The process of dyeing begins when you apply henna paste with lemon juice, sugar and essential oils. Give several hours for the dye to penetrate the top layer of the skin (see a specific henna tattoo set, label for further instructions). Second, make sure that the henna kit does not contain chemicals such as PPD (para-Phenylenediamine), which are added to produce black henna tattoos; Real and natural henna powder should have more brown/red, it indicates that it is the natural henna you want to use.
