do not call the complaint receive telemarketing calls, even if you are registered in the do-not-call registry? Have you been told by a particular telemarketer to stop calling you and yet they will continue to call you despite your requests to stop them? If so, then you should report that they did not report violations, so that your voice would be heard and help stop these unscrupulous telemarketers. The do-not-call registry was designed for individuals to put their name on the list so that telemarketers would know who they could and couldn't call. Before any telemarketer launches a telemarketing campaign, they should scrub their list with the most updated list from the do-not-call registry. This raises the question, how have you still been called? You may have called either because this telemarketer simply didn't scrub the list as it had under the law, or you gave this telemarketer explicit consent to be called, which prevails over your registration do-not-call registry. Reporting of non-reporting of violations, do not trade complaints There are two important reasons why it is very important to report your complaints. First, if you receive unwanted calls from telemarketers you can be sure there are hundreds or even thousands of others like you who are also being harassed by this telemarketer. Therefore, it is important that you report this telemarketer to my company aware that this telemarketer ignores the do-not-call registry and should be suspended. It's not only a practical way to stop calls, but it's also a kind of civil service because you also help others who also receive these unwanted calls. Second, since these unwanted telemarketing calls are illegal, you can claim \$500 for an unwanted call under the Telephone Consumer Protection Act (TCPA), which my company works for on a daily basis. According to TCPA (for more information below), a telemarketer by law must scrub your list before not calling the registry, and if not, then that telemarketer is responsible to you for \$500 for a call after you receive the first call from them. By completing the above report, we can look at a particular telemarketer who receives calls from the Telephone Consumer Protection Act (TCPA) TCPA Telephone Consumer Protection Act (TCPA) was designed to protect you from unwanted telemarketing calls. TCPA Law states that if a telemarketer encourages you to use an autodialer on your cell phone without your consent, then that telemarketer must pay you \$500 for a phone call. If a telemarketer calls you using a pre-recorded message at the beginning of a call, or call your landline or your cell phone, this telemarketer again must pay you \$500 per call. If the telemarketer calls you and it is not an automatic call or a pre-recorded call, they still pay you \$500 per call if your phone number is registered in the do-not-call register. As an TCPA lawyer, I especially focus on helping people like you stop telemarketing calls and in many cases, I've helped people raise money from these telemarketers. If you receive unsolicited telemarketing calls, please fill out the form above to submit a report with us. If we think we can help you, we will contact you as soon as possible. thirteen10 September 2013 | 5 responsesIt's the collection agency that conducts the survey to find out who you are and where you live. Anyway, this is how to stop them from bothering you (according to information from your website, or do they have their end of the bargain, I don't know, be careful about giving them your email address): --- Have you received a phone call interview from SSI? But if you do not want to participate in the future, we of course understand and respect your decision. SSI is a member of the Council of American Research Research Organizations (www.castro.org) and complies with the standards, best practices and relevant laws of the research industry. If they call again, I will speak German and try to get the conversation out as long as possible. Tamianth2013-09-28 22:04:41UnknownBob, All you do by re-registering on the DNC list is to give honest telemarketers 30 days to actually call you because it takes 31 days to get it back into the system again. Fed DNC list is permanent. You don't need to re-sign up, add only new phones, such as a mobile, if you have one or have a new number. However, it does not protect you from illegal telemarketers, scammers, fraud and property rapists. It's just to keep honest business honest! Most people really don't understand the DNC, so you have it. If its a telemarketer call that tries to sell you goods or services, then you can report them to the DNC itself, other types of calls get turned by what they have with the FTC, FCC or even other agencies like Attorney General, DOJ DOJ Fbi.
