Krebs received a B.A. in Biology from Bard College, Annandale-on-Hudson, New York, and a Ph.D. in Molecular and Cell Biology from the University of California, Berkeley. 祝 For her doctoral thesis, she studied the roles of dna topology and insulator elements in transcriptional regulation. She performed her postdoctoral education as an American Cancer Society Fellow at the University of Massachusetts Medical School in the laboratory of Dr. Craig Peterson, where she focused on the roles of histone acetylation and chromatin remodeling in transcription. In 2000, Dr. Krebs attended the Faculty of the Department of Biological Sciences at the University of Alaska, Anchorage, where she is now a full professor. Her recent research focus has been on the role of Williams syndrome transcription factor (one of the genes lost in the human neurodevelopmental syndrome of Williams syndrome) in early embryonic development in the frog *Xenopus*. She teaches courses in introductory biology, genetics and molecular biology for students, PhD students, and first-year medical students. She also teaches courses on molecular biology in cancer and epigenetics. While working in Anchorage, she lives in Portland, Oregon, with his wife and two sons, a dog and three cats. Her nonwork passions include hiking, gardening and molten glass work. Elliott S. Goldstein received his BS in Biology from the University of Hartford in Connecticut and his Ph.D. in genetics from the University of Minnesota, Department of Genetics and Cell Biology. After this, he was awarded a NIH Postdoctoral Fellowship to work with Dr. Sheldon Penman of the Massachusetts Institute of Technology. After leaving Boston, he attended the faculty of Arizona State University in Tempe, Arizona, where he is associate professor, Emeritus, in the cellular, molecular, and life sciences program in the School of Life Sciences and in the Honors disciplinary program. His research interests are in the field of molecular and developmental genetics of early embryogenesis in *Drosophila melanogaster*. In recent years he has focused on *Drosophila* counterparts to the human protooncogenes *jun* and *fos*. His primary teaching responsibility is in the undergraduate general genetics course as well as third-cycle molecular genetics course. Dr. Goldstein lives in Tempe with his wife, his high school They have three children and two grandchildren. He is a bookworm who loves to read as well as underwater photography. His pictures are on eliotg/. Stephen T. Kilpatrick received a BS in Biology from Eastern College (now Eastern University) in St. Davids, Pennsylvania, and a Ph.D. from the Program in Ecology and Evolutionary Biology at Brown University. His thesis research was an examination of the population genetics of interactions between mitochondrial and nuclear genomes of *Drosophila melanogaster*. Since 1995, Dr. Kilpatrick has taught at the University of Pittsburgh in Johnstown in Johnstown, Pennsylvania, where he is currently president of the Department of Biology. His regular teaching assignments include undergraduate courses in introductory biology for biology majors and advanced undergraduate courses in genetics (for both major and nursing students), evolution, and molecular genetics. He has also overseen a number of undergraduate research projects in evolutionary genetics. Dr Kilpatrick's great professional focus has been in biology training. He has participated in the development and writing of associated materials for several introductory biology, genetics, and molecular genetics texts and online educational review sites as well as writing articles for educational reference publications. For his classes at Pitt-Johnstown, Dr. Kilpatrick has developed many active learning exercises in initial biology, genetics and evolution. Dr Kilpatrick lives in Johnstown with his wife and four cats. Outside of scientific interests, he enjoys music, literature and theater. Research Friends \_1LkodL Lv3 closed this help, points have been returned. Description Version is too new, thanks for your help! Page 2 Scientific research PASS AI2.0 Robot The user is suspected of a violation, temporarily disabled robot (system intelligent identification, if there is an error, please contact the administrator) 18:12:14 The user is suspected of a violation, temporarily disabled robot (system intelligence identification, if there is an error, please contact the administrator) Page 3 (without my consent, ban any kind of reprint) One, what is DOI? Digital Object Unique Identifier (DoI) refers to the unique identifier of a digital object, which can be understood as a document's ID number and is unique, permanent, and so on. Secondly, why scientific research has always emphasized the use of doi download? (Important) To make a simple analogy: You need to find a person (assuming it is called Li lv), through his ID number is certainly the most direct, because you can through the public security bodies to find this person's name, age, address, and even find his relatives and friends, usually in a few seconds to do. At the same time will not make mistakes, because you lost the wrong ID number, you will certainly not find the information. But if you just enter the name of li four (analogous to the title of the literature), there are many questions: (1) Li lv a lot of people, which are you looking for? (2) You may have lost the wrong name on Li Four, written as Wang Wu, who found that the information does not know who. So in this case you need to enter a lot of helpful information (similar to supplemental literature journals, years, etc.), such as Li Four height, blood type, address, etc., which will help to find Li Four this person, but there is still a lot of uncertainty. In short, in any case, the practice of entering only the title (name) is very harmful for the literature download, the cycle is greatly length. But scientific research found that many people just enter the title, although other information is not entered, flat for no reason increased the workload of other friends (you know, others have no obligation to give you the next document, please be kind to other people's friendship time). Some people will ask, I really don't know what to do with DOI? As much simply, enter as much additional information as possible. Since you can not find DOI, which suggests that the literature is difficult to obtain, because it is difficult to obtain, I think this document is very valuable to you, you should know more about his information. But there is some literature that does not have doi, and I think you need to consider if you really need it: (1) too old a document. Like many older people, they don't have ID cards at all. There wasn't a DOI thing back then. Therefore, please seriously consider whether such ancient literature has the value of reading, because knowledge is updated. (2) Very small number of literature, such as very cold journals, very low impact journals, Chinese journals, etc., many of which do not have DOI, so consider whether it is really necessary. As for how to get a DOI, read the instructions below, and if you know a lot about DOI, this article can be read at this point. Thirdly, the doi format A DOI consists of two parts: prefix and suffix, divide in the middle with / and all DOI by 10. Beginning. For example: 10.1158/1541-7786.MCR-08-0227.10.3109/0001648809123495.10.1016/j.ccr.2008.05.005 Four, how to judge DOI is correct? 1. Visit the DOI website: enter the literature doi, click GO 3. If the DOI is correct, it will jump to the original page of the literature journal. If DOI is wrong, it is as follows: In this case, check the DOI. In addition, you can add doi.org/ before the DOI to form a URL (e.g. doi.org/10.1016/j.ccr.2008.05.005) direct access, again, if you enter the journal page, DOI is correct, the reverse error. V. How do I find DOI? 1. the year is far (generally before 2000) of literature does not have DOI, Chinese literature generally does not have DOI, do not bother to find! Find! 3, with Crossref (, but this page opens a little slowly, just enter the title of the document. 4. Use Libgen scientific literature search (, which can sometimes be unstable and unable to open. 5. use of literature journals corresponding to the database for download, such as PubMed, Web of Science, Ebsco, ScienceDirect, Wiley, etc., of which some databases need permission to download, generally free search, most can not download the full text. The above is the introduction of the literature DOI, welcome to leave a message to supplement and discuss. This post is complete, finally edited at: 2020-05-14 10:58:13 Page 4 Scientific Research Pass (AbleSci.com) official WeChat service number Scientific Research Pass officially opened, feel free to scan the following QR code, pay attention and forward to friends in need. WeChat name: scientific research by micro-signal: sciable scientific research through public numbers has completely opened the two-way link between WeChat and scientific research communication platform, you can directly in WeChat to complete all the features of the platform, such as: ✓ published literature for help/ question literature doi/ Help / help status real time reminder, first time to get upload notification/ scan code login, no longer remember account number and password/ check-in points, WeChat page more convenient/ get real time SciHub available links/ get free WOS links ... (More features added one after the other) Note: Since scientific research is strictly in accordance with the relevant intellectual property rights regulations, you must register the scientific research passport account and bind WeChat to use the above-mentioned features directly in WeChat. If you are not bound, please go to the following website to bind WeChat: (or click on: upper right header - &gt; account settings on the left side - Binding WeChat on the right side of &gt;. This public number to service-oriented, push article reading as a supplement, still maintain non-profit, will not drive any advertising articles, expected to publish no more than 1 article per week, are related to scientific research of original articles, such as: literature download skills, use of scientific research tools, scientific research ideas, paper writing skills. Currently, scientific research will automatically switch to the appropriate version according to your device (computer, tablet, mobile phone), WeChat can be opened directly. But if you download articles, I still recommend using a computer, after all, with a computer to download paper, reading literature is more convenient. Subsequent official numbers for other social platforms will be and small partners with experience in this area are welcome to join us. If you have questions and suggestions, please leave a message in this post, or send an email to: admin.sablesoci.com (please change snr, s/ To further let more people know about scientific research, in the condition of voluntary, feel free to forward scientific research to your circle of friends, WeChat group (more than 20 people related to scientific research groups), please. I will give away 50 points for each valid forwarding. The following WeChat Public Article is a basic introduction to scientific research, please click on the link below to open: open: Or cell phone WeChat scan below QR code open: forwarding can be attached forward messages, such as (please freely copy or change): This site is really convenient, there is a response, very fast, literature download no longer worry, it is recommended that you collect and use. Too amazing, 10 seconds to download to my literature, the robot is so cute, we sea to collect too powerful, SciHub under the paper this site can be downloaded, share to everyone recommend this literature mutual assistance platform, let me leave university, but also enjoy the freedom of literature download, continue to engage in scientific research - to get points channel please reply in the public number to send a forwarded screenshot can be. (detailed as shown below) I will review it from time to time and will give away 50 points when confirmed to be valid. Since all of the above is my personal manual work, it is inevitable to be negligent, if there are omissions or suggestions, please send feedback to the mailbox: admin.sablesoci.com (please change p. If there is an urgent need, please add the QQ group under the page, contact the administrator. (Note: Each person can only participate in this activity once) Special note: Be sure to bind WeChat, otherwise I do not know who, there is no way to give you points. Binding WeChat URL: (or click on: top right avatar - &gt; left account settings sub-function - &gt; right binding WeChat. ) To jointly promote the open exchange of knowledge, so that love and dreams fly together this post ended. finally edited on: 2020-11-25 06:49:33 Page 5 Spirit Guangxia million rooms, the world's cold people are happy! It's enough for me to break and freeze to death alone! This post was last edited on: 2020-12-10 08:54:00 Page 6 Page 7 Page 8 zsy helper Lv11 accepted research friend \_852AxL file, this mutual assistance is over, thank you for participating.
