By this time, everything had changed a lot, and there were very few people on Earth. The reason for this was a lot of wars that occurred late Century. Since they used biological and chemical weapons there were many strange and terrible changes with the inhabitants of the planet. Many died, and those who survived were mutated. For 20 years life was a complete devastation and as a result of the last nuclear bombardment, civilization was Destroyed. These events led to the creation of four worlds in North America. Four states The whole world was divided into four parts between elves, humans, dwarves and trolls. After the nuclear explosion, they became mutants, but wars continue - now they compete with each other. The Shannara Chronicles will explain about those events that occur in these four states. Some people survived after the attack and hardly suffered mutations due to the fact that they found a good shelter. Now they will release the rest of the land and join with their own – the southern part. The dwarves have changed significantly after the wars. They found shelter underground, so they became short and strong enough. In times of slavery, they worked in mines, now the dwarves live on the surface of the earth. The new trolls inhabitants may be called the most militant tribe. Tall and strong, they never produced a pleasant impression. Among this tribe are many varieties that cannot withstand each other's spirits. Elves are forest dwellers who have never cooperated with people. Only after the great wars did the situation change a bit. They lost most of their magical skills, but managed to survive these terrible events. The Shannara Chronicles series will show you the new world's population and the relationships arising between them after the global changes. Original name: The Shannara Chronicles Region: Beauty Chinese: English Premiere: 2016-01-06 TV: Spike Type: Magic In the History of Fantasy Literature, The Sword of Shanara, published in 1977, is a classic book with the size of The Lord of the Rings, The

Legend of the Sea, The Dark Tower, The Dragon Gun, The Sword of Truth and more. History takes place in the new human world thousands of years after the destruction of human civilization, the ancient forces of evil are recovering, and the cloud hanging over the north will spread to the continent quartet. In the Peace Valley, Shay, who has half an elf lineage, is the only remaining descendant of the Shanara bloodline (a generation of magical families) and the last heir to the dark to use Shanara's legendary Sword weapon against the dark. From the moment the black-dressed Druid came to the door to warn, a stable and stable life was yesterday's dream, because the evil messenger of the skeleton bore the hunting order of the black demon, came to destroy the only blood that could threaten her. The army of earth and giants driven by darkness is about to invade the Quartet. Beneath the mysterious druids, who are familiar with history, the valley village, highlanders, border prince, dwarves and elves form a team of eight, with their own will, embarking on a sword-seeking journey (the sword of the lost). MTV booked the season-long show in December 2014, the most ambitious new project since MTV entered the field of scripted programming, based on Terry Brooks' fantasy novel Shanara's Sword. Creators of Smallville Al Gough and Melles Melles Jonathan Liebesman, director of Mutant Ninja Turtles, directed the first two episodes, and all three will also serve as executive producers. Terry Brooks himself serves as executive producer. Jon Favreau was supposed to direct the first episode, but failed to do so due to a scheduling conflict, and will retain his status as executive producer. The first season will be based on the second original book, The Elfstones Of Shannara, published in 1982 and 16 weeks on the New York Times bestseller list, with Shay's grandson, Will Ohmsford. Shanara's Sword has many elements of adventure, supernaturality and love, which are the things young people are most interested in – and that's the main reason why MTV developed the project (MTV channels are seen primarily by young people in the 18-34 range). Sales of Terry Brooks fantasy books are second only to Harry Potter author JK Rowling, according to the data. Interestingly, his series Shanara's Sword has never adapted to any form of mainstream film since it was first released in 1977 (Fox won the rights to the film adaptation in 2007, but the project eventually collapsed). According to media commentary, shanara's sword story lies somewhere between the Lord of the Rings and the Song of Ice and Fire, which ranges from the former's long adventures and colorful monsters to the latter's multi-kingdom conflicts. Poppy Drayton plays elf Princess Amberle. She was cunning, fit and capable, and was the first woman to be chosen for God's Choice Warrior group. This special group is responsible for the protection and care of the sacred delf object, the former elery tree. But unlike other God-chosen warriors, Amberle's legendary journey has just begun, and she is destined to be a heroine - no matter how dangerous and tribulations will happen. Aaron Jakubenko plays Amber's uncle, prince and Prince Ander. He enjoyed all day, loved parties, and still can't find the right place in the world. Austin Butler plays actor Will Ohmsford, who has a half-human pedigree and half elf. He was shy about his life and spent his life trying to hide his sharp ears. He is kind, considerate, charming, humble, and always despises himself. When he learns that he is the last member of the legendary Shanara family, his life will change dramatically. He had to find Druid and let him guide him on his mission, but the journey was fraught with danger from the start.
