You have to pick up customer orders, fry chicken wings, throw in delicious sauces, and add delicious side orders – often with two or more orders on the go at the same time! Sounds like a tough, rewarding job, right? This highly interactive restaurant tycoon game offers best practices for any young person who plans to become an entrepreneur, or would like to work in catering or customer service, or who simply wants to hone and learn valuable real-life skills such as good money management and business strategy. Quick mouse-clicking and masterful multitasking skills are extremely important, as your demanding customers don't like to wait around, or to be served anything less than the Best! Are you ready to turn your diner from a humble house of wings into a fabulous success-licking-of-toe that has all the city's critics raving? Right to launch into his new work – on a wings and a prayer! Good luck in the fast-food business! How to play: Note: When the game is initially loaded, click the blue 'Continue' button at the bottom corner of the game screen to proceed. Its goal is to manage a successful fast food restaurant, promptly servicing customers with their desired chicken wing orders. For each completed order, you are scored at 100 based on the speed of your service, the taste of the wings, the sauce and the side orders. We recommend that you pay close attention to the initial tutorial as it gives you a good idea of the various controls needed to cook the chicken wings. Use your computer mouse or touchpad for all the controls in this game. Order Station: Here, you pick up each customer's orders. Click the green 'Take Order' button above a customer's head to hear their instructions. This order is copied down on a 'ticket' that remains in the upper right corner of the game screen until the order is complete. Customers queue along your restaurant floor, and it's up to you to pick up each order at the same time, or one by one. Keep in mind, no customer likes to wait for their hot food! Fry Station: Click and drag the 'dock box' to one of the available frying areas. Depending on the amount of wings ordered, click and drag the green wheel clockwise until the correct amount is displayed. Release the click to start frying the chicken. Once the green timer to the left of the frying tray reaches the white line, click and drag the baked wings into the barrel in the lower right corner to progress to the next season. Sauce Station: Choose the correct sauce, then click and drag this bottle of sauce over the dish. Hold the click until the right amount of sauce is added (the same as the number of wings), then release the click. Then you have to throw your wings. Wait until the circular arrow turns completely green and click the green check mark. Repeat this process to throw the wings in the opposite direction. Once this is complete, click the final tab 'Build Section' at the bottom of the game screen. Construction section: Here, you have to place the wings and side orders neatly on the board. You can see an outline where the customer wants their wings and vegetables to be placed. Click and drag the wings/vegetables from their respective dishes to the correct position on the plate. Then add your chosen side orders to the designated areas in the center of the board. Voila! Click on the ticket in the upper right corner and drag it to the left side to complete the order. Your customer gives your cooking and service performance at each station a rating of 100. The average value of this rating is awarded to you in 'points'. If you do well, you also get tips from happy customers. These can be used to upgrade your store and add new sauces, sides and other items to your menu. Enjoy Day!
