NoCO Geniusan ultra-compact and portable lithium-ion jump starters for cars, boats, motorcycles, ATV's, gas advocate, RVs, tractors, trucks and more. It is very safe for anyone to use. It features proven proof technologies and reverses polarity protection. The GB40 can further jump start most single-battery applications, up to 20 times on a single charge.The GB40 is also equipped with a USB battery pack and led light flashlight, making it the ultimate emergency tool. For starters. The GB40 comes partially loaded out of the box and it needs to be fully loaded before use. Carefully read and understand the car's owner's manual about specific caution and recommended methods to skip starting the car. Be sure to determine the voltage and chemistry of the battery by referring it to your battery owner's manual before using this product.the GB40 is for jump starting 12-volt lead-acid batteries only. Connect to the battery.Before you connect to the battery, verify that you have a 12-volt leading-assistance battery. The GB40 is not suitable for any other type of battery. Identify the correct polarity of the battery terminal on the battery. The positive battery terminal is typically marked by these letters or symbols (POS, P, +). The negative battery terminal is typically marked by such letters or symbols (GUY, N,-). Make no connection to the cart, gas line, or thin, sheet metal parts. The instructions below are for a negative ground system (most common). If your car is a positive tea system (very uncommon), follow the instructions below in reverse order.1.) Connect positive (red) HD battery clamps to the positive (POS, P, +) battery terminal. 2.) Connect the negative (black) HD battery clamp to the 30339 Diameter Parkway, #102 Page 3 FRENLDDEESITVPTRUZHJAAR ITENLDDEFRESVPTRUZHJAPage 2 on GB40.
