Screw in updates pin base updates updates lights work reit set fixtures Lights Disinfection LIGHTS LED Solar Photo Catalog Solar Image Applications LBI Light Pilot Prowess Design Efficiency, a section of TADD LLC, was founded in early 2007 as a supplier of LED retrofit quality products with a focus on the electrical distribution channel. Our strategy is to serve this sector with a wide range of innovative high quality products, offer competitive prices, provide above-average service of supply and do all integrity. An example of the product types we specialize in is a patented line of bulbs replacing the contest series that is designed with functionality, light output and asceticism preferred by lighting professionals. Tim Taylor, CEO, President and Owner, was senior vice president at Internatic Incorporated, a leader in energy control and landscape lighting products in the park. After a long and successful career at the Premier Power Distribution Channel provider, Tim decided to take his experience and relationships to the emerging LED industry. Interethicist and business solutions were initially applied to the Wild West from the LED replacement bulb market. A team of high-level electrical/lighting representatives of the USA service and Canadian distributors have developed a policy of not directly selling to end users or projects/jobs. Light design efficiency dedicated to providing the type of products that electrical distributors require; Appropriate testimonials, such as LM79, Lighting Facts, UL and Ultimate Energy Star, are top priorities for us. These labels instill confidence in our customers for our products. More and more of our products carry certifications, and eventually most will be adopted. We offer proprietary products, with outstanding patented, like our exclusive line of high-performance high-performance competition lamps. Some of our products, in what we believe to be the widest variety of LED products anywhere, may seem to be similar to many competing products but we can assure you that the core, which you can not see, has been designed to give you the performance and longevity you expect from LED products, but do not always get in this vast unknown supplier industry. Let us help you become more energy efficient in alternative lighting that will reduce your electrical expenses and carbon footprint. LED lighting system
