Ideaworks wifi antenna setup

Ideaworks Long Distance WiFi Antenna Software File Name: ideaworks_long_distance_wifi_antenna_software.zipDeaworks Long Distance Wifi Antenna Software Driver Version: 691K6Gj9BDeaworks Long Distance Wifi Antenna Software ZIP Size: 143.kb Manufacturer: Ideaworks Ideaworks Long Distance Wifi Antenna Software Has Been Fully Scanned: 1/22/2021Scan Status: OK IdeaWorks Long Range Wifi Antenna Software Has a Special Version of Windows: Windows 7 64 Bit, Windows 7 32 Bit, Windows 10 10 64 bit,, Windows 10 32-bit, Windows 8, Windows 7 Ultimate 32-bit, Windows 10 Enterprise 64bit, Windows 7 Home Basic 32bit, Windows 10 S 32bit, Windows Vista Home Premium 32bit, Windows 10 Mobile 64bit, Windows Vista Starter 64bit, Windows 10 Mobile Enterprise 64bit, Driver Upload: 1/26/2019 Direct Download: 226 Latest Download: 11/16/2019 Managed Download: 165 Latest Download: 11/26/2019 Download Mirror: Current Delay: 25 Seconds Driver License: GPLReports Published by 125/226 Success published by users 116/12 5 User Driver Download Score94/100 Driver Installation Score 89/100 Overall Preformance Score 98/100171ThumbsUp7ThumbDownldaworks Long Range Wifi Antenna Software Driver Direct Download was reported by the majority of our reporters to be sufficient, so we recommend downloading and installing it. 126/165 Reports Published by Users 117/126 UsersDriver Download Score 92/100 Driver Installation Score 92/100 Driver Installation Score 92/100149/1 00 Overall Performance Score 91/100149ThumbSDownldaEida Long Distance WiFi Antenna Software Driver Installation Manager was reported by the majority of our reporters to be very satisfied, so we recommend downloading and installing it. Select your OS and press Download. This option requires a basic OS understanding. Select Operating System, download the zip file, and install it manually. IdeaWorks Long Range Wifi Antenna Software is recommended if you are the only driver on your PC that you want to update. This option does not require an understanding of the OS. Automatically scan your PC with IdeaWorks Long Range Wifi Antenna Software + a specific required version of all other old drivers and install them all at once. It helps you maintain a useful driver collection. After downloading and installing ideaworks long distance wifi antenna software, or driver installation manager, it takes a few minutes to send the report: * Only registered users can upload the report. Don't have a password?register and get one. Ideaworks long distance wifi antenna software may sometimes be wrong for other drivers to stop functioning These are the driver scans of 2 of our recent Wiki members** scans were performed on computers suffering from functional failure of Ideaworks long distance wifi antenna software. Latest and Features Monitor Sony Digital Flat Panel (1024x768) I have some ideas on date and functioning the latest and functioning mobile phone or portable device Acer NOKIAUp Works Indoor/Outdoor Long Range WiFi Antenna (USB) SKU = JB6612 -- The included CD only supports Windows 8, so when you connect to the USB port of a Windows 10 computer, the antenna is not recognized. I contacted Mfr www.Jobard.com usa and told me they only have drivers up to Windows 8 and don't have drivers for Windows 10. The CD has a driver for ralinks. Were you wondering if anyone found an updated driver for these antennas that works in Windows 10? (0 You do not need to contact MediaTek. If it is the chipset being used (which it appears to be), the driver I linked to works either, or it doesn't. If the driver exists from the manufacturer, it appears on the Web site. There are several different routes to go to identify the chips being used, but the most accurate would be to open one, yes. The above list of products appears to check, but that doesn't say that various runs were not generated, with the possibility of using other components. 0 Windows 10 incorporates native generic Wifi drivers, so I'm surprised they don't work at all, probably not a good sign. As for finding a driver.. If a particular Ralink chip can be identified by its core, you may be able to specify the driver source directly. If this is the same thing: 3070 chipset appears to be in use. Ralink is now owned by MediaTek (as of 2011, there is probably a fairly old device), and the driver appears to be available directly from MediaTek here: andFifi/rt3070 It all depends on the chip they are using and 0 Windows 10 incorporates a native general Wifi driver, so I'm surprised they don't work at all. Probably not a good sign. As for finding a driver.. If a particular Ralink chip can be identified by its core, you may be able to specify the driver source directly. If this is the same thing: 3070 chipset appears to be in use. Ralink is now owned by MediaTek (as of 2011, there are probably some pretty old devices), and the driver appears to be available directly from MediaTek here: It all depends on the chip they are using. When I first contacted USA Mfr, they told me the same thing that Windows 10 should have already loaded the necessary drivers, but when I plug these antennas into any Windows 10 computer, I don't even recognize I have anythingConnect to the USB port. When I connect them to Windows XP or Vista or Windows 7, they are immediately identified and ask for drivers and CDs. When the CD is loaded, it indicates that it is lalink software for Windows XP/Vista/Win7 and contacts MediaTek to see if they can help - how do I identify the chipset I want to use? by opening the antenna and checking out the internal circuit board?? 0 You do not need to contact MediaTek. If it is the chipset being used (which it appears to be), the driver I linked to works either, or it doesn't. If the driver exists from the manufacturer, it appears on the Web site. There are several different routes to go to identify the chips being used, but the most accurate would be to open one, yes. The above list of products appears to check, but that doesn't say that various runs were not generated, with the possibility of using other components. 0 Oh OK - do I try it and see if it works?
