## Nintendo wii setup manual

1 Place the console near the TV. It must be close enough for the cables to reach the TV and the output. [1] When leaving the Wii upright, make sure the stand is mounted in the correct way. Take it and plug it into the round plastic, dragging them until they click and click. 2 Connect the Wii to the outlet. Take the power cord that was accompanied by the appliance and plug it into the outlet. Place the other end on the left side of the back of the console. 3 Also connect the touch bar to the Wii. The thin ribbon, gray and black in color, should be connected to the red entrance on the back of the console; then attach it to the front and under the TV. Remove stickers that protect the bottom of the sensor so that it sticks in place. If you prefer, place the bar on the TV. 4 Connect the Wii to the TV. In general, it should have standard A / V cables (yellow, white and red); the colourless cable must be placed in the wide, flattened space behind the console. Behind (or on the side) of the TV, find the Video section in and place the cables according to their colors. There is no point in using common A / V cables for connection; Wee will only work with the attendants. To stop wii cable A / V from connecting to a monitor, buy an adapter. 5 Insert the batteries into wiimote, control the device. Remove the back cover and insert two AA batteries that accompany the console if it is new. See the correct orientation according to the + and - printed on the compartment and place them accordingly. Remove silicone or rubber protection from Wiimote, if any, to access the battery compartment. 6 Check the control. Press the A button to make sure the batteries are running; if so, the lights at the bottom of the controller will flash and turn on. When it doesn't blink, replace the batteries. 7 Attach the bracelets to the Wiimotes. They are very important when playing on this console, especially when the game requires a lot of movement. They must be placed at the bottom of Wiimote; just sign them for a ganginho. When playing, tighten the bracelet so that it is firmly attached to the hand. 8 Turn on the TV by pressing the Power button on the remote control. 9 Adjust the input to which the Wii is connected. Press the Input, Source, or Video button on the TV itself or on the remote control until the correct number appears. Since the Wii will be connected to an A / V input, the number must be 1, 2 or 3. The number must be recorded next to the cables behind or on the side of the TV; only set up the appropriate input. 10 Turn on wii. Press the Power button that is on the front of the console; after a few seconds, the console setup screen will appear on When nothing appears and without noise emitido, confirmed on entrada sintonizada é a correta e que os cabos estão conectados com firmeza. Alterne pelas entradas disponíveis até que a tela de configuração do Wii apareça. 11 Sincronize o Wiimote console. Assim k o control estiver sincronizado, uma luz vermelha ficará acesa na parte retreats, indicando que você pode prosseguir com configuração up Wee. Fassa is sincronização to séguinte maneira: [2] Abra atrakuda to cartão SD, on frente do Wee. Retire like Tampa to Dranka do Wymote.
