Source: Amazon Amazon is doing a fantastic job in making tablets for those who need budget-friendly devices. Fire HD 8 is one of our favorites with 12 hours of battery life, an 8-inch HD display, and easy access to the world of Amazon services. Fire HD 8 has access to hands-free Alexa, which means it can act as a smart speaker of sorts if you have questions. Plus, you'll be able to clearly hear Alexa's answers with two Dolby Atmos speakers built in. As one might expect, Amazon Fire Tablet is running a modified version of Android, with no out-of-the-box access to the Google Play Store. Instead, you'll have to rely on the Amazon App Store or Sideload Play Store on Fire HD 8. 32GB or 64GB Hands-free Alexa Storage Four color dual dolby atmos speakers Only 2GB RAM 2MP front and rear cameras No access to Google Play Store Excellent tablet for consuming Amazon Fire HD 8 content is a fantastic choice for budget-friendly tablets, especially if you like everything what Amazon has to offer. Source: Vankyo When it comes to budget tablets, there are some concerns that the manufacturer will throw too much bloatware on board. This is not the case with the Vankyo MatrixPad S10 because there is no bloatware that can be found, which provides an Android experience. This 10.1-inch tablet ensures media consumption is a breeze, along with 32GB of built-in storage. There is also an 8-megapixel rear camera if you like shooting with a huge viewfinder. In addition, there is a microSD card slot that can hold a lot of your favorite content, images and videos. While there is support for microSD cards on board, it has been limited to support cards up to 128GB. This is an upsetting inclusion as you will eventually run out of space if you plan on loading into movies and TV shows. Eight hours of battery life is unlikely to last all day, so you'll want a portable charger nearby. 10.1-inch HD display Close-stock Android 32GB onboard storage 8-megapixel rear camera MicroSD card supports limited to 128GB Available only in Black Mediocre battery life Get big screen for best media consumption Vankyo's MatrixPad Z4 is a surprisingly good tablet for price point with 10.1-inch HD display and solid spec sheet. Source: Amazon It can be hard to keep kids occupied, whether you're at home, on the road, or at a friend's house. Amazon Fire 7 Kids Edition helps you do just that with access to Amazon Kids+. It provides a slew of content and games not only to teach your kids lessons, but to let them have fun at the same time. Amazon also provides a two-year worry-free warranty, which means that if anything happens to the Fire 7 Kids Edition, the company will replace it. This is in addition to the built-in kid-proof stuff that has on the back to keep him safe from accidental falls. Between the warranty, including the case and access to Amazon Kids+, it's easy to see why it's one of the best Fire Tablets for kids. For better or worse, there is only one speaker included in the Fire 7 Kids Edition. If your child is hard of hearing, this may not be the best solution, but it will be serviceable for most. While Amazon touts the inclusion of front and rear cameras, they're just 2-megapixel sensors and end up even more blurry. Two-year warranty Includes support for Amazon Kids + MicroSD cards up to 512GB Includes kid-proof case only 1GB RAM One speaker Bad front and rear camera Keep kids occupied with included Amazon Kids+ access and included case Fire 7 Kids Edition is fantastic for the little ones. Source: Lenovo Lenovo Smart Tab M8 is different from others because you can turn this tablet into a smart display for Google Assistant. With the included charging device, you can place the M8 smart card in the dove and it will be displayed to the Google Ambient View assistant, similar to the Nest Hub. Not only can you get a portable smart screen, but Lenovo has packed in two side speakers with Dolby Atmos features. This will ensure that the speakers fill the room even if you don't have an m8 docking. And it's lighter than other 8-inch tablets, making it more portable and easier to carry with you if you need to get on the road. Unfortunately, there are some pitfalls with the Smart Tab M10 HD because it only comes with 2GB of RAM. Those hoping for multi-tasking tablets may want to look the other way. This makes a little more sense when looking at the dated design with large bezels surrounding the display. Expanding storage up to 1TB Turns into a Google Assistant smart screen when the docked Dolby Atmos sound with two Smart Dock side speakers contains only 2GB of ram dated Dock design for lenovo smart tab m8 tablet screen is fantastic if you want a hybrid tablet/smart screen while offering great sound. Source: Amazon Year after year, Amazon Fire 7 tablet continues to be one of the most popular tablets available. Maybe it's a price point, or maybe it's a combination of price and access to Amazon's digital content set. This 7-inch tablet offers seven hours of battery life, up to 32GB of expandable storage, and provides access to Amazon Alexa with just your voice. Dual-band WiFi support is also available, making it easy to use wherever your travels take you. On the other side of the fence, you'll have to deal with a below-average display that comes in at a resolution of just 1024x600. And while the processor has been updated, Amazon only included 1GB of RAM, so don't expect you to have heavy gaming or multitasking. Seven-hour battery life Expandable storage up to Alexa hands-free Only 1GB RAM 2-megapixel front and rear cameras Display lower density Large input tablet for pairing with Amazon Amazon Fire 7 services is a fantastic input tablet with access to Amazon content, but specs could be better. Source: Vankyo It can be frustrating when dealing with applications taking up load of space on your devices and tablets. But if you find a tablet like the Android Go-certified Vankyo MatrixPad Z1, you won't have to worry about these issues. These Go apps are optimized to run at the basic hardware level, so you won't slow down when you try to use different apps. As for the tablet itself, Vankyo includes 32GB of built-in storage that can be expanded up to 128GB using a microSD card. The 7-inch display is touted as having 178 degree viewing angles, ensuring you can still enjoy your content, no matter how your tablet is held. Some of the possible problems you may encounter include the hardware under the display. We'd love to see support for over 128GB of microSD storage expansion because 32GB just isn't enough nowadays. A lower density display won't be as sharp, even on a 7-inch display, and with only 1GB of RAM you can end up bottle-necked even with Android Go. Certified for Android Go 32GB storage built-in 178-degree MicroSD viewing angles extension limited to 128GB Just 1GB LOWER DENSITY RAM display Get an almost stocked Android experience in a small matrixpad Z2 package giving you access to an almost stock Android experience with excellent viewing angles and more. If you're looking for the best Android tablet under \$100, you can't get anything better than an Amazon Fire HD 8. The 8-inch HD display will showcase all your favorite content beautifully while transforming into a super-powered e-reader if the opportunity ad comes. You'll get access to all of Amazon's content in a lightweight and portable package that will continue to be a pleasure to use. This, combined with 10 hours of battery life and you are sure to use this tablet throughout the day, and then some. Please note that this is not a traditional Android tablet because it has an Amazon Fire UI overlay pre-installed with the Amazon App Store. You can get the Google Play Store, but it's going to take a little work and it shouldn't just be done by anyone.
