## Bissell deepclean premier pet carpet cleaner instructions

Bissell is a name you can trust for deep carpet cleaning or soft surfaces. Bissell makes carpet cleaners in a variety of sizes to meet your household needs. Bissell carpet cleaners usually have a water and chemically clean-based system with vacuum and brush. These features are designed for deep cleaning and lifting of dirt and stains. The professional quality of Bissell carpet cleaners can be quite large but work well and are a good choice for a family with large carpet areas. The smallest Bissell cleaners are more effectively used as point or small cleaners. This site is not available in your country We have purchased Bissell Big Green Machine Professional Carpet Cleaner so our expert reviewer can put it to the test on the dirty carpets she could find. Keep reading for our full product review. Tired of shelling out money to rent carpet cleaners or hire professional cleaners every few months? You may want to consider buying a product like Bissell Big Green Machine Carpet Cleaner. Carpet cleaners are extremely handy if you have lots of rugs in your home as they allow you to pull out dirt your vacuum might skip and wash the fabric to remove the smells. A large green machine is a high-end model that costs quite a penny, but it could be worthwhile taxation if you like washing your rugs regularly. To see if he really delivered professional class results, we put him to the test on the dirty carpets we could find. Read on to see how it is performed. The big green machine is essentially ready to go right out of the box. It comes pre-assembled, so we don't have to worry about screwing anything together- always a plus. All we had to do was fill it with water and soap and he was ready to go. El/Camryn Rabideau This carpet cleaner gave us a workout as we drove it around our house. It weighs in at a hefty 40 pounds, so it's not the easiest tool to maneuver. Fortunately, you really only need to drag it back and forth along the straight paths that we found to be manageable. However, if you miss a place or need to maneuver it in some other way, be prepared to put some muscle into it. In addition, the Big Green Machine has a fairly simple design. It has an on/off switch on the back of the handle, which you can release to facilitate pressing and pulling. There's a trigger on the clutch that, when pressed, distributes the soap; we thought it was in the perfect location and very easy to use. We were amazed at the amount of dirt he pulled from the seemingly clean carpets. There are two water tanks on this carpet cleaner-one for water and soap, and another for dirty water. A dirty water tank is on top of a tank with clean water, and to release it, you have to swing the handle over the top. This move was a bit awkward at first, but a few times later, we got to hang it. Another plus with this machine is that you can use it its Different Bissell cleaning products, depending on your needs. It comes with a 24 ounce BISSELL 2X Professional Deep Cleaning Formula that we used during testing, but some of the other options include Pet Spot and Odor, allergen cleaning, and spring breeze. Want to look at some other options? See our guide to the best carpet shampoos. Spruce/Camryn Rabideau If you're looking for the most powerful, deep cleaning machine to make your carpets look like new again, you definitely want the Bissell Big Green Machine. This carpet cleaner has very large PowerBrushes that get deep into the fabric. We were amazed at the amount of dirt it pulled from seemingly clean carpets- you can watch the dirt get sucked through the tunnel on the front of the instrument, which is quite satisfying. He even managed to remove the dog's lingering wet smell, and we didn't need to refill the clean water tank while cleaning the medium-sized carpet, unlike many other carpet cleaners. The only downside in terms of performance is that this carpet cleaner doesn't handle pet hair particularly well. Also, the Big Green Machine has an incredibly powerful suction, so it pulls the vast majority of water out of your carpets after washing them. We used it on the medium carpet piles and it only took an hour or so until the carpet was dry to the touch again. With other machines the drying process can take hours, so it's a big bonus in our book. The only downside in terms of performance is that this carpet cleaner doesn't handle pet hair particularly well, it even says in the guide that pet hair can be left in clots on the surface of your carpet. Thus, Bissell recommends you vacuum your carpets after washing them, making it another step. It may or may not bother you. In this regard, take a look at some of the best pet hair vacuums you can buy. Spruce/Camryn Rabideau In addition to general cleaning, this model claims to remove stains from carpets, so naturally we would like to see if it can handle hard food stains. We smeared mustard, chocolate, salad dressing, coffee, wine, dirt and a permanent marker on the old mat to see how good the Big Green Machine would be fair. The big green machine has an incredibly powerful suction, so it pulls the vast majority of water out of your carpets after washing them. We let the stains dry before attacking them with Bissell, and after two cleaning sessions with included 6-inch Tough Stain Tool most of the chocolate, salad sauce, coffee and dirt stains disappeared. Mustard and wine have left weak shadows, but we think they can be removed with point treatment. On the other the permanent marker was a little gone, but eventually still visible. Our only complaint about the manual tool is that the hose is very long and very hard, making it a bit to work. However, 9-foot length will be useful if you use it on the carpet ladder. When you are done cleaning, you have to clean the dirty water before you stash the machine away. Because the dirty water tank is on top, we found it easy to remove and discard; It breaks in half to destroy the lingering dirt easily and you can even spray it with a hose if you want. As for storage, you'll need a pretty large space to put this carpet cleaner. The handle does fold up to take up space vertically, but the Big Green Machine is still, in fact, quite large. One thing we didn't like is that there is no bag or caddy to help you keep the manual tool and hose. We ended up obsessing over the janitor's handle, but this is, in our opinion, less than an ideal storage solution. This carpet cleaner is one of the most expensive options in terms of at-home mat cleaners. At around \$470, there is definitely great taxation, but its excellent performance makes it worthwhile, especially if you regularly pay to have your carpets professionally cleaned. Don't forget the first-class vacuum to go with it. Read reviews of the best Dyson vacuum you can buy right now. One of the most similar products in terms of size and ability is the Rug Doctor Deep Carpet Cleaner, which retails for about \$275. We also tested Rug Doctor and found that he does a similar job pulling up dirt that is hidden deep into the carpets, but it doesn't leave the carpets as dry as the Big Green Machine. In addition, Rug Doctor has several uncomfortable features, such as a small water tank and a poorly planned Super Boost spray that make it just OK to use. If you're going to spend so much on carpet cleaner, we'd say splurge and go for Bissell. The final verdict is worth the splurge! If you like to maintain a strict carpet cleaning schedule and have numerous carpet surfaces throughout the home, Bissell Big Green Machine Professional Carpet Cleaner will give you top-level results. However, just make sure you can handle the heavy weight of this machine before you splurge. We purchased the Bissell ProHeat 2X Revolution Pet Pro Carpet Cleaner so our reviewer can check it out on a different set of spots. Keep reading for our full product review. Carpet cleaners like the Bissell ProHeat 2X Revolution Pet Pro are a great way to elevate your cleaning mode, as they help get more dirt and dirt out of your carpets and furniture than is possible by vacuuming alone. They are super useful for removing odors and stains, and as an added bonus, having your own carpet clean can save you money on renting one or hiring Bissell Pet Pro claims to be designed with pet owners in mind, which is a really attractive concept, since many other carpet cleaners don't handle pet hair and smells well. To see if he delivers on his claim, I put it to the test on my Dog's favorite sleeper, as well as various common household spots. That's what I found. The spruce/Camryn Rabideau Base Bissell ProHeat 2X Revolution comes all in one piece, but I had to attach a number of extra parts before I could get the carpet cleaner and running. Specifically, I had to screw on a regular handle and clip on a small carry handle that lets you pick up a machine, seemingly simple tasks, but I found them confusing. This process was not intuitive in my opinion, so I found myself referring to the instructions several times. Spruce / Camryn Rabideau After I've assembled it, bissell ProHeat 2X Revolution Pet Pro looks like an oversized vertical vacuum, and it has a number of useful features that make it incredibly versatile and easy to use. For example, you can choose between a new Max Clean mode (marked as Deep Clean on the machine itself) or Express Clean modes. The latter uses less water and soap to keep the carpets dry faster, usually after about 30 minutes, according to the brand. There's also a CleanShot Pretreater pedal that, when pumped on foot, injects extra soap from the front of the brush head to help break down the hard spots. This carpet cleaner is easy to maneuver, and its soap and water trigger is conveniently located inside the handle. The clean water tank is easy to fill with one of the included sample cleaning solution-Bissell Professional Pet Urine Straightener and Oxy and Pet Spot and Odor and antibacterial carpet formula. If you use the Easy Fill soap that included the antibacterial carpet formula happens to be, you can just pour it until it reaches the line on the tank. However, not all Bissell soaps are easy to fill, for example, pet urine straightener is not, so make sure to double check before you pour it in. In the process of washing one medium carpet, I had to refill it once and empty the dirty water tank in half. Another big plus is the 2-in-1 pet upholstery tool, which has both wet and dry modes. It has rubber bristles to more effectively collect pet hair, and it even has a small trash can attached that collects hair and dirt for easy removal. In addition to this attachment, you will also get a 3-inch hand tool that is designed to help wash stains. Need a vacuum that can tackle the hair of pets, too? Check out the reviews for the best pet hair vacuums. El/Camryn Rabideau I checked this carpet clean on one of my dog's favorite carpets and I was amazed by the results. I choose deep cleaning mode, and starting from the first pass, Bissell ProHeat 2X Revolution Pet Pro started to pull up a lot of dirt! In fact, the water was so dirty, I realized that I Jump the carpet again to be safe. However, on my my pass, the water was as clean as it could be. The takeaway here is that you really only need to switch your carpets once with this tool. He also managed to remove the smell of the dog from the cloth. I checked this carpet clean on one of my dog's favorite carpets and I was amazed by the results. Bissell Carpet Clean has a 1 gallon clean water tank, but if you are on a deep clean mode, it won't last you very long. In the process of washing one medium carpet, I had to refill it once and empty the dirty water tank in half. The annoying part about a dirty tank is that while it looks pretty big, the full line is about half up the tank. However, I found it convenient that this carpet cleaner automatically shuts down when the dirty tank is full, saving me from having to check if it needs emptying. One disappointment was that, despite its name Bissell ProHeat, this carpet cleaner didn't actually heat the water it uses to clean the floors. Instead, like many similar tools, I had to fill a water tank with hot tap water before use. Is that a big deal? Not really. But you may be a little disappointed if you expect this tool to heat your own water. Despite its name Bissell ProHeat, this carpet cleaner doesn't really heat the water it uses to clean the floors. Want to make your home smell like your animals? Check out the best air purifiers for pets. Spruce / Camryn Rabideau If you have pets, chances are you are not new to spots, whether it's dirt, urine, vomiting, or something else. Bissell ProHeat 2X Revolution Pet Pro claims to remove deep stains from carpets; to see if this is true, I spotted the old carpet with mustard, chocolate, salad dressing, coffee, wine, dirt, and permanent marker. Once the stains have dried, I put the carpet cleaner to the test. I used a hand tool to wash each stain twice and it got most of the chocolate dressings for salads, coffee and dirt. Wine and mustard stains are still visible, and the permanent marker barely budged. Keep in mind that none of these spots have been pre-treated and you will probably be able to get them completely with stain treatment. Want to look at some other options? See our guide to the best carpet cleaners for pets. In my experience, many carpet cleaners have highly touted features that fall a little flat in terms of performance. However, this model actually delivers with really useful features for pet owners. For example, Express Clean mode is ideal if I want to clean quickly before guests arrive and my carpets to dry quickly. The carpet dried up much faster with this regimen, but it was still close to an hour before it was dry to the touch rather than 30 minutes of brand claims. I found the pre-processing feature easy to use: It provides a targeted splash of formula on the spots to help them. Then there's the double function padding tool, which I thought was invincible on sucking the hair of a pet and allowed me to vacuum and wash furniture. This model actually delivers with really useful features for pet owners. In addition, customers can buy a bare floor tool (not included) for use with this machine, allowing them to clean the floors without tearing out the mop. The Spruce/Camryn Rabideau Bissell Pet Pro is roughly the size of a vertical vacuum cleaner, and unfortunately it doesn't add up for easy storage. This means that you will need quite a lot of storage space. The good news is that this machine is easy to clean after use-important if you are going to be sucking pet hair left and right. I like that the brush head comes easily, allowing me to wash off a clear lid. There's even a nozzle cleaning tool that you can use to scrape out any lingering hair or dirt. It's an incredibly well-designed design that far outperforms many of its competitors. Once you have finished cleaning the machine, there is a lace bag where you can store all the accessories, a seemingly small detail that actually makes a big difference in terms of convenience. I know I'm guilty of losing vacuum accessories if they don't have a designated storage space, so the ability to hang your bag right on the carpet is perfect. The Bissell ProHeat 2X Revolution Pet Pro sells for about \$270- it's on the more expensive side as home carpet cleaners go, but the ease of use of this machine, top-notch performance, and versatility make it worth the extra cost. After all, isn't it better to pay a little more for a machine that gets the job done right the first time? In terms of size and design, the Bissell Pet Pro and Hoover Power Scrub Deluxe seem to be very similar. They both resemble vertical vacuum cleaners and include a storage bag where you can stash all your accessories. However, the Hoover carpet washer, which I also tested, is much cheaper, and its lower price is reflected in its performance. Hoover has separate compartments for clean water and soap, which is convenient, but some of its reservoirs and compounds are prone to leaking. It has separate wash and rinse modes, and overall, it does an OK job of cleaning carpets. However, it just can't match the performance and versatility of Bissell. Bringing the line? If you're looking for a simple, no-frills carpet cleaner, you might be happy with the Hoover Power Scrub Deluxe. However, those who own pets and want a superior cleaner should spend extra money for Bissell Pet Pro. Final verdict Don't wait- to buy this carpet cleaner. If you're a pet owner looking for a carpet you probably won't find a better Bissell ProHeat 2X Revolution Pet Pro. Although it's on the expensive side, side, provides unrivalled results, even on stained, smelly carpets, and it comes with a variety of useful features that will make it the tool you reach on a regular basis. Regular.
