned here, nurse anesthesiologists have the highest average salary: \$160,270 per year. Interested in moving to best care practice? We have a few ratings to help you. Our list of the best nurse practitioner programs will give you an overview of the area. If you are interested in the flexibility of an online degree, then take a look at our ranking of the best online nurse practice programs. Both of these rankings are divided into MSN and DNP programs that both prepare you for best practice. And if you're concerned about the price, we also have a list of the most available online nurse practice degrees. Practitioner nurses are registered nurses who have a degree. Although this degree can take up to 5 years to complete, it is worth it for those who are passionate about helping others. Career opportunities usually include: Family NP, Adult Gerontology (Acute or Primary Care) NP, Mental Health NP, Pediatric (Acute or Primary Care) NP, and Women's Health NP. From nursing homes to hospitals, you will have a range of options after completing this prestigious degree. If stable employment is important to you, a career in care is perfect. In fact, the Bureau of Labor Statistics predicts a 31% rate of employment growth in this industry until 2026! Nurse practitioners can count not only on stable employment, but also on a rather impressive salary. BLS puts 2016 average salary for nurse practitioners on just a bit \$105,000 a year. It's not that bad! For those looking for a more flexible or affordable program, take a look at our ranking ranking Online DNP degrees. Our online list includes the same as Duke University, Georgetown University, and the University of South Carolina. College Choice also published a ranking of the best nurse practice degrees. For those in search of a more flexible or affordable program, take a look at our ranking of the best online DNP degrees. Our online list includes the same as
