Looking for high-quality math worksheets aligned with common basic standards for K-8 grades? Our premium worksheet bundles contain 10 activities and answer the key to the challenge for your students and help them understand every topic within their grade. The related resourcesDependent resources listed below are aligned with the same standard (7EE04) taken from ccsm (Common Basic Standards for Mathematics) as the expressions and equations worksheet shown above. Use variables to represent quantities in the real world or a mathematical problem, and create simple equations and inequalities to solve problems by justifying quantities. Solve word problems leading to form equations $px + q = r$ and $p(x + q) = r$, where p , q and r are specific rational numbers. Solve the equations of these forms smoothly. Compare the algebraic solution with the arithmetic solution identifying the sequence of operations used in each approach. For example, the circumference of the rectangle is 54 cm. Its length is 6 cm. What is its width? Solve word problems leading to form inequality $px + q > r$ or $px + q < r$, where p , q and r are specific rational numbers. Chart the solution to the file inequality and interpret it in the context of the problem. For example: As a salesperson, you're paid \$50 per week plus \$3 per sale. This week you want your salary to be at least \$100. Write inequality for the number of sales you need to make, and describe solutions. Example/GuidanceAdd simple equations in 2 stepsWorksheets similar to the list above, the above resources are aligned with the related standards in the Common Math Core, which together support the following learning outcome:Solve real-life problems and math problems using numeric and algebraic expressions and equations If you see this message, it means that we're having trouble loading external resources on our website. If you're behind a web filter, make sure that *.kastatic.org and *.kasandbox.org are unblocked. 7th, 8th, 9th, 10th, 11th, HomeschoolPage 2Oh No! We found no results for 2-step %20inequality%20word%20problem. Check the spelling and try again.
