Slomins alarm manual

Although The Slomin's Shield® basic system provides enough theft protection for your home, you can always talk to an experienced home security representative about adding other home security features. We provide fire, carbon monoxide, temperature and water detectors because we understand that securing your home means protecting it from more than just intruders. Like our theft protection, these other forms of protection are connected to our central station, allowing us to contact you immediately if something goes wrong. The Slomin's Shield® is one of the most advanced systems in the industry, providing convenient and reliable protection for your home and loved ones. The panel connects you to Slomin's central monitoring station and controls system security-related features. With its easy-to-use interface, you'll keep your home and loved ones safe and secure. Slomin's Shield® system makes it easier to control hundreds of various Z-wave devices® around the house via the control panel or remotely through the Slomin app.* View and control your system from the palm of your hand with The Slomin's iPhone and Android apps. A cheeky siren can derail a thief, but nothing will send the police home faster than a phone call from our central station Our station is ready to respond to your signal 24 hours a day, 7 days a week, 365 days a year. With experienced Slomin employees operating the system, you can rely on an immediate response every time your armed alarm is triggered. Mobile phone not included. Remote functions are available upon request. Contact your Slomin representative for more details Keyboard (update available)The Slomin Shield control panel contains the programming of your security system and sends signals to our central monitoring station. The keyboard, an easy-to-use interface of the panel, allows you to communicate with your alarm. (included) Advanced motion sensors are built to detect rapid changes in infrared energy. With the ability to protect vast areas, the motion detector is ideal for securing spacious rooms throughout your home, stairwells as well as hallways. (included) We understand, life is hectic. Children, babysitter, housekeeper or dog walker may require access to your home, even while you are away. Our basic weapon system up to 3 doors, providing the most complete protection for your home. View your home from the office or vacation with live streaming cameras that show you real-time activity. Perfect for checking the house during work or seeing who's at the door, the cameras keep you in control. Evidence that you have a security system is the biggest deterrent to a thief. Slomin's lawn signs and window decals will help protect against any potential intruders; trying to outwit the Slomin Shield® is an arrest waiting to happen! Remote KeychainAbits the hassle of juggling grocery bags when disarming your security system: our keychain remotes arm or disarm your system at the touch of a button. These remote controls simplify your life by taking a step out of your morning routine or after work. Display all the cameras in your home on a single screen to see all the activity at once. Whether you're at work, in the car, or in the cafeteria, sign in to your MyShield account for instant access. Use your phone or tablet to set or disarm the alarm while on the move. Uncomplicated access to any Apple or Android.Focus powered device in a camera image for a closer look at certain activity. Receive real-time mobile alerts when your alarm system is activated. Central Station Surveillance Our monitoring center is always working to ensure your safety. Our experienced, specially trained response team provides immediate assistance. Selecting a special password prevents false alarms and identifies intruders. Monthly monitoring (update options available) The home security system includes: Panel and keyboard, 3-door motion detector, battery backup, patio signals and window Decals.To that guarantee first-class quality at every job, we only send our own trained technicians Slomin's Shield Home Security System® fully customized and tailored to your needs. Perfect for your moving lifestyle, Slomin's security system offers full remote access via a smartphone or mobile device. Whether you're interested in securing the most vulnerable areas of your home or every floor of your home, Slomin's can design a package that will satisfy you. Packages can include motion detectors, glass break sensors, Pan Tilt Zoom (PTZ) and as well as standard protection for inputs. All packages are designed to provide the most complete protection for your home. Slomin can also protect your home or business from environmental hazards with smoke detectors, carbon monoxide detectors, water detectors and more! Because Slomin offers a free basic system and installation, customers can save on equipment and installation costs. In addition to Slomin's alarm system, installing a monitored fire or safety system can save you money on your homeowners insurance. Please ask your insurance agent for details, as discounts will vary. In addition to home security systems, Slomin's offers card access readers, support trackers and many other options for our business customers. Stay up-to-date on off-hours activity with customizable access, multiple keyboard user codes, and camera monitoring. Advanced but easy to use, The Slomin's Shield® is the best choice to protect your home or business.
