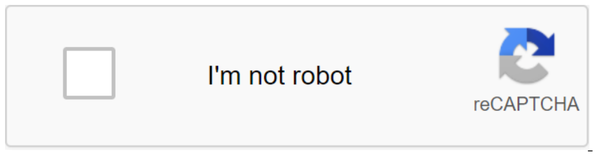
Unfortunately myapp has stopped android studio



Continue

Unfortunately, MyApp has stopped Android Studio - this is the main problem and everyone is facing this error when developing android apps in the Android studio platform. This is a bug that is raised while running an app in our emulator, virtual device, or startup from mobile devices. Suddenly show a pop-up as, unfortunately, the app stopped. Each company hires android developers, so don't stop to learn Android app development. Suppose if you don't know about development, make money online watching videos and earn $5 a day. Let me solve the error, in the below I will explain in one video how to solve unfortunately myapp stopped in the android studio platform. However there is any doubt or no fixed your problem, just a comment below we will help solve, unfortunately Myapp stopped Android studio bugs. Note: This response uses Android Studio 2.2.2 Note 2: I believe your device is successfully connected. The first thing you do when your app drops is a peek at logcat, at the bottom of Android Studio there is a toolbar with a menu list: Click on the Android Monitor (the one I highlighted in the image above. that has many at:x.x.x: and is called: TrumpIsPresidentException, for example. Go to what's caused: a statement in your logcat. Next to this, caused:, there must be an exception to what happened. In my case, it's RuntimeExceptionand underneath it should be a line that contains a blue link, such as: If it's caused: DOESN't have a line with blue text somewhere below it, and then look for another Called: it does. Click on this blue link. He should take you to where the problem is. In my case, it was related to this line: throw a new RuntimeException(); So now I know why it's falling. That's because I'm giving up the exception myself. It was an obvious mistake. However, let's say I got another mistake: java.lang.NullPointerException I checked my logcat, I clicked on the blue link he gave me and it took me here: mTextView.setText (myString); So now I want to fine it. According to this issue of StackOverflow, NullPointerException says that something is zero. So let's find out what is zero. There are two possibilities. Either mTextView is zero or myString is zero. To find out, before the line mTextView.setText (mString) I add these two lines: Log.d (AppDebug,mTextView is zero: - String.valueOf (mTextView) - null); Log.d (AppDebug,myString is zero: - String.valueOf (myString) null); Now, as before (we changed Verose to Error), we change the bug on Debug. With C registration by debugging. Here are all the magazine's methods: the magazine. d means that Debug e means error w means warning v means verbose i means information wtf means what a terrible failure. It's similar to Log.e So since we used Log.d, we check in debugging. That's why we changed it to debugging. Note Log.d has the first option, in our case AppDebug. Click on the No Filters menu at the top right of the log cat. Select the editing filter configuration, give the name to the filter, and place the Debug App in Log Tag. Click GOOD. Now you have to see two lines in logcat: yourPackageNameAndApp: mTextView is zero: the truth of yourPackageNameAndApp: myString is zero: false So now we know that mTextView is zero. I follow my code, now I notice something. I have a private TextView mTextView stated at the top of my class. But I don't define it. Basically I forgot to do it in my onCreate (): mTextView (TextView) findViewById (R.id.textview_id_in_xml); So that's why mTextView is zero, because I forgot to tell my app what it is. So I add this line, run my app, and now the app doesn't crash. Watch 535 Star 11.8k Fork 2.6k You can't perform this action at the moment. You've signed up with another tab or window.
