Best Reviews Recent Reviews 10%off 10%off 10%off The start of your review of aviation maintenance I would recommend it to aviation engineers View all copies of this edition of ISBN: Although there are a number of books on aviation maintenance, aviation maintenance management, the second edition is the only book aimed at the management side of the industry. The book focuses on creating a maintenance program rather than the technical expertise needed to perform maintenance. With this book, novice managers will learn how to support aircraft at a higher level (effectively saving money), apply system concepts to improve integration and communication, and improve efficiency in accordance with regulatory requirements. In this extensive revision, new author Terry Siddiqui brings this important information up to date, with new sections on the maintenance review board, personnel certification, regulatory oversight, and reliability. He updated the computer support section to include new systems designed to monitor trends and on-demand maintenance requests and upgrades. Finally, Siddiqui updates the chapter Documentation for Maintenance to include new manuals on which modern aircraft rely heavily. synopsis may belong to another edition of this name. About the author: Harry A. Kinnison, Ph.D., worked at Boeing for 20 years, 10 as a maintenance specialist and ground operating systems specialist of the Customer Service Organization Group. In particular, he represented Boeing airlines under the ETOPS (advanced twin-engine operations) program, participated in airline maintenance assessments and helped airlines develop reliability programs. After retiring from Boeing in 2000, Dr. Kinnison taught aviation management courses at Embry-Riddle Aeronautical University in Daytona Beach, Florida. Tariq Siddiqui works as an aircraft maintenance manager for a commercial airline. Terry currently teaches on an additional basis at ERAU. He has more than 20 years of experience in aviation maintenance, management, aviation project management, environmental regulations, and incident and accident investigation.
