2008 ap calculus ab free response question 3

Calculus questions and worked on solutions AP Calculus AB multiple choice 2008. Related topics: More videos, activities and worksheets, which are suitable for calculus AP Calculus AB Multiple Choice 2008 Questions - Full Book (pdf) AP Calculus AB Multiple Choice 2008 Question 1 Show Step-by-Step Solutions AP Calculus AB Multiple Choice 2008 Question 2008 If f(x) = (x - 1)(x2 + 2)3 you f'(x) = Show Step-by-step Solutions AP Calculus AB Multiple Choice 2008 Question 4 Show Step-by-step Solutions AP Calculus AB Multiple Choice 2008 Question 5 Show Step-by-Step Solutions AP Calculus AB Multiple Choice 2008 Question 6 6. Let f be the function specified above. Which of the following allegations about f is true? The limit of l(f) is x = 2.II.f is continuous x = 2. The III. Show Step-by-step Solutions AP Calculus AB Multiple Choice 2008 Question 7 7. A particle moves along the x axis at the speed specified by v(t) = 3t2 + 6t at ≥ t 0. If the particle is in position x = 2 at t = 0, what is the position of the particle at t =1? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 8 8. If f(x) = cos(3x), f'(π/9) = Show step-by-step solutions ap Calculus AB multiple choice 2008 9. The graph f of the straight function per piece is shown in the figure above. If which of the following values is the largest? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 10 10. The graph for function f is shown at 0 3 above. ≤ ≤x Is the next one that has the least value? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 11 11. The graph of function f is shown above. Which of the following could be the f' graph, the derivative of f? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 12 12. If f(x) = e(2x), f'(x) = Step by step solutions display AP Calculus AB Multiple Choice 2008 13 13. If f(x) = x2 + 2x, d/dx (f(lnx)) = Step by step solutions display AP Calculus AB Multiple Choice 2008 14 14. The polynominomy function f selected the second derivative f values given in the table above. Which of the following statements should be true? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 15 15. ∫x/(x2 - 4) dx = Step by step solutions display AP Calculus AB Multiple Choice 2008 16 16. If sin(xy) = x, then dy/dx = Step by step solutions display AP Calculus AB Multiple Choice 2008 17 17. The graph above f shows horizontal tangents at x = 2 and x = 5. Make g the g(x) = ∫f(t)dt. What values x is not the graph g is a point of inflection? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 18 18. In the xy plane, the line x + y = k, where k is constant, tangent to the graph of y = x2 + 3x + 1. What is the value of k ? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 19 19. What are the horizontal asymptants in the graph y = (5 + 2x) / (1 - 2x) on the xy-plane? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 20 20. Make f a function with a second derivative specified by f(x) = x2(x - 3) (x - 6). What are the x-coordinates of the points of inflection in the graph f ? Show Step-by-step solutions ap Kalkulus AB multiple choice 2008 Question 21 21. A particle moves along a straight line. The graph of the particle's x((t)) position at is shown in the image above in t < <. The horizontal tangents of the graph are t = 1 and t = 5 and an inflection point at t = 2. What t valuesa particle speed increases? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 22 22. The rumor spreads among the population of N people proportional to the proportion of the product of the number of people who have heard the rumor, and the number of people who have not heard the rumor. If p denotes the number of people who have heard the rumor which the following differentials could be used to model this situation regarding time t where k is positive constant? Show Step-by-step solutions ap Kalkulus AB multiple choice 2008 Question 23 23. Which of the following is the solution for the dy/dx = x2/y differential formula with the initial condition y(3) = -2? Show Step-by-step solutions AP Calculus AB multiple choice 2008 Question 24 24. IThe f function can be differentiated twice f(2) = 1, f'(2) = 4 and f(2) = 3. What is the value of the approximation of f (point 1.9) using the line tangent to graph f at x = 2? Show Step-by-step solutions AP Calculus AB multiple choice 2008 Question 25 25. Let f be the function specified above, where c and d are constants. If f can be differentiated x = 2, what is the value of c + d? Show Step-by-step solutions AP Calculus AB multiple choice 2008 Question 26 26. What is the slope of a line tangent to the y x = arctan(4x) curve at the point where x = 1/4? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 27 27. The image above shows a slope field for which of the following differential formulas? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 28 28. Let f be a differentiable function to f(3) = 15, f(6) = 3, f'(3) = -8 and f'(6) = -2. The function g can be differentiated and g(x) = f'(x) for all x's. What is g'(3)? Show step-by-step solutions Try the free Mathway calculator and problem solver below different mathematical themes. Try the specific examples or type in your own problem and check the answer with step-by-step explanations. We welcome your feedback, comments and questions on this site or site. Please submit your feedback or questions via the Feedback page. Calculus questions and worked on

solutions AP Calculus AB multiple choice 2008. Related topics: More videos, activities and worksheets, which are suitable for calculus AP Calculus AB Multiple Choice 2008 Questions - Full Book (pdf) AP Calculus AB Multiple Choice 2008 Question 1 Show Step-by-Step Solutions AP Calculus AB Multiple Choice 2008 Question 2008 If f(x) = (x - 1)(x2 + 2)3 you f'(x) = Show Step-by-step Solutions AP Calculus AB Multiple Choice 2008 Question 4 Show Step-by-step Solutions AP Calculus AB Multiple Choice 2008 Question 5 Show Step-by-Step Solutions AP Calculus AB Multiple Choice 2008 Question 6 6. Let f be the function specified above. Which of the following allegations about f is true? The limit of I(f) is x = 2.II.f is continuous x = 2. The III. Show Step-by-step Solutions AP Calculus AB Multiple Choice 2008 Question 7 7. A particle moves along the x axis at the speed specified by v(t) = 3t2 + 6t at ≥ t 0. If the particle is in position x = 2 at t = 0, what is the position of the particle at t =1? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 8 8. If f(x) = cos(3x), f'(π/9) = Show step-by-step solutions ap Calculus AB multiple choice 2008 9. The graph f of the straight function per piece is shown in the figure above. If which of the following values is the largest? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 10 10. The graph for function f is shown at 0 3 above. ≤ ≤x Is the next one has the least value? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 11 11. The graph of function f is shown above. Which of the following could be the f' graph, the derivative of f? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 12 12. If f(x) = e(2x), f'(x) = Step by step solutions display AP Calculus AB Multiple Choice 2008 13 13. If f(x) = x2 + 2x, d/dx (f(lnx)) = Step by step solutions display AP Calculus AB Multiple Choice 2008 14 14. The polynominomy function f selected the second derivative f values given in the table above. Which of the following statements should be true? Show Step-by-step solutions AP Calculus AB multiple choice 2008 Question 15 15. ∫x/(x2 - 4) dx = Display Solutions AP Calculus AB Multiple Choice 2008 Question 16 16. If sin(xy) = x, then dy/dx = Step by step solutions display AP Calculus AB Multiple Choice 2008 17 17. The graph above f shows horizontal tangents at x = 2 and x = 5. Let g be g(x) = ∫I(t)dt. What values x is not the graph g is a point of inflection? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 18 18. In the xy plane, the line x + y = k, where k is constant, tangent to the graph of y = x2 + 3x + 1. What is the value of k ? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 19 19. What are the horizontal asymptants in the graph y = (5 + 2x) / (1 - 2x) on the xy-plane? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 20 20 20. Make f a function with a second derivative specified by f(x) = x2(x - 3) (x - 6). What are the x-coordinates of the points of inflection in the graph f ? Show Step-by-step solutions ap Kalkulus AB multiple choice 2008 Question 21 21. A particle moves along a straight line. The graph of the particle's x(t)) position at t is shown in the image above in t < < 6 <. The horizontal tangents of the graph are t = 1 and t = 5 and an inflection point at t = 2. What t valuesa particle speed increases? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 22 22. The rumor spreads among the population of N people proportional to the proportion of the product of the number of people who have heard the rumor, and the number of people who have not heard the rumor. If p denotes the number of people who have heard the rumor which the following differentials could be used to model this situation regarding time t where k is positive constant? Show Step-by-step solutions ap Kalkulus AB multiple choice 2008 Question 23 23. Which of the following is the solution for the dy/dx = x2/y differential formula with the initial condition y(3) = -2? Show Step-by-step solutions AP Calculus AB multiple choice 2008 Question 24 24. IThe f function can be differentiated twice f(2) = 1, f'(2) = 4 and f(2) = 3. What is the value of the approximation of f (point 1.9) using the line tangent to graph f at x = 2? Show Step-by-step solutions AP Calculus AB multiple choice 2008 25 25. Let f be the function specified above, where c and d are constants. If f can be differentiated x = 2, what is the value of c + d? Show Step-by-step solutions AP Calculus AB multiple choice 2008 Question 26 26. What is the slope of a line tangent to the y x = arctan(4x) curve at the point where x = 1/4? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 27 27. The image above shows a slope field for which of the following differential formulas? Show Step-by-Step Solutions AP Calculus AB Multiple Choice 2008 Question 28 Let f be a differentiable function to f(3) = 15, f(6) = 3, f'(3) = -8 and f'(6) = -2. The function g can be differentiated and g(x) = f'(x) for all x's. What is g'(3)? Show step-by-step solutions Try the free Mathway calculator and problem solver below to practice different math topics. Try the specific examples or type in your own problem and check the answer with step-by-step explanations. We welcome your feedback, comments and questions on this site or site. solutions AP Calculus AB multiple choice 2008. Related topics: More videos, activities and worksheets, which are suitable for calculus AP Calculus AB Multiple Choice 2008 Questions - Full Book (pdf) AP Calculus AB Multiple Choice 2008 Question 1 Show Step-by-Step Solutions AP Calculus AB Multiple Choice 2008 Question 2008 If f(x) = (x - 1)(x2 + 2)3 you f'(x) = Show Step-by-step Solutions AP Calculus AB Multiple Choice 2008 Question 4 Show Step-by-step Solutions AP Calculus AB Multiple Choice 2008 Question 5 Show Step-by-Step Solutions AP Calculus AB Multiple Choice 2008 Question 6 6. Let f be the function specified above. Which of the following allegations about f is true? The limit of I(f) is x = 2.II.f is continuous x = 2. The III. Show Step-by-step Solutions AP Calculus AB Multiple Choice 2008 Question 7 7. A particle moves along the x axis at the speed specified by v(t) = 3t2 + 6t at ≥ t 0. If the particle is in position x = 2 at t = 0, what is the position of the particle at t =1? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 8 8. If f(x) = cos(3x), f'(π/9) = Show step-by-step solutions ap Calculus AB multiple choice 2008 9. The graph f of the straight function per piece is shown in the figure above. If which of the following values is the largest? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 10 10. The graph for function f is shown at 0 3 above. ≤ ≤x Is the next one has the least value? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 11 11. The graph of function f is shown above. Which of the following could be the f' graph, the derivative of f? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 12 12. If f(x) = e(2x), f'(x) = Step by step solutions display AP Calculus AB Multiple Choice 2008 13 13. If f(x) = x2 + 2x, d/dx (f(lnx)) = Step by step solutions display AP Calculus AB Multiple Choice 2008 14 14. The polynominomy function f selected the second derivative f values given in the table above. Which of the following statements should be true? Show Step-by-step solutions AP Calculus AB multiple choice 2008 Question 15 15. ∫x/(x2 - 4) dx = Display Solutions AP Calculus AB Multiple Choice 2008 Question 16 16. If sin(xy) = x, then dy/dx = Step by step solutions display AP Calculus AB Multiple Choice 2008 17 17. The graph above f shows horizontal tangents at x = 2 and x = 5. Let g be g(x) = ∫I(t)dt. What values x is not the graph g is a point of inflection? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 18 18. In the xy plane, the line x + y = k, where k is constant, tangent to the graph of y = x2 + 3x + 1. What is the value of k ? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 19 19. What are the horizontal asymptants in the graph y = (5 + 2x) / (1 - 2x) on the xy-plane? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 20 20 20. Make f a function with a second derivative specified by f(x) = x2(x - 3) (x - 6). What are the x-coordinates of the points of inflection in the graph f ? Show Step-by-step solutions ap Kalkulus AB multiple choice 2008 Question 21 21. A particle moves along a straight line. The graph of the particle's x(t)) position at t is shown in the image above in t < < 6 <. The horizontal tangents of the graph are t = 1 and t = 5 and an inflection point at t = 2. What t valuesa particle speed increases? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 22 22. The rumor spreads among the population of N people proportional to the proportion of the product of the number of people who have heard the rumor, and the number of people who have not heard the rumor. If p denotes the number of people who have heard the rumor which the following differentials could be used to model this situation regarding time t where k is positive constant? Show Step-by-step solutions ap Kalkulus AB multiple choice 2008 Question 23 23. Which of the following is the solution for the dy/dx = x2/y differential formula with the initial condition y(3) = -2? Show Step-by-step solutions AP Calculus AB multiple choice 2008 Question 24 24. IThe f function can be differentiated twice f(2) = 1, f'(2) = 4 and f(2) = 3. What is the value of the approximation of f (point 1.9) using the line tangent to graph f at x = 2? Show Step-by-step solutions AP Calculus AB multiple choice 2008 25 25. Let f be the function specified above, where c and d are constants. If f can be differentiated x = 2, what is the value of c + d? Show Step-by-step solutions AP Calculus AB multiple choice 2008 Question 26 26. What is the slope of a line tangent to the y x = arctan(4x) curve at the point where x = 1/4? Show Step-by-step solutions AP Kalkulus AB multiple choice 2008 Question 27 27. The image above shows a slope field for which of the following differential formulas? Show Step-by-Step Solutions AP Calculus AB Multiple Choice 2008 Question 28 Let f be a differentiable function to f(3) = 15, f(6) = 3, f'(3) = -8 and f'(6) = -2. The function g can be differentiated and g(x) = f'(x) for all x's. What is g'(3)? Show step-by-step solutions Try the free Mathway calculator and problem solver below to practice different math topics. Try the specific examples or type in your own problem and check the answer with step-by-step explanations. We welcome your feedback, comments and questions on this site or site.
