

Unprotecting an excel worksheet without the password

I'm not robot  reCAPTCHA

Continue

I recently had a client send me a copy of a spreadsheet that was password-protected, but the client no longer had a password to unlock the content. They wondered if there was anything we could do... So how not to protect the Excel spreadsheet if you don't have a password? Unfortunately, there is no quick and easy way to view or recover a lost password. Microsoft's official position on this issue: URL - Microsoft Restore password to open work book or Excel sheet allows password to protect your workbooks and your sheets. But, it's easy to forget or misplace your passwords. Unfortunately, if this happened to you, we have no way to help you recover your lost password. Excel does not store passwords where you or Microsoft can search for them. This also applies to other Office programs that allow you to protect files. That's why it's always a good idea to keep your passwords in a safe place. Some third-party companies offer programs to unlock files. For legal reasons, we are unable to recommend these programs. You can try them, but at your own risk. So what if you lost your password to protect an Excel book or sheet? The next method may, we re-iter may, work for you, but then again it may not be so good. We had good success using this method, but it didn't work 100% of the time. Having said that, the method does not harm your spreadsheet nor the data, so you have nothing to lose from trying it. How to protect a password-protected sheet. So what do you do ... In the case of a password-protected sheet where you can't edit the data, you can try the next steps to protect your sheet. Step 1 Click ALT and F11 or click View Code on Tab Step 2 Developers Double Click on a password-protected sheet. Step 3 Copy and paste the code below in the (code) window. Don't change the code, just copy it and paste it. Sub PasswordBreaker () Dim i As Integer, j As Integer, k As Integer Dim l As Integer, m As Integer, n As Integer Dim o As Integer, p As Integer Dim q As Integer Dim r As Integer Dim s As Integer Dim t
