Punch hero apk mod 1.3.8

Do you like Xing Boxing when I was in the 11th century? I don't know the exact reason, but my boxing enthusiasm has grown. I also bought some kisses with boxing gloves. This madness has been going on for a month and since then all my madness has gone away. But I still love boxing, but now I really don't like boxing. All I like is boxing in Punch Hero MOD APK on my Android phone. Punch Hero is probably the best game for all boxing fans. People all over the world are playing this game on their phones. The game was developed with Nintendo in mind punch-out games in the '80s. But it's definitely made to 2019 standards and really great. It's all animated by burger antiques. The reaction and everything is well taken care of. Why the MOD APK? The only way to earn unlimited money and features like unlocking everything is to download Punch Hero MOD APK. And if you can't find an APK for this game on the Google Play Store, I don't know why, but you can find both on our website. Here you will find a link to download directly from Punch Hero MOD APK + Original APK (you can download any APK if you wish). But be sure to read the installation details below the post because so many people forget to read it and then say that the game does not work on their phones. Punch Hero MOD APK Punch Hero review is basically a boxing match game developed and released by Gamesville. The graphics are not bad, I think the developers deliberately designed the game in this way. It really was a game with Nintendo before the 1980s. Let's look closely at the graphics: The quality of the graphics does not correspond. No doubt, the graphics are 3D, but give you an older look and do not emphasize the sharpness. But don't worry, graphics have no effect on gameplay. It's still great and addictive. All boxers still look terrible and look really funny. You can feel the pain when hitting hits, kicks, music and screaming it's terrible. Create your own boxer My favorite features in the game are that you can create your own box cursor. When you start a game, you can select a name and create different character styles. That includes Baal and others. Your character can be robots, pirates and superheroes. Gold is very important in Punch Hero MOD APK. Once you get unlimited gold, you can buy and update your stats. In addition to getting gold from MOD APK, you can also earn gold by participating in competitions and winning games. This way you can make random purchases in Punch Hero. With the latest version, you can enjoy free money without paying a cent in your pocket. Gameplay and Storyline If you play Arcade MOD, you need to control your character to beat the other 19 Boxers. If you hit a man, you can move on to the next challenge. Your opponents are getting stronger, be they pirates, robots, ghosts and boxers. Every opponent has some strengths and weaknesses, you have to understand them and then overcome them. Punch Hero is very easy to control. You can easily understand the controls, but it will take time to master the game. Some controls like s pulling left to press cards and cutting when you want to hit your opponent directly in the face. While playing in a defensive position, you can hold two fingers to protect yourself from enemy attacks. Usually, a few 10 seconds begins when you can stand in it. If you can survive in it, it's fine, but you're not defeated. To install The first of all, you need to uninstall the previous version of the game if you have Download Punch Hero MODE APK or Original APK now if desired It is time to install the game on your mobile device If you get an error, enable the Unshare Source option under Settings > Security. Open and enjoy the game Last word As you are a fan of boxing, this game is made for you. Play this game because you're a real boxer. Visit our website for more games like this and don't forget to share this exciting game with your friends. And if you have any concerns, comment below, I will give you a solution. Punch Hero (MOD Unlimited Money) is a fighting game released by Gamevil, free for Android and iOS. You could say this is one of the most fun and addictive boxing games I've ever played. The game was inspired by Punch-Out!!! – a classic boxing game series and the last arcade series of games ever developed by Nintendo in the '80s. Powerful punches, boxing screams, the heat of thousands of spectators, broken bones, ... are the things you can find out in this game. Table of Contents Name Punch Hero Publisher GAMEVIL Category Fighting Version 1.3.8 (Latest) Size 89M MOD Features Unlimited Money Requires Android 2.3 This right. At first glance, I don't think punch hero graphics are too impressive. Despite the 3D graphic, it looks old and not as sharp as the current games. But the game is really fun and addictive. The boxer's style was changing and he made me feel ridiculous. Many unique effects signify pain when you attack or knock out opponents, such as a bleeding face or bruises. The sound of the game is also pretty simple with the sound of punches, the screams of the audience and some music at the end of the match. Create your boxer After by entering the game and naming, you can create a character and choose any style you want. The great boxer with Santa Claus Beard? Handsome guy with nice hair? Or even, you can create special characters like pirate, robot, superhero, ... Gold is the main currency in Punch Hero. They help you buy items in the store or upgrade statistics. Gold can be obtained by competing or buying gold packages with real money. If you're a fan of shopping but don't have a lot of gold, Punch Hero MOD can help you. The mod version allows you to shop for everything you want with unlimited money provided by the game. Keep having to make sure you need to reach the required level to buy in-game items. The Gameplay Your mission in Arcade mode is to control your character to beat 18 other boxers. After defeating the guy, you can move on to the next challenge. Your opponent is very interesting, they can be a boxer, a pirate, a robot or even a soul. No matter who your opponent is, he has weaknesses. You need to find the strengths and weaknesses of every opponent and knock him out. I feel satisfied with punch hero's control. Easy to play, but hard to beat, that's what I can say about this game. Swipe left to make a hip strike, swipe up to undermine it, cards if you want to punch your opponent in the face. Defensively, you can hold two fingers on the screen to protect your opposing attacks. When you're defeated and the referee is counting down, tap the screen multiple times to get back. Over 10 seconds, you lose. Upgrade your boxers When you play this game, you might think it's a game that emphasizes the player's skill, dexterity and reflexes. Hmm, not really. After some level, I met some boxers with a lot of strength and a great HP. Then the difference in strength clearly showed it. Even if you are a skilled player, your chances of winning are very small. This is the time when I think upgrading statistics is the best way. Some statistics you can improve for boxers include Offense, Defense, Speed, Skill, HP, Mana, ... You can do it in the training gym room. Zombie mode Besides 18 strongest boxers, Punch Hero also brings hundreds of zombies to challenge your courage. This is a mode where you can relax with unlimited attacks. How long can you survive in zombie mode? Why do I love Punch Hero? Overall, Punch Hero is a fun and addictive fighting game with many challenges. The game has a lot of interesting things to explore. However, playing against AI sometimes causes players to feel bored. We hope that the publisher Gamevil will soon update the online mode.
