Broadcastify is the world's largest source of radio flow scanners. Features in this app include: - NO advertising or pop-ups. Completely continuous listening. - Full access to the Broadcastify network of more than 6,500 police, fire/EMS, aviation, weather rail, marine and amateur radio streams - Search channels by name and location - Show channels close to your location - Favorite list - save your favorite channels for easy access, and then playback - Push notifications for major incidents - real-time updated stats for all streams - Lists for channels with alerts, new channels, and top 25 channels - Full access to up to 180 days of archives for Broadcastify Premium subscribers (Broadcastify Premium subscription required) App ChangeLog - Fixes for location-based services (channels near me) - Improving performance and updating App Screens devices Requires the following permissions for your Android devices. approximate location (based on network) allows the app to get an approximate location. This location was obtained by location services using network location sources such as cell towers and Wi-Fi. These location services should be enabled and available for your device to use them. Apps can use this to determine where you are. Accurate Location (GPS and Network) allows the app to obtain an exact location using the Global Positioning System (GPS) or network location sources such as cell towers and Wi-Fi. These location services should be enabled and available for your device to use them. Apps can use this to determine where you are and can consume extra battery power. Browsing network connections allows the app to view network connections, such as which networks exist and are connected. Viewing wi-fi connections allows the app to view Wi-Fi network information, such as whether Wi-Fi and the name of connected Wi-Fi devices are enabled. Full access to the network allows the app to create network outlets and use custom network protocols. The browser and other apps provide the tools to send data to the Internet, so this permission is not required to send data to the Internet. Read the state of the phone Allows you to read only access to the state's phone, including the device's phone number, current cellular network information, the status of any current calls, and a list of any PhoneAccounts registered on the device. Running when you start allowing the app to start working as soon as the system has finished downloading. This can make it take longer to start the phone and allow the app to slow down the shared phone, always working. Vibration control allows the app to control the vibrator. Prevent your phone from sleeping allows the app to prevent your phone from sleeping. Changing or deleting the contents of your SD card allows the app to write on an SD card. Getting data from the Internet allows apps to receive cloud messages to devices sent by the app service. Using this service will hang the use of data. Malware can lead to overuse of data. Reading google service configuration allows this app to read Google's service configuration data. Broadcastify is the largest source of the stream radio scanner in the world. Features of this app include: No ads or pop-ups. Listen completely continuously.
