However, this does not mean that there are no alternatives like TubeMate. TubeMate HD Video Pro Desktop: forget to download apps and emulators If you are an Android user, it is very likely that this app will look very familiar to you, with the same name likely to be the best app for downloading videos. Because it works well by the large number of sites to download content of any kind, this goes beyond YouTube or Vimeo, and also reaches social networks like Facebook and Instagram. It is worth remembering that this is not the official version of TubeMate for Windows, but rather a development of a programmer who used the name of the version for Android. It's not as versatile as this, but at least you can use a similar program without having to download APK or BlueStacks-style emulators. YouTube, Vimeo and Dailymotion Here we do not find the comprehensive repertoire of compatible sites that the official version of Android offers, or also of the aforementioned aTube Catcher, but it allows you to download videos from video sites in streaming of greater use. This app works in playback client mode for these 3 sites and offers the following features: Use the manual search engine or follow the suggestions to find your video. Click a video to start playback. Easily download a video. It can be done at different resolutions, as well as download only audio in different quality. Go to the VIDEOS folder to check your downloads. Create playlists and also download videos. Choose from two themes for the user interface: dark and bright. Keep in mind that the app isn't free of advertising, and is in some cases too invasive occupying much of the interface. If you want to remove all of them just make in-app purchases. Program.
