With compression, sending multiple files in one go is easy. If you want to send a batch of files, such as photos, documents or song files, to someone, you can kiss the tedious process of waiting goodbye. No more waiting for each item to finish attaching to the email and hoping that each item can be successfully downloaded by the recipient. Just compress the files into a ZIP or RAR file and you're good to go. Sending ZIP and RAR files is one thing, but what if you receive them on our Android phone or tablet? Do we have to wait until we get home to our desktops? Of course not. With newer and more powerful applications, our phones can easily unzip ZIP and RAR files to reveal their contents. What's even better is that the same applications can also pack several files into one neat ZIP or RAR file. Download any file, music file, video, image, or document to others in no time. For people who need to send and receive files on the go, we've sent you a list of the best Android apps for ZIP and RAR files. WinZip It's natural that we start this list with the official WinZip app for Android devices. The app recently landed on Android a few weeks ago, but it constantly hits users' phones. You can receive a file and view supported image, text, and web files files directly in the WinZip app. You can even open encrypted AES128 or AES256 ZIP files to securely view sensitive content on the go. After you unpack the content, you can copy it to the clipboard and paste it into an email message or other application. WinZip can automatically unzip and install APK files provided as ZIP files from Google Play or Amazon Appstore. WinZip displays a variety of formats and lets you open common file types, such as Word documents, Excel spreadsheets, PowerPoint presentations, and PDFs in third-party applications. Unfortunately, you can only compress files into ZIP format using WinZip.Blackmoon File Browser As it says on the can, Blackmoon File Browser is more than just a zip and RAR application. You can also browse, open, rename, manage, copy, and delete files on your phone. This file viewer will allow you to easily do some cleaning on your Android device. It is also able to recognize more than 100 file extensions and has support for multiple files. You can rename files without having to be confused. The Blackmoon file viewer allows you to view thumbnails of images, so you can easily distinguish image files. It certainly makes it easy to decide which photos you want to pack into a ZIP file. If someone sent you a ZIP file, you can also use Blackmoon File Browser, extract the contents of the ZIP file. That's not all; Blackmoon File Browser also allows you to create music playlists using the Send Selected feature and you can create jump points to any file or Here's another app that will allow you to easily select multiple files and give you an easier job at organizing your files. The zipper, developed by Polar Soft, can also copy and move several files and folders. If you're in the spring cleaning process, you can open, rename, and delete files and folders. Creating a ZIP file with zipper is also easy. Drag several files into one folder and tap the long folder to bring up the menu. Here you can choose the name of the ZIP file, whether you want it to have the same name as the original file folder, or you want to give it a new name. You can also create split archives using Zipper, which can make it easier to send very large files. Split a large file into easier-to-manage sizes so that the recipient can unzip the split archives and enjoy the complete file without worrying about an occasional connection. The zipper is also equipped with an image browser, a text browser and a SWF (Flash) browser. You can also manage files on your phone using an FTP and HTTP server with a zipper. This app is free and supported by ads, but we think it's a good compromise for such a powerful app. Total Commander With an overwhelming rating of 4.9 on the Google Play Store, Total Commander is the crowd favorite. This Android app is a mobile version of file manager on the desktop with the same name. Shows a list of all installed built-in applications and the number of plugins if you want to strengthen it. These plug-ins include an FTP client, a WebDAV folder, and LAN access. Total Commander also has basic support for its main functions. Total Commander stands in pursuit, if you delete something, it skips the Recycle Bin phase and jumps directly to erase the data. You can easily unzip ZIP files, as well as unzip or unrar them whenever you want. Looking for something? You can use total commander search, which works even for text files. If you don't want to comb through image files, Total Commander makes it easy to thumbnail images. Once you've found what you're looking for, you can send files via Bluetooth (OBEX). Perhaps the best part is that Total Commander is free to download from google play.AndroZip File Manager Organizing files on your phone is a little difficult, especially when you are just starting to learn how to move it. If you feel frustrated with making mistakes when you're trying to organize your phone files, androZip File Manager may just be the app for you. AndroZip File Manager helps you copy, delete, move, search, and organize files and folders just like you would on a computer. We have not forgotten that this list of applications is about applications for ZIP and RAR files. AndroZip File Manager supports ZIP, encrypted ZIP, RAR, TAR, GZIP and BZIP2 files. It also allows you to send e-mail. Don't worry if you have a larger Android device because AndroZip File Manager has been for both phones and tablets. The app has drag-and-drop ness, which means you can easily organize your files without having to play too much with the app's tools. With this app, you can back up the app and install the app's APK files to your phone. You can also manage your phone's memory and resources through androZip File Manager task manager. For those of you who want to play it safe and install your apps on your SD card, AndroZip File Manager can be installed on your SD card without any problem. ArchiDroid ArchiDroid calls itself an easy-to-use archive manager and based on user feedback, it certainly lives up to its name. ArchiDroid can unzip more than just RAR and ZIP files; you can also unzip TAR, GZIP (gz), BZIP2 (bz2), tar.bz2, tar.gz and 7ZIP (7z) file archive. You can also unzip encrypted ZIP and RAR files protected by a password. Do you have an RAR file that has been divided into several smaller and lighter archives? No problem, because ArchiDroid supports it too. Let ArchiDroid go for it and he can properly unpack the multi-part archives. You can also easily create simple and encrypted ZIP archives on your phone. The interface may not be very nice, but ArchiDroid does its job without add-ons to distract users. If you want an app that is simple and effective, ArchiDroid can be the app for you. You can download ArchiDroid from Google Play for free. Fx File Explorer The downside of trying to keep your phone neat is that the screen is too small. You can spend an hour or so squinting on the screen of your Android device when ordering, renaming, and deleting files. Fortunately, there is an application that makes navigating and organizing our phone files a piece of cake. FX File Explorer, developed by NextApp, Inc. it has features like multiple windows so you can quickly switch between different locations. You can easily manage multiple items with intuitive swipes to the File Explorer gesture. Select more than one file by swiping across the file icon, from left to right, or from right to left. You can also use this swipe gesture to deselect files. You can use the clipboard to cut, copy, paste, and delete. You can also use Text File Viewer, Text Editor, Binary (Hex)Viewer. What kind of file explorer and fx file explorer manager to be without Zip, Tar, GZip and BZip Archive Extractor and Creator. Fx File Explorer is also equipped with RAR Extractor.Explorer + File Manager Here is another file manager that does frills and easy to navigate. Explorer + File Manager is a practical, nonsensical file manager for your Android device. You can view your device's files and folders, and if root permissions, you can also view root files and hidden system files available on rooted devices under su permissions. Of course, you can perform standard operations, such as cutting, copying, and pasting files to in order. You can also rename, delete, or create a new folder. Viewing files is easy because Explorer+ File Manager can display a thumbnail of the file, its name, and size. Is the font too small for you? Instead of reaching for glasses or a magnifying glass, you can easily set the font size and line size for file listings. If you want to send something to someone, you can easily zip files. Has anyone sent you a ZIP file? No problem. You can easily decompress, ZIP, GZIP and RAR files.ES File Explorer File Manager Hailed as one of the best tools on the Android market and supporting 23 languages, ES File Explorer File Manager just had to do it on our list. You can select multiple files multiple times to move them, and perform basic functions of copying, cutting, pasting, deleting, renaming, and sharing. The app allows you to view different file formats for photos, documents and videos, and supports third-party applications such as Document To Go to open document files. Viewing APK images is now easier with thumbnails. Root users can take advantage of the root explorer feature, which gives users access to the entire file system and date directories, as well as to change the permissions.ES File Manager File Explorer also allows you to compress files into an orderly ZIP file and create encrypted (AES 256-bit) ZIP files. Of course, you can decompress ZIP archives and unzip RAR files as well. Download ES File Explorer File Manager free from Google Play Store today. ASTRO File Manager / Browser Developed by Metago, ASTRO File Manager / Browser not only allows you to easily select several files that you want to combine into one ZIP, but also allows you to easily view and organize all files. Once the contents of a ZIP or RAR file are extracted, they can be easily placed in the right places by dragging and dropping them. All the features you ever need are at the top of the screen in portrait mode or on the left side of the screen in landscape mode. Simply switch through them to access the features you need. If you have a tablet and haven't been updated to Android 4.0 Ice Cream Sandwich or Android 4.1 Jelly Bean, then you'll be thrilled to know that ASTRO File Manager/Browser honeycomb support packages. ASTRO File Manager / Browser is free to download from the Google Play store, but is supported by ads. If you want to support developers and remove ads, you can buy ASTRO File Manager/Browser's pro version. You no longer have to wait until you reach the desktop to send and receive ZIP and RAR files. You can easily extract them directly on your Android device. Does anyone need a photo album or several songs from your device? Simply select the files you want and pack them for ZIP or RAR using any of the applications in this list. If your favorite ZIP and RAR app didn't make it to our list, let us know what by leaving a comment below. Below.
