Have fun skiing in true skate for iPhone.See more apps in Tom's guide for more iPhone and iPhone Apps.Also check out the forums. Download True Axis Android 4.1 + Version: \$1.5.26 \$0 True Skate (MOD, Unlimited Money) - a very popular game that takes you to conquer different areas, which are specially prepared for skiing. Stand on your skate and go do the most dangerous stunts, push down on the ground and scatter faster. By passing all of the above, the game has very gorgeous graphics and realistic physics that are closer to reality. Ride and have fun in your own ski parks, as well as the progress of the game will open up new snowboarding, parks and new tricks that no one but you perform! Updated to version 1.5.26! Imagine, in the summer afternoon. A teenager on the couch opened his sleepy eyes, slowly got up and entered his room, held a beloved skateboard, and went to the playground to enjoy the afternoon sunshine. There are no other people on the playground, just the same, but not a single boy, because it is skiing, sunshine and elegance. How simple, how beautiful, true skate is such a game, no level, no challenge, just simply playing with their skateboard, real and pure. - ApkAward.cOm open the game screen, the game scene is not blown directly, but the black screen slowly opens up and down, indicating the effect of sunlight. It's as if the attentive person opens his eyes, and then has a wonderful three-dimensional effect, similar to how the film is filmed, with the movement of the uninterrupted lens that pulls our gaze to the skateboard on the floor. The 3D game screen is very beautiful, with people audio simulator feels very enjoyable. The top of the game is similar to the VCR button that can be used to change perspective, a total of 5 types of views to choose from. The most important part of the game is entertaining skating gameplay, but in the meantime, the game has some fun tasks like learning to work, tracking another skateboard in front of you, and relaxing. The game started with a good novice guide, in the game after a few minutes, the player will know how to play this game. However, if you want to play skiing, you may have to spend some effort. After that, use it to kill time and constantly train skills to make yourself a skater. Since the so-called real reel, the game is the most emphatic sense of reality, from screen to sound effects, to skiing action as well A variety of details of the transaction are correct. The game has a very cool feature, that is, run. This is not a simple replay, but the opposite of time. After clicking the play button at the top right, as the old-fashioned VCR rewind, the image turns gray, the player will see the actions that have been done before and all back to back. At this time the release of the play button, we can return to this point in time again. In short, if the player is not satisfied with one of his actions, he can go back and forth again and the effect of this retreat is really remarkable. The game really needs to spend some effort to study, and the ultimate goal is to treat it as a real scene simulation. Replace your feet with your own fingers, stop skipping, jumping, upside down, pole skipping by skiing in different positions... As you go through missions in your game, you will learn some basic skiing tips. The game is very artificial and let me think of a previously played game called Touchgrind BMX, this will obviously make the image better than BMX. This style of game has been slowly accepted by players, but the game scene and skiing only one, I have to say that this is unfortunate. In addition, this game is very simple, such as passing through the game and the story of the game player you might think this game is very boring. But if you like this kind of game players, you will have a true skate put it! Skiers Go to SkateWANTED: Next Tony Hawk. That is right. With True Axis True Skate, ice skating simulator allows you to do the ollies and kickflips you want in the comfort of your bed or couch without actually having to venture into the ski park. True Skate is just a painting giving the illusion that the ghost is skiing, working perfectly with touch screen technology. To control the skateboard all you have to do is swipe and flick on board and the area around the board. To move and gain speed swiped vertically next to the board. To guide touching the center of the board. It will be difficult to control tricks but with practice comes amazement. You can ollie by clicking on the screen and on the tail of the board and then level by clicking on the front. You can try more complex things like kickflips and benihas all to be mastered in sandbox mode. You can skate through missions like follow a ghost around skatepark in following the leader's fashion, copy ing his skills or do a crazy amount of tricks in a short time. If owning a board is really putting your sandbox something you will have covered with all half pipes, rails, steps, empty swimming pools and walls. Found: Next Tony Hawk.
