Version de la app1.15.0.5Compatibilidad con AndroidAndroid 4.4 - 4.4.4+ (KitKat)DesarrolladorPermisos10Información Detallada MONSTER-MCPE » Download Minecraft PE » Minecraft 1.15.0 for Android Wow, the new version of Minecraft Bedrock Edition 1.15 has been released. Will we finally see Minecraft Nether Update for Android? Unfortunately, no, this version is available for all Android devices and gives players a large number of new ones, but this is not the very long-awaited Nether Update. In more details, let's look at the new update below. What's new in Minecraft Bedrock Edition 1.15? Update Nether? No, unfortunately, this is not the Nether Update. This is a new update that the developers of the Mojang studio presented to players as an update that focused on Java Parity & Bug Fixings. Now we know for sure that the release of the long-awaited Nether Update will be in Minecraft version 1.16. What is java parity and bug fixes?1. Let's find out with you what Java Parity means. This is the equality of versions of Minecraft Java (PC version) and Bedrock (mobile version). This is very convenient, since when the developers of the Mojang studio make the version of the game Minecraft Bedrock more similar to the PC version of Minecraft Java, new releases will be released simultaneously, and we will receive high quality and timely content?2. As you can already understand from the name of Bug Fixings, this work to fix various errors. We all know that performance in Minecraft Bedrock is a big problem. First of all, always remember that no bugs in the game do not that other players will not have them, or vice versa, where a player can have everything without any problem, you can get a mistake. Of course, we all know and understand the difference between Minecraft Bedrock and Java. And so that in the future there will be no problems with the updates and the whole process, the developers decided to get rid of this difference. From now on, the Substrate and Java will be the same! Now let's look at the innovations of the game! The first thing to tell you is 3D models. This is a very interesting feature that allows players to see dropped items in the 3D model. We remind you that previously you could only see 3D block models. Charm Curse of Binding! What is it and how does it work? This charm has been added to the minecraft world with the release of the new Minecraft 1.15 update. Using this charm, the player can enchant armor, pumpkin and even elytra. To do this, you need a special book, or just use the /enchanter Steve 27 and/or magic Steve binding commands. A new feature of the interaction board and cactusA new feature that makes the Minecraft PE game more similar to the Java version of Minecraft is the interaction of the board and the cactus. After the boat is as close (or on top of it) to the cactus as possible, it will start shaking and then breaking. Other changes:1. From now on, the player can put the Gate and Pumpkin without any support?2. Now the explosion of Eye of Ender particles is similar to how the explosion of Eye of Ender particles in the PC version of Minecraft Java?3. Now the power of the pipeline will work in the rain.4. Approach production under giant fir trees?5. Players can get flowers from the pot without breaking the pot.6. Use a damaged arc when constructing a hub. New block: Added new blocks from the Education Edition that limit players' actions. Let's take a closer look at them:1. Outline: This block does not allow the player to pass under it or above it. You can try to trick the block and use Ender Pearl that will emit particles. Use the /give command @s border_block;2. Denial: This block will not allow you to place or break anything over it; Use the /give command @s refuse?3. Allow: Over this block, you can put and break other blocks. Use the /give command @s the accept command. It doesn't work in Creative mode! Non-Player Mob Character from Education EditionThis is a mob, or as everyone used to call it NPC mob is a non-player who looks like a peasant. Players can give birth to this npc mob using a special spawn egg or /bummon minecraft: npc or /summon npc commands; They have their own characteristics, for example, they do not move at all, they are invulnerable and they have no special behavior. Useful: NPC mobs have a customizable interface. Can you change:— Mob name?— Dialog boxes, that is, the displayed text?— Display. 20 different options are are Advanced settings. Activate the command during the interaction or after pressing a button. New animationsIn the character editor, you can see Steve and Alex's new moves. This is a very interesting feature, because when you select an item, your character will yawn, and after saving an item, it will start dancing. Game FixesA huge number of errors were corrected in the game, since the developers of the Mojang studio decided to fully deal with the fixes previously found by players during the game process. Thanks to Mojang's hard work, the game has become faster and more stable. In total, some 61 errors were corrected. Below we will show you those mistakes that in our opinion are the most important for players:1. The invisible Shulker 2 boxes have been corrected. Optimized game client?3. Fixed a large number of crashes?4. Constant crash while using osteolyte?5. Corrected the crash when a blister ignites?6. Constant repeated text reading on Xbox One?7. From now on, the transition from water to earth takes place more smoothly.8. Using a fishing rod while running does not slow the player down. As you've already figured out, the new Minecraft BE 1.15 update has nothing to do with The Nether Update. Work has been done on equality with java and fixing errors. Determining.
