Set table limits, deposit limits, session reminders, and more directly from the app. Just like other bigwigs in online poker, this site is not too different. I deposited and took off without problems several times now. I don't usually use the app, just place on my laptop. But yes. There may be some bots on some games, but I think live board games with real people are pretty legit. There are a lot of people who go fishing on one card and end up hitting, however it works both ways as I went fishing that one card and hit many times. So again, like any other great poker site/app. So by all means use this app/site. Just be careful at all times if something seems to be a table breaker or take a break and come back later. I mean what you expect. If you play with low stakes expect low bet players. The call after the call draws after the draws. That's what it is. But the number of single outers that hit is ridiculous. They seem to have a computer designed for pure action and bad punches. I'm willing to bet my life if this site offered bad to beat pots they would change all computer algorithms. Also, one of the outers I didn't have any other issues. I'm not complaining about being beaten 1 externally once in a while, it's a daily daily routine funny one outers being hit. Can the site be fixed? It's possible. They allow you to DEPOSIT money with very little information. Then, when you want to withdraw, they refuse if you provide several pieces of completely irrelevant personal information, including my driver's license, a photo of me holding my driver's license, utility bills, and a bank statement. In my case, they only include location tracking after making money. Then I realized that I could not play, so I asked to cancel the deposit, which they refused. I DIDN'T EVEN PLAY ON THE SITE. Then I wanted to withdraw money from the same mobile device to the same bank account from which the deposit came, and they require my personal information. They are a complete scam and I hope that regulators and bar plaintiffs will prosecute them for their unfair business practices against consumers. The 2020 new york developer's 2020 new york website's privacy policy in New Jersey was the first entry by a U.S. operator since the infamous Black Friday.
