You can also find other books in our online library unlimited for the first 1 month. Very Easy, don't miss it. [Author] by Jack Fraenkel Genre: Education Date Book: 2008-02-25 Editor of: McGraw-Hill Humanities/Social Sciences/Language Format Book: PDF, ePub & Audiobooks Download: 704 Languages: English, French and German How to Design and Evaluate Research in Education provides a comprehensive introduction to educational research. The text covers the most widely used research methods and discusses each stage of the research process in detail. Step-by-step analysis of real research studies gives students practical examples of how they can prepare their work and read others. Problem sheets at the end of chapters, comprehensive coverage of data analysis and information on how to prepare research proposals and reports make it suitable both for courses that focus on doing research and for those who emphasize how to read and understand research. The authors' writing is simple and direct and the presentations are improved with clarifying examples, summarizing charts, tables and diagrams, many illustrations of key concepts and ideas, and a friendly two-color design. [Author] by Jack R. Fraenkel Genre: Education Date Book: 1996 Editor of: McGraw-Hill Companies Format Book: PDF, ePub & Audiobooks Download: 602 Languages: English, French and German An introduction to educational research, which is a requirement for anyone seeking a master's degree in education. Its coverage includes the steps of the research process, the end of chapter worksheets, and the most widely used research methods. [Author] by Jack R. Fraenkel Genre: Education Date Book: 2005 Editor of: Format Book: PDF, ePub & Audiobooks Download: 620 Languages: English, French and German This comprehensive introduction to educational research covers the most widely used research methods and discusses the research process in detail. Step-by-step analysis of real research studies gives students practical examples of how they can prepare their work and read others. Problem sheet at the end of chapters, comprehensive coverage of data analysis and discussion on the preparation of research proposals and reports make the text for courses that focus on doing research as well as for courses courses stress reading and understanding of research. [Author] by Helen Hyun Genre: Education Date Book: 2015-06-16 Editor by: McGraw-Hill Education Format Book: PDF, ePub & Audiobooks Download: 704 Languages: English, French and German How to Design and Evaluate Research in Education provides a comprehensive introduction to educational research. The text covers the most widely used research methods and discusses each stage of the research process in detail. Step-by-step analysis of real research studies gives students practical examples of how they can prepare their work and read others. Problem sheets at the end of chapters, comprehensive coverage of data analysis and information on how to prepare research proposals and reports make it suitable both for courses that focus on doing research and for those who emphasize how to read and understand research. An early focus on how to locate appropriate literature helps students to make effective use of online search tools. Teachers and students can now access their course content through the Connect digital learning platform by purchasing either standalone Connect access or a bundle of print and connect access. McGraw-Hill Connect® is a subscription-based training service available online through your personal computer or tablet. Select this option if your instructor will require Connect to be used in the course. Your Connect subscription includes the following: • SmartBook® - an adaptive digital version of the course textbook that personalizes your reading experience based on how well you learn the content. • Access to your instructor's assignments, quizzes, syllabus, notes, reminders and other important files for the course. • Progress overviews that quickly show how you're performing on your missions and tips for improvement. • The option to buy (for a small fee) a printed version of the book. This binder-ready, loose-leaf version contains free shipping. Complete system requirements for using Connect can be found here: [Author] by R. Burke Johnson and Larry Christensen offers a comprehensive, digestible introductory text methods for undergraduate and graduate students. Readers will develop an understanding of the multiple research methods and strategies used in education and related fields; how to read and critically evaluate published research; and the ability to write a proposal, construct a questionnaire, and conduct an empirical research study on your own. Students delve about the clarity of this bestseller and its usefulness to their enable them to become critical consumers and users of research. [Author] by Norman E. Wallen Genre: Education Date Book: 2013-03-07 Editor by: Routledge Format Book: PDF, ePub & Audiobooks Download: 568 Languages: English, French and German Educational Research: A Guide to the Process is another type of research text. It emphasises the process of research, that is, what researchers actually do when they go about designing and carrying out their research activities. Instead of passively reading about research activities, it promotes content control by using a three-step pedagogical model that involves: a manageable piece of text, an understanding or application exercise, and author feedback on the exercise. The text contains about 150 of these motion-feedback devices. The second edition has been thoroughly updated, expanded from 15 to 20 chapters, and reorganized in two parts. Part I covers basic aspects of the research process, provides an example of a student research proposal, and shows how to evaluate a research report. Part II contains a separate chapter for each research methodology, including two chapters on qualitative research. Other notable changes include more annotated studies and more visual illustrations of statistical and research methods. [Author] by Joseph Check Genre: Education Date Book: 2011-10-27 Editor of: SAGE Publications Format Book: PDF, ePub & Audiobooks Download: 440 Languages: English, French and German Research Methods in Education introduces research methods as an integrated set of techniques to investigate questions about the educational world. This lively, innovative text helps students connect technology and substance, appreciate the value of both qualitative and quantitative methods, and make ethical research decisions. It weaves actual research stories into the presentation of research topics, and it emphasizes validity, authenticity and practical importance as overall research goals. The text is divided into three sections: Foundations of Research (5 chapters), Research Design and Data Collection (7 chapters), and Analyze and Report Data (3 chapters). This tripartite conceptual framework honors traditional quantitative methods while reflecting the growing popularity of qualitative studies, mixed method designs and school-based techniques. This approach provides a comprehensive, conceptually uniform and well-written introduction to the exciting but complex field of educational research. [Author] by Lawrence S Lyne Genre: Psychology Date Book: 2016-09-13 Editor of: Routledge Format Book: PDF, ePub & Audiobooks Download: 288 Languages: English, French and German • This collection of research articles emphasizes topics of interest to classroom teachers. • The 38 research articles illustrate: •survey research •quantitative •korrelationsforskning •korrelationsforskning experimental research •quasi-experimental research •first-person research •one-person research/behavioural analysis •causal-comparative research •programme evaluation •qualitative research •combined

qualitative/quantitative research •meta-analysis • The lines of each article are numbered sequentially, making it easy to refer to specific parts of the article during classroom discussions. • Access to a single source of research articles is convenient and helps you avoid copyright infringement issues. • Factual questions at the end of each article allow students to check their comprehension. • Questions for discussion stimulate classroom discussions of research methods. • After answering the questions, students rate the quality of each article using 13 basic criteria. More detailed criteria in the appendix can also be applied. • Perfect for courses where the primary goal is to learn how to evaluate research. • Twenty-one different journals are represented in the 38 articles in this collection. Students see the diversity of educational research because journals vary in their publishing standards. • New to this edition: Thirteen new articles keep this popular research reader up-to-date. [Author] by David Colton Genre: Education Date Book: 2015-06-22 Editor by: John Wiley & Sons Format Book: PDF, ePub & Audiobooks Download: 412 Languages: English, French and German Written in easy-to-understand language, this important text provides a systematic and common sense to developinstruments for data collection and analysis. This book can be used by both those who develop instruments for the first time and those who want to hone their skills, including students, agency personnel, program managers, and researchers. This book provides a thorough presentation of instrument design, from fertilization to development and pre-testing dereinforcements, formatting of the instrument, administration, and, finally,data management and presentation of the results. Throughout the book, the authors emphasize how to create an instrument that will produce reliable and accurate data. To this end, they have included guidelines to review and review thequestionnaire to improve validity and reliability. They also show how to work effectively with stakeholders such as instrument designers, decision makers, agency staff, clients and ratersrespondents. [Author] by Donna M. Mertens Genre: Social Science Date Book: 2017-07-13 Editor of: SAGE Publications Format Book: PDF, ePub & Audiobooks Download: 224 Languages: English, French and German in Mixed Methods Design in Evaluation, the first volume of SAGE's Evaluation in Practice Series, best author-selling Donna M. Mertens explores the meaning of mixed methods, evaluation of its development in recent decades, and the dominant philosophical which is is thought and practice in the field today. Four chapters explore evaluation of the effectiveness of interventions, development of instruments, systematic reviews, and policy evaluations, while a further chapter covers evaluation approaches that are often required in specific contexts, including gender-specific evaluations, needs assessments, and evaluations in conflict zones. Practically by its nature, the book guides readers' thinking on the design of mixed practice evaluations through the use of illustrative examples and explanations for additional applications. Program.
